This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® by International Gemological Institute (IGI). A LGD has essentially the chemical, physical and Laserscriptea® by International demological institute (idi). A LipU has essentially the chemical, physical and optical properties as a mined atomond, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by IHPIT (high pressure high temperature) growth processes and may include post growth modifications to change the color. (Id Iulizes the most advanced techniques and equipment currently available including, binocular microscopes, aliamand color matters, non-contoc-optical measuring device, a wide range analytical techniques including _ FIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor appraisal and by making the report IGI does not garee to purchase or replace the article.
