Nebraska Highlights

Energy costs are a considerable part of any business’ operational budget. These costs can vary greatly between states, but in Nebraska (the only state in the nation where all electric utilities are publicly owned) electric costs are passed to consumers at low, cost-of-service rates. As a result, industrial rates are well below the national average. Nebraska’s electric utilities can offer low rates, in part, because they draw from an efficient “mix” of generation resources including coal, natural gas, oil, diesel, and methane, along with carbon-free “fuels”, like nuclear, wind, hydro, and solar power.

NPPD has an Economic Development Rate (EDR) for customers with qualifying projects of new or additional electric load. To be eligible for the lower, incentivized EDR, a customer must:
• be served by an NPPD wholesale customer or NPPD’s Retail Division,
• add new or additional electric load of at least one megawatt,
• have a minimum monthly load factor of 60 percent,
• have a written agreement with the State of Nebraska or any political subdivision to provide an economic development project pursuant to state or local law, and
• have a written service agreement with NPPD.

Electricity

The City of Hickman is provided electric service by Norris Public Power District (Norris PPD), a wholesale power customer of Nebraska Public Power District (NPPD).

The City of Hickman delivers electrical service to the residents and businesses in the community. Norris PPD provides power to the City of Hickman from a distribution system that is connected to Norris’s subtransmission system at 34.5 kV from the 77–47 Hickman Substation. The Norris PPD 34.5 kV subtransmission system is looped and connected to NPPD’s statewide transmission system. The primary subtransmission service is from the Sheldon 115/34.5 kV substation with contingency service from the Firth 115/34.5 kV substation to allow redundant service.

Prospective customers should contact the City Administration Office at (402) 792-2212.
