Comments: This Chemical Vapor Deposition (CVD) laboratory grown

diamond is classified as Type IIa

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesarcheed's by international Gemological Intititude (GD). A LGD has essentially the chemical, physical and aptical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGD's are hypically produced by CVD (chemical ovapor deposition) or by HPHT (high) pressure high temperature) growth processes and may include past growth modifications to change the color. Isld utilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including ITR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a quarantee, valuation nor approisal and by motion the report IGI does not agree.
