This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laseracheed by International Gemological Institute (CG). A LGD has assentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD for ertypically produced by CVD (chemical ovapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGL utilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including FIII, UV-VIS-NIE, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a quagrantee, valuation nor approximation and by making the report (6) does not agree.
