Introduction

TerraLink Horticulture Inc. is a leading manufacturer and retailer of crop inputs in Western Canada. Located in the Fraser Valley, we serve the horticultural market in BC, Alberta and Saskatchewan. We provide a wide range of specialty fertilizers, crop protection products, media and other inputs to professional growers and production managers of greenhouses and nursery operations.

Great Service!

The Calgary warehouse is open for both customer pick-up and delivery only. It is not a customer service centre, but the warehouse is stocked with products for greenhouse vegetable and floral, ornamental nursery, landscape and professional turf businesses.

To place orders or to ask for technical assistance, please call toll free to the Abbotsford office at 1-800-661-4559. Orders are prepared at the Calgary warehouse based on pre-orders, which can only be placed with the Abbotsford office. We need 1 hour to organize your orders.

Items that are not regularly stocked can usually be brought in to the Calgary warehouse within 5 business days.

TerraLink Horticulture Inc.

464 Riverside Road, Abbotsford, BC, V2S 7M1
Toll Free: 1-800-661-4559 Phone: 604-864-9044 Fax: 604-864-8418

Terralink Horticulture Inc. - Calgary Warehouse

Customer Shipping & Pick-Up Service for Pre-Orders Only!
#105, 18 Highland Park Way,
Airdrie, AB, T4A 0R1
Toll Free: 1(833) 456-3489

Simon Loewen, Technical Sales Representative AB-SK:
403-993-4972, Email: simon.loewen@tlhort.com

While fertilizer, crop protection products, media and seed are core to TerraLink's business, we also offer other key products such as biological controls, wetting agents, bio-stimulants, organic products and much more.

To Place Orders:

1. **Call the toll free number to the Abbotsford office at 1-800-661-4559 and place your order for pickup or delivery.**
2. **Please allow at least 1 hour to prepare your order.**
3. **The Airdrie warehouse is open for order pick-ups from Monday to Friday from 8 AM to 4:30 PM. It is located at #105, 18 Highland Park Way, Airdrie, AB.**

TerraLink can also be contacted by fax at 1-604-864-8418 or via email at info@tlhort.com.

Featured Products

Plant Prod:

A world class leader in soluble fertilizers. Plant Products Co. Ltd has been serving greenhouse flower, vegetable and turf growers since 1945. Experience counts. Premium raw materials, purity, high solubility, and stringent quality control also count. Take no Chances. Use the Best. Choose a blend from the water soluble fertilizer line or from the premium line, Plant Prod solutions.

Regalia MAXX:

Regalia Maxx is a plant extract that induces the plants' natural defense mechanisms against certain fungal and bacterial diseases. Regalia is registered on a wide range of crops including outdoor and greenhouse grown ornamentals, outdoor and greenhouse grown cucurbits, outdoor and greenhouse grown tomatoes, grapes, hops, medicinal plants, apples, trees fruits, blueberries and strawberries and turf. OMRI Listed.

ZeroTol 2.0:

ZeroTol is a versatile tool that improves pest management programs whether you are utilizing conventional, biological or integrated methods. ZeroTol removes all competition without hindering followup biological applications that depend upon colonization. With its innovative chemistry, growers have the ability to disinfest plant material and eradicate algae, bacteria cells and fungal spores/mycelia on contact. ZeroTol's patented formula includes buffers and stabilizers that support its mode of action's ability to eliminate pathogens on soft and hardy vegetation, making it an outstanding choice chemistry that partners well with conventional and biological pest management practices.

Rootshield PLUS WP:

RootShield Plus WP Biological Fungicide contains two active ingredients (Trichoderma harzianum strain T-22 and Trichoderma virens strain G-414). For the suppression of Root Rot caused by Pythium spp., Rhizoctonia spp., Fusarium spp., and Phytophthora spp. in Greenhouse Crops, Greenhouse Vegetable Transplants, produced commercially indoors, Outdoor Nursery Plants and Ginseng. For the partial suppression of Dollar Spot (Sclerotinia homoeocarpa) and suppression of Pythium damping off (Pythium spp.) in Turf. It can be used on outdoor container-grown nursery stock and is applied as a drench to the potting mix or flats and pots.

BioCeres EC:

BioCeres® EC is a certified organic emulsifying bioinsecticide based on the entomopathogenic fungus Beauveria bassiana of the ANT-03 strain. This fungus is naturally present in the soil and attacks several species of pests. For reduction in numbers of whiteflies, aphids and thrips in greenhouse tomatoes, cucumber, peppers, herbs and spices (Crop Group 19), sweet potato slips and ornamentals; and in cannabis (marihuana) produced commercially indoors. BioCeres® EC works by contact. It sticks to the pest insects cuticle (skin) for them to get infected and then cause their deaths. Applications of BioCeres EC in a vegetable production allows to reduce the presence of pests. The repressive effect is noticeable after 5 to 7 days.

Water Soluble Fertilizers

Code	Product	Formula	Comment	Size
SIMPLES (Macronutrients)				
3000850	Calcium Chloride	CaCl ₂	93% Anhydrous Pellets	22.7 kg
3000570	Calcium Nitrate GH Granular	15.5-0-0-19 Ca	1.0 % of nitrogen in ammonia form	25 kg
3000560	Calcium Nitrate "Low Ammonia"	14-0-3-18 Ca	0.1 % of nitrogen in ammonia form (90 % less NH ₄ than standard)	25 kg
3001850	Magnesium Sulphate (Epsom Salts)	9.8% Mg, 12% S	Source of magnesium and sulphur	25 kg
3003645	Magnesium Nitrate	10.7 N, 9.3Mg	Magnesium source with no sulphates, also great for foliar applications.	25 kg
3003530	Mono Potassium Phosphate (MKP)	0-52-34	Provides a high source of potassium and phosphorus.	25 kg
3006010	Phosphoric Acid Food Grade 75%	54% P ₂ O ₅	A food grade P ₂ O ₅ used to lower pH of a solution.	33 kg
3009900	Potassium Chloride	0-0-62	Also called muriate of potash (white)	25 kg
3008999	Potassium Sulfate	0-0-52-17S	Chloride Free source of Potassium	25 kg
3006970	Potassium Nitrate	13.5-0-46	Source of potassium and nitrate nitrogen.	25 kg
1804393	Potassium Silicate	0-0-8, 21% Si	Agsil 25, Liquid Source of Potassium and Silicon	256 kg
SIMPLES (Micro)				
3001330	Copper Sulphate 25 % Cu	25% Cu	Copper in sulphate form, uptake poor compared to chelates	22.7 kg
3001390	Copper 15% EDTA	15% Cu	Improved uptake over copper in sulphate form	25 kg
3002810	Iron 11% DTPA	11% Fe	DTPA Chelate - stabilizes iron availability up to a pH of 7.0	25 kg
3002460	Iron 13% EDTA	13% Fe	EDTA, narrow pH availability range, okay as long as pH below 6.0	25 kg
3002500	Iron 6% EDDHA	6% Fe	EDDHA, widest pH range, generally stable to pH 8.0	25 kg
3009740	Zinc Sulphate 35.5%	35.5% Zn	Basic sulphated zinc, uptake poor compared to chelates	22.7 kg
3002885	Ironman 5.5% Fe DTPA (Liquid)	5.5% FE	True DTPA liquid, very good value, plant available to pH 7.0	200 L
3004000	Manganese 13% EDTA	13% Mn	Improved uptake over sulphate form of manganese	25 kg
3004050	Manganese Sulphate	31.5 % Mn	Basic sulphated manganese, uptake poor compared to chelates	22.7 kg
3008600	Sodium Molybdate 15.5% - Liquid	15% Mo	Liquid. Very convenient package, easy to use, eliminates weighing	1 L
3008750	Solubor 20.5% B	20.5% B	Concentrated soluble powder, best value for boron	22.7 kg
3009780	Zinc 15% EDTA	15% Zn	Improved uptake over sulphate form of zinc	25 kg
3009740	Zinc Sulphate 35.5%	35.5% Zn	Basic sulphated zinc, uptake poor compared to chelates	22.7 kg

pH Correction

Code	Product	Description	Size
3009100	Sulphuric Acid	Liquid; use to lower water pH in a hydroponic system.	35 kg
3009500	Urea - Foliar Spray	Mini Prill Urea, solution grade.	25 kg
3006010	Phosphoric Acid Food Grade 75%	A food grade P ₂ O ₅ used to lower pH of a solution.	33 kg
3007285	Potassium Bicarbonated Food Grade	Water soluble; used to increase pH in a hydroponic system	25 kg

Code	Product	Description	Potential Acidity(A) Basicity(B)	Size
3016460	Chelated Micronutrient Mix	Micronutrient mix for soil and soilless media crops.	-	10 kg
3016440				2 kg
3015380	Plant Prod 7-11-27 Hydro Veg	Versatile low "N" blend, general hydroponics	94(B)	15 kg
3015820	Plant Prod 8-20-30 Forestry Finisher	Hardening seedlings in fall, frost and drought resistance	24(B)	15 kg
3016220	Plant Prod 10-40-25 Superbloom	Gets plants rooted and blooming	195(A)	15 kg
3015100	Plant Prod 10-52-10 Starter	Safe with a low salt index. Great for fast rooting.	450(A)	15 kg
3015760	Plant Prod 11-41-8 Forestry Starter	Conifer and general rooting starter fertilizer.	460(A)	15 kg
3016810	Plant Prod 12-0-12 Sand Based Greens Grow	Ideal for new sand based greens during/after grow-in	485(A)	15 kg
3015040	Plant Prod 12-0-44 Finisher	Ideal for periods of low light, for uniform growth.	245(B)	15 kg
3015140	Plant Prod 12-17-29 Seedling	Conifer and general hardening/finishing	35(A)	15 kg
3015160	Plant Prod 12-2-14 Optimum	Complete micronutrient package, specifically for plugs	200(B)	15 kg
3015400	Plant Prod 14-0-14	Where Ca and Mg are required, excellent for plugs.	165(B)	15 kg
3015440	Plant Prod 15-0-15 Cal Plus	High Nitrate, Very effective under low light conditions.	165(B)	15 kg
3016100	Plant Prod 15-0-20 No Stretch Solution	Designed to maintain compact, sturdy growth.	85(B)	15 kg
3016240	Plant Prod 15-15-18 Pioneer Feed	Ideal for soilless growing media.	50(A)	15 kg
3015200	Plant Prod 15-15-30 High K	To correct low potassium levels, and crop finishing	50(A)	15 kg
3015220	Plant Prod 15-30-15 High P	For acid-loving plants, during the early stages of growth.	340(A)	15 kg
3015940	Plant Prod 17-5-17 Complete Solutions*	Five macros, including Ca and Mg. High NO ₃ . No urea.	55(A)	15 kg
3015960	Plant Prod 17-5-17 Fusion Solutions*	Five macros, including Ca and Mg in one bag.	60(A)	15 kg
3016180	Plant Prod 18-6-20 Poinsettia Plus	Proper nutrition for poinsettia cultivars.	135(A)	15 kg
3016160	Plant Prod 18-9-18 pH Reducer	Reduces the need to use acid to lower media pH.	350(A)	15 kg
3016120	Plant Prod 19-2-19 Fertility Plus	Balanced, high nitrate, urea free growth formulation.	165(A)	15 kg
3015280	Plant Prod 20-20-20 Classic	General purpose fertilizer, effective on all types of plants.	285(A)	15 kg
3015240	Plant Prod 20-2-20 Acidic High Nitrate	Ideal for plugs and bedding plants.	255(A)	15 kg
3015360	Plant Prod 20-5-30 Classic Super K	Versatile for many crops, ideal for maturing and blooming.	75(A)	15 kg
3015480	Plant Prod 20-8-20 All Purpose High Nitrate	Ideal for plants in soilless media, even in low light.	205(A)	15 kg
3015780	Plant Prod 20-8-20 Forestry Special	4 times more iron than the standard 20-8-20	175(A)	15 kg
3015560	Plant Prod 21-7-7 Acid	For feeding acid loving plants or quick correction of high pH	790(A)	15 kg
3015320	Plant Prod 28-14-14 High N	For high nitrogen requirements or foliar feeding.	455(A)	15 kg
3016800	Plant Prod 35-5-10 Lawn & Fairway	4-8 weeks of fertility, spectacular green-up and extra iron.	565(A)	15 kg
3016890	Plant Prod 38-0-10 Turf No Phos	Spectacular green-up, phosphate free.	580(A)	15 kg
3016830	Plant Prod 30-8-8	Win Tree - 11.7% Water Suspendable slow release N		15 lg

*Patented bag technology. Complete analysis in one bag.

Container Fertilizer

Product	Code	Description	Size
SLOW RELEASE (POTTING & TOPDRESS)			
Nutricote 14-13-13 (T-100)	3014510	High quality compound fertilizer that gives precise and controlled release of the nutrients.	20 kg
Nutricote 14-13-13 (T-180)	3014520		20 kg
Nutricote 16-10-10 (T-100)	3014540	Contains macronutrients only, for flexibility in micronutrient application.	20 kg
Nutricote 16-10-10 (T-180)	3014570		20 kg
Nutricote 16-10-10 (T-40/180)	3014580	Blend of short and long release. Macronutrients only.	20 kg
Osmocote 15-9-12 Plus (3-4 M)	3018320	For greenhouse use. Higher levels of Mg and micronutrients.	50 lbs
Osmocote 15-9-12 Plus (5-6 M)	3018350	Homogenous prill that delivers a steady source of N-P-K plus micronutrients	50 lbs
SLOW RELEASE - POTTING FORMULAS			
Osmocote 12-7-18 Bloom (2-3 M)	3018090	Mini prill formula for Greenhouse plants in small containers.	50 lbs
Osmocote 12-7-18 Bloom (5-6 M)	3018150	Mini prill formula for Greenhouse plants in small containers.	50 lbs
Osmocote Classic 14-14-14 (3-4 M)	3017950	The standard for greenhouse and perennials.	50 lbs
Osmocote Pro 19-5-8 (8-9 M)	3018450	Economical 8-9 month formulation for nursery stock.	50 lbs
Osmocote Pro 22-3-8 (5-6 M)	3018460	Economical 5-6 month formulation for nursery stock.	50 lbs
Osmocote Classic 18-6-12 (8-9 m)	3018050	For nursery container production.	50 lbs
Osmocote 18-5-9 Miniprill	3018250	For propagation and small plugs	50 lbs
Osmocote Micromax	3017940	Potting micronutrients designed to maximize growth.	50 lbs
SLOW RELEASE - TOPDRESS FORMULAS			
Osmocote Classic 19-6-9 Fusion (5-6 m)	3018560	With tackifier. The "No Spill Prill Topdress".	
Scotts 17-3-6 (4-6 m)	3018600	Topdress formula for container nursery stock	50 lbs

* A 'Type' or 'T' number means that at a constant soil temperature of 25°C, a T-XXX will release 80% of its nitrogen over a period of about XXX days.

Field Nursery Fertilizer

Product	Code	Description	Size
Richgrow 12-12-12 90% UFLEX & UMAXX	7127583	Balanced nutrition including magnesium and micronutrients.	25 kg
Richgrow 18-7-10 90% UMAXX	7127673	Highly controlled slow release N.	25 kg
Richgrow 21-7-10 60% MU-80	7127703	Premium Methylene Urea-N 80. A step above conventional fertilizers.	25 kg
Richgrow 32-4-8 45% UFLEX	7128543	High nitrogen, controlled release formula.	25 kg

Looking for certified organic crop inputs?

Under the BioFert brand, TerraLink's offers a full range of crop nutrition products that are suitable for certified organic crops. Our BioFert manufacturing facility in Chilliwack produces a full range of liquid and granular fertilizers and amendments that are subject to the same stringent quality control processes than our conventional TerraLink products. TerraLink also carries a wide range of certified organic crop protection products. For more information, please request a copy of our Organic Product Listing, or visit our organic website at www.biofert.ca.

Fertilizer Additives

Product	Code	Description	Size
pHortress 0-21-24	3005700	A nutrient complex best suited to crops grown under cool and wet conditions. Slightly acidic and easily absorbed.	10 L
Stella Maris Liquid Sea Kelp	3001910	<i>Ascophyllum nodosum</i> kelp contains a range of naturally occurring plant nutrients and trace elements essential to plant growth and health.	10 L
On-Gard 5-0-0	3001150	Increases stress tolerance, enhances nutrient uptake and overall absorption	9.46 L
Silamol	3007020	Contains concentrated stabilized silicic acid, applied through irrigation or as a foliar spray	1 L

Sunshine Mixes

Product	Code	Description	Size
# 1 Mix LC Mix All Purpose	3236220	Contains Canadian Sphagnum peat moss, perlite, major and minor nutrients, gypsum, limestone and wetting agents.	3.8 cu.ft.
# 2 Mix	3236260	Same as # 1 Mix, but without addition of nutrients.	3.8 cu.ft.
# 3 Mix Germinating Mix	3236320	Germination mix for less frequent watering. Protects seedlings and plugs. Contains a long-lasting wetting agent.	3.8 cu.ft.
# 4 Mix Aggregate	3236370	Recommended where high air capacity and fast drainage are needed, during winter months, or where frequent leaching is required.	3.8 cu.ft.
# 5 Mix Germination with Perlite	3236420	Promotes better root development.	3.8 cu.ft.

Other mixes available, please inquire.

Potting Amendments

Product	Code	Description	Size
Dolomite Coarse	7800450	Long term dolomitic limestone.	20 kg
Dolomite Fine	7800490	Quick acting dolomitic limestone.	20 kg
Gypsum Regular Prill	7801200	Ca, S amendment, regular prill.	50 lbs
Triple Super Phosphate 0-45-0	7111503	High analysis phosphate.	25 kg
Perlite Coarse	3225500	Coarse, propagation grade	4 cu.ft.
Perlite Medium	3225700	Medium, soil mix grade	4 cu.ft.
Perlite Fine	3225900	Fine, plug grade	4 cu.ft.
Vermiculite Coarse	3227010	Coarse grade	4 cu.ft.
Vermiculite Medium	3227000	Medium grade	4 cu.ft.

Cultilene (Stonewool)

Product	Description	Size
Plugs, Lettuce	Square, tapered for greenhouse lettuce & leafy greens. 15x15mm seed hole	35x35x40mm
Plugs, Vegetable	Round, for starting greenhouse vegetables. with 14x7mm seed hole	22x26mm
Blocks, Single Plant	Various transplant hole depths and diameters available. In cases or on pallets	100x100x65mm
Blocks, Double Plant	Various transplant hole depths and diameters available. In cases or on pallets	100x150x65mm
Slabs	Various length, width, and heights available. Can be made with or without pre-cut plant holes	various

Custom options available - please call your sales rep for more information or to place an order

Rooting Hormones

Product	Code	Description	Size
ROOTING HORMONES			
Stimroot # 1	1205400	Rooting hormone (powder) for softwood.	500 g
Stimroot # 2	1205500	Rooting hormone (powder) for semi-hardwood.	500 g
Stimroot # 3	1205600	Rooting hormone (powder) for hardwood.	500 g
Stimroot 2500	1205640	Rooting hormone (liquid) for softwood.	1 L
Stimroot 5000	1205660	Rooting hormone (liquid) for semi-hardwood.	1 L
Stimroot 10000	1205650	Rooting hormone (liquid) for hardwood.	1 L

Highlighted products offer a “softer” approach than conventional crop inputs. Products marked with two asterisks (**) are organic.

Coir / Coco Fiber

Product	Code	Description	Size
RichGROW Coco Block	3229050	Coco block, washed, 100% fine peat	Skid of 240 x 5 kg
	3229040	Coco block, washed, 60% chip / 40% peat	Skid of 220 x 5 kg
	3229170	Coco block, washed, 100% chips	Individual, 5 kg
Riococo 300	3233201	Washed, 3 plants, 3 drains, 3 drip holes, plant holes 10 x 10 cm	Skid of 730, 100 x 15 x 8 cm
	3233207	Washed, 2 plants, 3 drains, 2 drip holes, plant holes 10 x 10 cm	Skid of 1140, 80 x 12 x 8 cm
	varies	Coco control made to order, different types, sizes and formations	Please enquire.

Slabs and bricks can be ordered as either superwashed, or washed, in combinations of textures comprised of a range of fine through to coarse chips, produced from different components of the coconut husk and fibrous coir. Please call for more information or to place your order.

Plant Growth Regulators

Product	Code	Description	Size
A-rest	1002000	Reduces internode elongation	4 L
B-Nine	1002900	Safe and reliable plant growth regulator	500 g
	1002910		10 kg
Bonzi	1004250	Readily absorbed by plant roots and stems, long lasting	2 L
Cycocel Extra	1006010	Enhances aesthetics of plant by creating more compact growth	10 L
Florel	1101480	Increases lateral branching	1 L
Sumagic	1206200	For a variety of plants.	4 L
Promalin	1200430	Decreases yellowing and necrosis of lower leaves	500 mL

Other PGRs available on request.

Herbicides

Product	Code	Description	Size
Amitrol 240	1001820	Pre-plant foliar applied, non-selective herbicide.	10 L
Casoron 4G	1005201	Field application. Early spring pre-emergent weed control.	22.7 kg
Credit Xtreme	1005945	Non-selective, non residual glyphosate herbicide.	10 L
Gallery 75 DF	1102450	Selective, pre-emergent herbicide.	454 g
Specticle G	1204890	Granular, selective, pre-emergent herbicide.	20 kg
Sureguard	1206470	Pre-emergent herbicide for field use, soil applied.	2.27 kg

Greenhouse Cleanup Products

Product	Code	Description	Size
Advance 12A Bleach	3580650	Disinfectant and sanitizer.	200 L
Biosentry 904	3588060	Disinfectant with a wide virucidal, bactericidal and fungicidal activity.	18.9 L
Hyperox	1103130	Peracetic acid and hydrogen peroxide	20 L
Kleengrow	3588120	For Greenhouse use as a sanitizer	18.9 L
Polydex Algaecide	1111660	A copper based product that controls algae in ponds, dugouts and lagoons	20 L
Sanidate 5.0	3425140	Disinfectant with hydrogen peroxide, peroxyacetic acid (OMRI)	18.9 L
Strip-it Pro Glass Cleaner	3588130	Blend of Acids, Surfactants and wetting agent	18.9L
Virkon Greenhouse	3855080	Environmentally safe disinfectant and detergent.	10 kg
Zerotol 2.0	1211470	Hydrogen Peroxide 27%	9.46 L

Rodenticides

Product	Code	Description	Size
Groundforce	1200839	Multi-feed anticoagulant that controls a wide range of rodents.	10 kg
Hombre All Weather Blocks	1200890	Can be used to control Norway rats, roof rats and house mice.	5 kg
Terminator	1200960	Rat/mouse bait pellets in individual place packs for indoor applications.	168 g
Ramik Brown	1200985	For the control of mice in orchards, tree farms and nurseries.	20 kg
Ratak All Weather Blocks	1200995	Used to control Norway rats, roof rats and house mice.	800 g

Miscellaneous Items

Item No.	Description	Qty/Carton (Pieces)	Qty/Pallet (Pieces)	Pallets/ Container
CUCUMBER / TOMATO SUPPORT				
P0000450	Tomato Truss Arch, accordion (flexible)	12,000	27 boxes	n/a
P0000380	Tomato Vine Clip, 22 mm	5,000	27 boxes	n/a
P0000430	Tomato Vine Clip, 24mm	4,500	27 boxes	n/a
3522150	Pepper/Tomato Vine Clip, 15 mm	9,000	30 boxes	n/a
P0000440	J-Hook (Tomatoes) - Special Order Item -	12,000	n/a	n/a
Various	Prewound tomato and cucumber hooks Hook length: 18 or 22 cm; Twine length reserve: As requested Twine length drop: As requested Twine weight: 1000 m/kg, 1,200 m/kg, 1500 m/kg, or jute. Twine colour: As requested Note: This is a tailor-made item, therefore please order a minimum of 4 months prior to required date.			
VEGETABLE PACKAGING SUPPLIES				
Various	TOV Foam Box Lines: White and grey available			
Various	Tray Liner (Box Liner) Tomato and fruit. Liners available for 5 and 15 lbs boxes with multiple counts available.			
	Sugarcane Bagasse Tray, 200 x 140 x 14 mm

Greenhouse Vegetable Seed

We sell Rijk Zwaan seeds for greenhouse tomatoes, peppers, cucumbers, eggplant, lettuce and beans. Multiple varieties and types available. Contact us to order your seeds or rootstock.

Biological Controls

TerraLink Horticulture offers a wide variety of biological pest controls. We purchase biological control agents produced by some of the largest, most respected and innovative insectaries world-wide.

Our Featured Partners

BioBee

BioBee Biological Systems is one of the leading international companies in the field of biologically based Integrated Pest Management, Natural Pollination, and Medfly Control. BioBee is the world's leading producer of *Phytoseiulus persimilis*, the most effective natural predator of *Tetranychus urticae* (two-spotted spider mite).

e-nema

Since its foundation, e-nema GmbH has its headquarters northern Germany. Today, e-nema GmbH is an successful company with a variety of different bioreactors with a capacity ranging from 3 to 60,000 litres at its laboratory and production facilities. Their OMRI-listed nematodes provide effective control of pest species including cranberry girdler, European chafer beetle, black vine weevil, fungus gnats, and many more.

Why Use Biological Controls?

Use of chemical insecticides kills those insects that are susceptible, but over time those that survive have less competition, reproduce, and following generations are made up of more chemical-tolerant individuals. This is why chemical control of pests such as thrips and whitefly has become increasingly difficult. Additionally, chemical insecticides can negatively impact populations of native insect predators and pollinators.

Unlike chemical pest controls, which usually work within hours or a few days, biological control takes a bit more planning and timing as it consists of living organisms. It can take 2 – 4 weeks for the biological controls to become established. But once the natural and insectary-reared insects become established in the infested area(s), nothing more is required other than a weekly inspection of the infested areas to assess the biological / pest populations. The occasional supplemental release should be considered to enhance the biocontrol population.

Introducing and establishing populations of biocontrol agents early helps prevent the pest populations from establishing in the crop, which in turn limits the scope of their damage to the crop. Don't wait to react to the problem once the damage is done - act proactively and produce more premium products without worrying about residues, re-entry intervals, or pre-harvest intervals.

Specific advantages TerraLink offers:

- Preventative schedules can be built for each crop
- Control options that won't interfere with native predators or pollinators
- Direct shipping on selected products
- Supportive options for predators and pollinators:
 - ◊ Artemia for *A. swirskii*, *N. cucumeris*, *Orius* – can be used to support predators and produce "Biocontrol ready" propagation plants
 - ◊ Crop Boost increases the number and foraging time of bees working in the crop
- Monitoring and trap options that can be tailored to attract target pests
- Options that prey upon the pests directly, or lure the pests to alternative locations where they are trapped

Please find all current biological controls offered by TerraLink in our updated **Biological Controls Product Guide**. (Online at www.tlhort.com>Publications>Catalogues, or request a printed copy.)
