This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laesractibed's pinternational Gemological Institut (LGD). A LGb has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are stylically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glu tillizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including. FIRI, UV-VIS-NIB, (raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor approxisal and by making the report list deeps not gare to auctivate or report is neither a guarantee, valuation nor approxisal and by making the report list deeps not gare to auctivate entry the order the article.
