The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by international Gernological institute (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown to man (a manufactured product). I.G.I. employs and utilizes those techniques and equip-ment currently available to I.G.I., including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact-optica

weight.
