

PROPORTIONS

Diagram illustrating the cross-section of a diamond-shaped component. The dimensions are as follows:

- Top width: 70.5%
- Top thickness: 12%
- Left side thickness: 56.5%
- Right side thickness: 72.1%
- Bottom tip: Pointed

The laboratory grow/diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). A laboratory grow diamond is one that has essentially the same chemical, physical and optical properties as mined diamonds, but is created using a growing process, rather than a manufactured product. IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact optical interferometry and/or other devices, and/or other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR MORE INFORMATION, VISIT WWW.IGI.ORG OR CALL 1-888-BUY-IGI.
