Comments: This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed's by International Gemological Institute (Gi). A LGS has assentially the chemical, physical and optical properties as a mined allowand, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. Its utilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-confact-optical measuring device, a wide range analytical techniques including FIRE. UV-SN-RR, raman spectroscopy, and fluorescence analysis of various excitation wavelengths. This Report includes advanced security features. This Report is neither a glarantee, valuation nor appreciated and by making the report of does not agree to purchase or
