Comments: This Chemical Vapor Deposition (CVD) laboratory grown

diamond is classified as Type IIa

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lasenscipe-89 by International Germological Institute (CG). A LGD has assentially the chemical, physical and optical properties as a mixed diamond, with the exception of being man-made (a manufactured product). LGD's are thylically produced by CVD (chemical ovapor deposition) or by HPHF (high pressure high temperature) growth processes and may include past growth modifications to change the color. Isld utilizes the most advanced techniques and equipment currently available including, binocular microscopes, clamond color masters, non-contact-optical measuring device, a wide range enalytical techniques including Fits. UV-VIS-NIF, arman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a quarantee, valuation nor approach and by making the report IG does not arenet.
