

HRC Fertility Clinic

NEWPORT BEACH, CALIFORNIA

This state-of-the-art fertility clinic provides advanced reproductive technology and In Vitro Fertilization (IVF) services to its patients. Located on parts of the first and second floor at the Hoag Health Center in Newport Beach, California the HRC facility is known for using advanced reproductive technology and providing excellent fertility treatments for patients. The fertility clinic includes two operating rooms, four recovery beds, an andrology lab, a collection area and transfer rooms. The showpiece of the facility is a centrally located IVF lab highlighted by specialty lighting, surrounded by vision glass with views into the lab.

The first floor is a modern and technology-oriented surgery center composed of the IVF lab and surgery clinic. The IVF lab was designed to diagnose and provide treatment to patients for a wide variety of fertility-related issues. The surgery center and clinic were designed for the comfortable and efficient treatment and recovery of patients during their fertility procedures. On the second floor, a patient-centered medical office was developed for exam and office space, where patients can meet with their doctors for consultations and check-ups.
