Please check out our list @ locations in the Philippines here. Please fill out the contact form here. Please contact: Advanced Electronics Services Company412 Amang Rodriguez Blvd., Manggahan, Pasig CityTel. No. (632) 217-8026Telefax (632) 681-6166Email: headoffice@advanced-service.com Thermos® Our Thermos Manufactured Products® Factories located in the Philippines, Malaysia and China. Each thermos® are made with stainless steel 18/8 grade, or grade 304 stainless steel. The parts are made of polypropylene (PP) and silicone. Yes, all ® use safe, food-quality materials and are free at BPA. All products ® use dual wall vacuum insulation technology to keep your content warm or cold. For best results, please make sure the initial temperature of your content is (or cold) enough, full to maximum capacity, and the lid is properly closed. If the exterior surface is very hot or engaged and with invisible damage such as a socket or punch, please send a picture of your product to customerservice@thermos.com.sg and we will contact you within 2 working days most of thermos® Please make sure your product is not overly full and all parts of silicon are intact. For best use, do not fill the content above the language but leave a 1 cm space between the edge of the expropriation and the content. If the silicone seals are broken down for washing, please make sure that they are properly assembled to prevent possible leakage. We strongly recommend washing the thermos product ® immediately after use, to avoid accumulating stains. Dry air or dry wipe all parts of silicon to eliminate any remaining moisture that may create mold. We strongly recommend washing the ® with a soft sponge and a gentle dishwashing soap. We will not encourage customers to place a thermos® stainless steel vacuum insulated straw parts set in sterilization as it may cause product color change, color peeling and warp. Hand washing is recommended for best results. We recommend the following cleaning method to help remove the smell of rubber, or watch it in action here. Materials: Instructions: Detest the parts of silicone, fairy and malfunction from the body of the product. Fill a bowl with vinegar and water with a ratio of 1:10. Soak them in a bowl for one to three hours. Rinse thoroughly and wipe with a clean towel. We recommend the following cleaning method to help remove tea/coffee stains.Ingredients: Baking soda, 1 tablespoon hot boiling water Instructions: Place baking soda into the cup/cup and fill it with hot boiling water. Place the silicone ring in the silicone gasket into the cup/cup. Close it with the lid and set aside for soaking for an hour. Throw water. Rinse and rinse the oven well with a soft sponge and a gentle dishwashing soap. The appearance of changing the color of the rainbow effect is non-toxic, and cannot be easily removed by soaking or washing with white vinegar. For best maintenance, we recommend cooking with medium or low heat to prevent stainless steel damage. We do not recommend storing milk and fruit juices into a vacuum-insulated product as these drinks are designed to consume when fresh. Yes, our thermos vacuum insulation technology® bottles can heat the contents. These products are labeled 'cold insulation only' to prevent accidental fermentation, due to the special fermentation and straw design. It is common to experience difficulty opening some food jars, because when the food jar is filled with hot and secure liquids in a vacuum space with a covered cover closed, the hot steam from the liquid causes Air pressure that results in difficulty opening the cover cover. We recommend the following methods to help open: Set aside the food jar to cool the hot beverage for at least 1 to 2 days. The lid cover should open easily after the contents are cooled. Alternatively, speed up the process by turning the food jar upside down and soaking only the cover cover of the food jar into a bowl of hot water, for 1 minute. (Note: Do not soak the entire product in water. Read about how a thermos lifestyle® improves well-coming find out what's new and our leading sellers in 2023 will mark the 100th anniversary of the tiger corporation's birth. Since Tiger was founded in 1923, we have persevered in our quest for next-level thermal control through vacuum insulation and heat control technologies. Read more
