As a World & National champion competitive shooter, my firearms are my most valuable assets. I needed to keep them secure in a safe I could trust. That’s why I called Pendleton Safes, and they built me a custom luxury safe for my most prized possessions. I put my guns and my trust in Pendleton Safes!

PROUDLY MADE IN THE U.S.A.

REFINED FOR ANY ROOM
Every Pendleton safe can be custom built with any of the colors listed on page four. We also match any reproducible color in high-gloss finishes. Our high-gloss finish is a five day process that consists of a base and clear coat PPG automobile show car finish that is wet sanded and buffed with 1000 to 3000 grit sandpaper for a mirror reflection.

CUSTOM BUILT FOR YOUR COLLECTION

MAKE IT A PAIR

A PERFECT MATCH
Take your existing Knight Series safe and make it a matched pair. Whether you want to add to your firearms collection, store jewelry and valuables, or do a little of both – a matched pair safe is the perfect complement to your existing Pendleton or management solution for your extensive collection. Opposing doors open from the center, so they never touch. You’ll enjoy full access to both units – putting your entire collection at your fingertips.

TRADITIONAL
The traditional configuration is a perfect choice for most collections due to its ability to store over 90 handguns and 40 long guns. You can choose any combination of handgun or valuables storage shelving to customize it to your individual needs.

TAC-75
The TAC-75 has proven to be an excellent tactical firearm storage solution. With fully adjustable shelving, customize your TAC-75 safe interior to hold a vast array of tactical firearms, including .50 BMGs, SBRs and traditional rifles.

HANDGUN MANAGEMENT
Do you have an extensive and varied handgun collection? Pendleton can configure your safe to comfortably hold up to 300 handguns. We can also swap out handgun shelves with storage shelves for your important valuables.

COLLECTOR’S CONFIGURATION
Pendleton’s combination shaft option allows for incredible storage versatility. Customize specifically for your collection. See page 20 for more details.
UNDER THE HOOD

It’s what’s inside a Pendleton Safe that places it among the finest in the industry when it comes to theft prevention and security. The following features operate behind the scenes to help fortify your valuables in the event of an attempted break-in.

STRICTER TOLERANCES / PRECISION-ENGINEERED

Pendleton doesn’t cut corners. We use leading-edge techniques to design and manufacture purpose-built parts and components from raw materials. This costly process ensures the tightest tolerances, smallest door gaps, and highest, most consistent level of quality in each and every safe. The competition simply doesn’t stack up.

SPECIALLY DESIGNED BALL-BEARING HARD PLATE

Pendleton’s specially designed hard-plate prevents drilling out of the lock and protects the relocking mechanism from tampering.

SOLID 1/4” STEEL TOP AND BOTTOM

Burglars will often turn a safe upside down, exposing a vulnerable area on the bottom of a safe. All Pendleton Safe tops and bottoms are manufactured with solid high-strength, low-alloy steel.

CAM SYSTEM PREVENTS BOLT TAMPERING

All bolts operate on an innovative cam system that prevents tampering. If pushed on, these bolts push back, making it impossible to retract the bolts by force.

3/4” REINFORCED DOOR FRAME

The entire door frame of each Pendleton Safe is reinforced with structural steel angle to defend against pry bar attacks. You can rest assured that your valuables are protected by a Pendleton. No one else offers security on our level.

ADJUSTABLE HINGES FOR PRECISE FIT

Hinges are adjustable up, down, left and right for the most precise door fit available.

PERSONALIZED NAME PLATES

Pendleton offers personalized, laser-cut, metal name plates.

MACHINED FAIL-SAFE DOOR HANDLES

Pendleton’s handles utilize a fail-safe system to prevent forced entry. A pressure-sensitve mechanism causes the handle to shear off if a break in is attempted preventing further tampering.

EMP-RESISTANT PREMIUM S&G LOCKS

A world leader with 150 years of experience in locking systems for safes and vaults, Sargent and Greenleaf locks meet strict national and international security standards.

REVOLVING INTERNAL STORAGE SHELF

A revolving external shelf for storing calls, ammo and other gear. Control the rotation easily with the press of a button!

100% FULLY-WELDED SEAMS

Whereas some safe manufacturers use chain welding, Pendleton King Series Safes feature fully-welded and smooth seams for the highest level of security.

EXCLUSIVE REINFORCED STRIKER BARS

Where the competition’s round bolts simply rest behind the face of the door frame, Pendleton’s exclusive plate bolts enter into a reinforced steel striker system for superior break-in resistance. Combined with the tightest tolerances and laser-cut door gaps, these safes are virtually impossible to pry open.

PLATE-BOLT DESIGN 5X THE PROTECTION

Pendleton’s fully adjustable hinges are made to manufacture to the highest security specifications, exceeding the most rigorous and demanding tests for traditional precision door fit, available for unparalleled pry-bar resistance.

ADJUSTABLE HINGES FOR PRECISE FIT

Pendleton’s fully-adjustable hinges are manufactured to the highest security specifications, exceeding the most demanding tests for traditional precision door fit, available for unparalleled pry-bar resistance.

OFFICIAL UL LISTED SECURITY STATUS

Underwriters Laboratories is a global independent safety science company with more than a century of expertise in testing consumer and commercial products for safety and effectiveness.

INDICATOR LED LIGHTS

A red LED light (available on any safe with an electronic lock) alerts you when your safe has been left ajar, while the green LED lets you know moisture control features are functioning.

PRECISION LASER-CUT DOOR GAPS

All Pendleton door gaps are laser cut to precise tolerances, making Pendleton safes nearly impervious to traditional pry-bar attacks. This exclusive security feature is only available from Pendleton.

SOLID HIGH-STRENGTH LOW-ALLOY STEEL EXTERIOR

Pendleton Safes are exterior to interior solid high-strength, low-alloy steel in either 3/8” or 1/4” thickness.

PLATE-BOLT DESIGN 5X THE PROTECTION

Pendleton’s fully adjustable hinges are manufactured to the highest security specifications, exceeding the most demanding tests for traditional precision door fit, available for unparalleled pry-bar resistance.

SEE INSTANT FEEDBACK WITH REVOLVING STEEL TARGETS

HEAVY DUTY LINE
The all-steel construction of the HD line features AR500 plates on both the impact and shield surfaces. Our fully-revolving, auto-resetting targets are built to handle constant punishment. This line is ideal for commercial ranges or shooters with a dedicated space for permanent targets. Elevate your experience with rugged HD steel targets that spin when hit. These reactive targets provide the instant feedback you (or your spotter) have been looking for.

PORTABLE LINE
Our portable line enjoys all the high-end features of the HD line but can be moved with less effort so your range can be quickly modified for a new experience. Designed for a single individual to transport with ease. These high-quality targets are simply engineered to be lighter — they easily rotate when hit to offer the reactive feedback you need.
