A microscopic view of various bacteria, including rod-shaped and spherical forms, set against a dark green background with a radial light effect. The bacteria are rendered in shades of green and yellow, creating a sense of depth and movement.

# **INVASION OF PAIN**

*The Unsuspected Real Cause of Chronic Pain  
and How You Can Get the  
FDA Unapproved 7-minute Pain Cure*

## The Secret War

Inside your body, right now, there's a battle raging.

This war waged between your body and numerous tiny invaders carries on non-stop 24 hours a day, 7 days a week.

Most of the time we remain blissfully unaware of the fight. Until a weakened immune system or an overwhelming number of invaders turns the battle against us.

Yet every single one of these invaders has a secret weakness. In just 7 minutes you can exploit this weakness to defeat them, reclaim your health, and end even years of chronic pain.

## Chronic Pain is NOT “Normal”

Twist your ankle, break a bone, or get stung by a bee... it's going to hurt. Your body heals and the pain goes away. That's normal.

What shouldn't be normal is chronic pain. Chronic pain like arthritis... fibromyalgia... persistent headaches and migraines... the list goes on.

The difference is the cause.

Pain is our body's signal that there's something wrong.

When we experience some kind of physical trauma like a twisted ankle, the pain helps us immediately recognize the need to protect the injured area from further injury until it heals.

But chronic pain is a signal that our body's defenses are overwhelmed. Healing is not occurring, or not occurring fast enough to resolve the problem.

And thanks to recent research, we now know virtually every chronic pain-causing condition is supported by, if not directly attributable to, foreign invaders in our body: whether bacteria, viruses, fungal infections or even full-size parasites.

And we now know how to beat them all.

**“We have only two problems: parasites and pollutants.”**

- Dr. Hulda Clark

## The Common Link

Every major condition known to mankind has a common thread. A common enemy associated with each and every condition that, once removed, allows the body to heal. And chronic pain to finally end.

That's what naturopathic doctor Hulda Clark discovered after testing thousands of individuals with a wide variety of conditions using an electronic diagnostic tool.

Those with cancer... every person... were found with the human intestinal parasitic flatworm called fluke *in their liver*.

Every person she tested with diabetes... had the pancreatic fluke of cattle found in their own pancreas.

Each person she found with asthma... tested positive for the intestinal roundworm *Ascaris in their lungs*.

Even the common cold had a common thread... every sick patient had at least one mycotoxin, a poisonous metabolite produced by mold.

After years of research and testing, Dr. Clark made a startling pronouncement:

“We have only two problems: parasites and pollutants. Parasites are things that live on us, using up our food and giving us their wastes. Pollutants are toxic things in us making it difficult for our organs to do their work. These two things are responsible for all our other problems.”

Step one for relieving pain and restoring health became obvious. Kill the harmful pain-causing parasites, bacteria, viruses and fungi taking up residence inside our bodies.

Even Dr. Clark was surprised at how easy it is to do just that.

A common hookworm

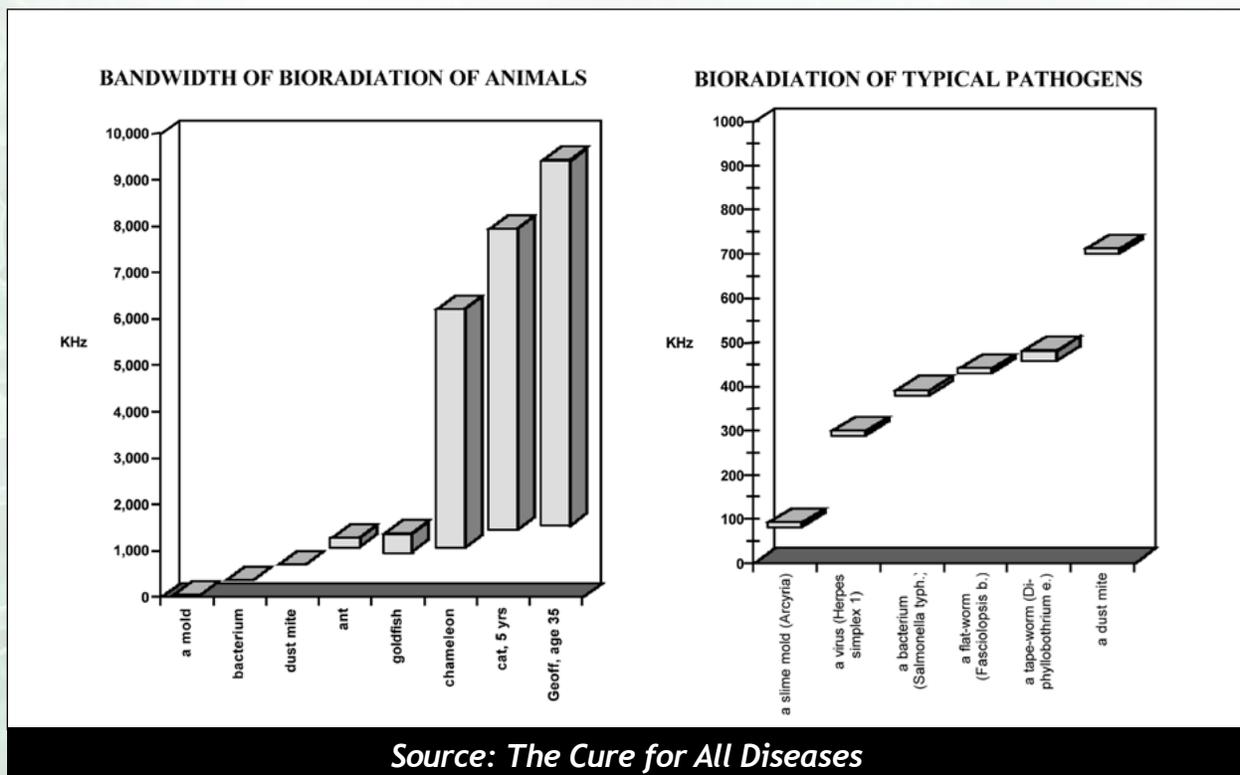

An adult *Ascaris lumbricoides* worm

## Identifying the Culprit

In the late 1980s, Dr. Clark discovered and perfected a technique for identifying pathogens and other substances electronically. Instead of relying upon invasive blood tests or unreliable stool tests, her method tests for the presence or absence of virtually any organism or substance in moments using radio electronic principles.

Extensive experimentation proved every organism broadcasts a unique electrical signature in the form of a characteristic band of radio frequencies. Dr. Clark termed this “bioradiation.”

Primitive organisms like molds and bacteria broadcast at lower frequencies within a narrow bandwidth while more advanced animals and humans broadcast in a much wider range of higher frequencies. Dr. Clark would go on to document the precise frequencies emitted by hundreds of pathogens.

Although the non-invasive, measurable and verifiable instant identification of pathogens present in the body was exciting, Dr. Clark’s breakthrough happened when she decided to test what would happen if she held onto a frequency generator generating the resonant frequency of a specific pathogen.

In her case, she knew she had the Salmonella bacteria present in her system at the time and chronically carried both Giardia and Herpes.

***After just three minutes of treatment at these resonant frequencies, none of the pathogens were detectable and her Herpes lesion had stopped tingling.***

Just like a talented singer can shatter a wineglass by hitting its resonant frequency, by focusing the resonant frequency of a pathogen back onto itself, the built-up tension weakens or completely destroys the pathogen.

In 1993, Dr. Clark enlisted the help of her adult son, Geoff, to program a computer controlled frequency generator to produce all the frequencies from 290,000Hz to 470,000Hz to kill all the parasites, bacteria, and viruses she had documented up to that point. At three minutes per 1,000Hz increment, it would take her device about 10 hours to “zap” all the 1,000Hz segments indicated for known potential pathogens.

As Dr. Clark continued to catalog more pathogens, the range needing to be “zapped” continued to expand. A year later it would take 26 hours to cover the entire range of documented pathogens.

While 26 hours of treatment would be great if it cured all diseases, there was a glitch. While symptoms usually improved speedily, they rarely completely disappeared and often returned. Dr. Clark discovered the solution to this problem by accident.

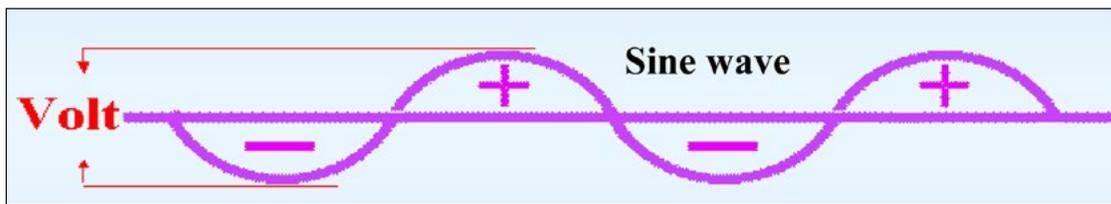

## **Accidental Pathogen Mass Electrocution**

Dr. Clark decided in 1994 to build a hand held, battery operated frequency generator to kill the intestinal fluke at the 434,000Hz frequency. Her goal was to create a low-cost device usable by anyone to purge themselves of this widespread parasite.

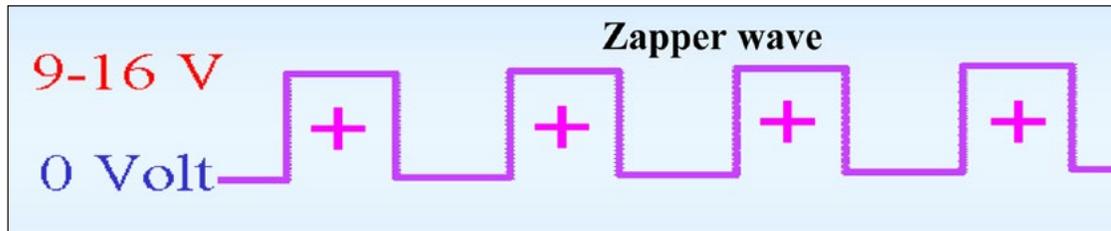

Amazingly though, the battery operated device not only killed the targeted pathogen - it also killed off three other pathogens at very different frequencies, something that had never happened before.

The difference, they discovered, was in the form of electricity used.

Prior to this point, Dr. Clark had always used a frequency generator with AC, or alternating current, which produced a sine wave that alternated between negative and positive polarity. But the DC, or direct current, from the standard battery alternated between positive and zero voltage in a square wave - on and off, but never negative.

*AC current produced a sine wave with both positive and negative polarities*

*DC current produced an on and off square wave, either off or positive, but never negative*

It turns out this positive offset (DC) frequency kills off ALL exposed bacteria, viruses and parasites simultaneously provided enough time (up to 7 minutes), voltage (5 to 10 volts), and frequency (anywhere from 10Hz to 500,000Hz).

Suddenly, Dr. Clark was holding in her hand a device that could wipe out the pathogens responsible for virtually every illness under the sun within 7 minutes. And since the voltage required was so low and frequencies used so far below the human body's biofrequency range, there was virtually no risk involved to the patient!

And there's an amazing side benefit to this form of positive "zapping" - it supercharges your body's cells and immune system so that it can fight off invaders more easily.

A healthy human cell typically has about a 70mV positive charge. But cells under attack have their positive charge suppressed.

When your body attempts to heal an area of injury or disease, prostaglandins are rushed to the area creating pain and inflammation. Cells with lower energy amplify these levels of pain and inflammation - and increase the likelihood you'll remain "stuck" in chronic pain.

Cancerous cells can have as little as 15mV or less potential left... but the positive charge from DC square wave "zapping" rejuvenates them with positive energy flow. Which is also a big reason you don't want to use AC power for "zapping" as the negative current each cycle can draw energy away from your cells.

Some believe bacteria has a negative charge, which might explain some of the success from "zapping" due to the positive charge device's frequency attracting the negatively charged bacteria away from its electro-magnetic adhesion to your body's cells.

## How Big of a Problem Is This, Really?

We all hear about new antibiotic-resistant strains of bacteria and virulent viruses like bird flu and swine flu in the news all the time. These are safely wiped out with Dr. Clark's device.

However, you're much more likely to face major pain and health issues from common sources of contamination you haven't considered... like extremely toxic mold and bacteria in your home and on your food.

According to toxicology expert Dr. Jack Thrasher from the UCLA School of Medicine, these molds and bacteria are all around us and constantly mutating into new, more virulent forms.

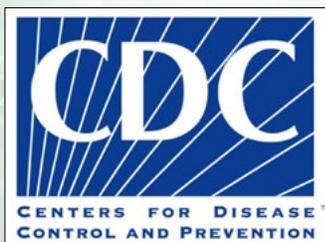

Toxic mold has become pandemic, with one in four homes and nearly half of all American schools now affected. As little as 60% humidity encourages growth of these hidden killers, particularly in newer wallboard and the underside of carpeting.

Some of the toxins created by these molds actually suppress our immune system, making them harder for our bodies to fight off and leaving us suffering or even dying from exposure.

Growing right alongside these molds are extremely dangerous bacteria. But these molds and bacteria are still easily killed by selective electrocution from zapping.

Living in a modern western nation doesn't make us immune to larger parasites, either.

According to the CDC, infection by intestinal parasites is a large - and growing - problem. An examination of 216,275 stool specimens collected by state diagnostic laboratories around the United States in just one year found over 20% were infected with parasites.

That means 1 in every 5 individuals who were tested had parasites that were found. Which brings up a bigger problem.

Parasites are notoriously difficult to find in the first place. Multiple samples and repeated examinations are often necessary to find a parasite infection using traditional methods.

Since parasites by nature are designed to live in the host without killing it or getting expelled, a parasitic infection isn't always obvious. For many western doctors, running a parasite test simply wouldn't cross their mind. Which means actual infection rates are probably much higher.

But parasites are everywhere. Dr. Clark frequently found *Ascaris* infections (common cat and dog roundworm) in families with pets for example. These parasites are just at home in your heart as your pet's heart. She also found many parasites live comfortably in non-common organs when your body is polluted with environmental toxins such as solvents and heavy metals.

## Kill Fortified Pathogens In One Hour

While Dr. Clark's device kills exposed viruses and bacteria within 3 minutes, parasites like roundworms, flukes and tapeworms within 5 minutes, and even mites within 7 minutes, an interesting phenomenon occurs...

A single 7-minute treatment kills off all pathogens previously detectable by bioradiation, but 10-20 minutes later more pathogens become detectable again. Sometimes the organisms noted are different than the ones just killed.

In fact, a common side effect occurred when Dr. Clark's new patients were "zapped" just once - they often came down with a cold or other mild illness from "leftover" pathogens. She speculated that deceased parasites released bacteria and viruses they had been infected with, while killed bacteria released viruses that had infected them.

The solution was simple - wait about 20 minutes after "zapping," then "zap" again. Repeat this a third time and you kill virtually all harmful organisms within reach of the device's generated frequencies.

This entire process of three 7-minute "zapping" sessions separated by 20 minute breaks takes just an hour. You could be sitting there enjoying a book or watching TV while all this goes on as the best devices following Dr. Clark's protocol handle the 7 minutes on, 20 minutes off cycle for you automatically.

Another option is to simply let the device "zap" pathogens constantly for an hour or more. It's like constantly mowing down those enemy pathogens with a machine gun as they pop out.

In fact, that approach is recommended for those trying to beat a chronic disease or pain condition. The only real limitation is potential skin sensitivity to wearing the electrodes during "zapping" for extended periods - but even those can be placed on different areas of your body to minimize sensitivity from prolonged use.

## Near Instant Pain Relief

But there's another, more effective method of "zapping" when you're targeting a specific known disease or chronic pain condition.

Since Dr. Clark has identified the exact organisms associated with numerous disease and pain conditions, you can target and destroy every one of those specific pathogens with their own resonance frequencies. Again, the best devices handle this for you automatically.

Select one of the nine preloaded programs, attach the device's electrodes to your hands, wrists, or feet, and relax. The device does the rest, killing off pathogens identified by Dr. Clark which either created the condition or are likely supporting a continued chronic pain condition. Relief is often felt in minutes.

## Directly Target Your Type of Pain

Have some form of nerve-based pain such as sciatica, spinal stenosis, or herniated disc related pain? Try a program that kills off *Streptococcus*, *Staphylococcus*, *Shigella*, *Salmonella*, *Escherichia coli*, and *Clostridium* for relief.

Joint pain like arthritis, gout, or degenerative disc disease acting up again? Try a program that fights off the pockets of bacteria collecting in your joints and their hosts such as *Ascaris megalocephalus*, *Ascaris lumbric*, *Trichinella*, Hookworm, *Strongyloides*, *Streptococcus*, *Staphylococcus*, *Coxsackie Viruses*, *Bacteroides fragilis*, and *Clostridium*.

How about soft tissue pain? Fibromyalgia is usually a sign of bacteria transported throughout the body by infected parasite carriers. Whether you suffer from long-term fibromyalgia, or are simply trying to recover from everyday strains, sprains, or pulled muscles, you might get fast relief with a program which knocks out these pathogens: *Trichinella*, *Ascaris*, Hookworm, *Strongyloides*, *Streptococcus*, *Staphylococcus*, *Clostridium*, *Campylobacter*, *Echinostoma revolutum*, *Echinoparyphium recurvatum*, and *Gastrothylax elongatus*.

Among the numerous conditions "zapping" has been proven helpful at treating, these have specific pathogens identified by Dr. Clark that can be easily targeted individually:

---

## Conditions Helped By “Zapping”

Allergies	Vision Issues / Macular Degeneration
Asthma	Lyme Disease
High Blood Pressure	Sciatica
Chronic Fatigue	Spinal Stenosis Pain
Diabetes	Herniated Disc Pain
Epilepsy/Seizures	Trigger Point Pain
Fibromyalgia	Gout
Cancer	Degenerative Disc Disease
The Flu/The Common Cold	Bladder Trouble / Cystitis
Skin Problems	Hormonal Imbalance
Herpes	Infertility
Heart Problems	Tinnitus
HIV/AIDS	Earache/Otitis/Menièrè
Headaches and Migraines	Gastric Ulcer
High Cholesterol	Cysts
Liver Problems	Menopausal Dysfunction
Multiple Sclerosis	Sore Throat
Kidney Problems	Bronchitis/Chronic Cough
Prostate Trouble	Meningitis
Tumors	Pneumonia
Alzheimer’s Disease	ALS / Lou Gehrig’s Disease
Osteoarthritis	STD (sexually transmissible diseases)
Rheumatoid Arthritis	Tropical Diseases
Depression	Oncoviruses
Colitis/Irritable Bowel Syndrome	Acne
Crohn’s Disease	Hepatitis B
Parkinson’s Disease	Tapeworms
Sinusitis	Tropical Dysentery
Endometriosis	

---

By combining general “zapping” sessions with condition-specific targeting of related pathogens, we can often get fast relief from pain and other symptoms. Even if your condition doesn’t appear on the list above, general “zapping” may still have a directly beneficial effect.

## Why Haven't You Heard About This Before?

You might be asking why, if this technology works so well, you've never heard of it before.

Great question. The truth is, Dr. Clark wasn't the first to discover the benefits of bioelectric resonance.

Over half a century before Dr. Clark came on the scene, a distinguished scientist named Royal Raymond Rife had already created the world's first microscope capable of seeing live viruses, a feat modern electron microscopes, which kill everything under them, cannot duplicate.

Royal Rife soon realized the technology used to see these live organisms, exposing them to frequencies that resonated with their own biofrequency wavelength, could also destroy them merely by increasing the intensity of the resonance. Nothing was ever harmed other than the specific targeted organism since every type of molecule has a unique resonating frequency.

In 1931, Royal Rife was hailed a hero by numerous medical experts and scientists at a banquet in his honor billed as "The End to All Diseases." This could have been an accurate statement as by 1934 testing of his technology showed a **100% success rate at curing terminal cancer patients.**

Yet by the end of the decade virtually every attendee claimed to have never met him and numerous obstacles were raised to stop him in his tracks, such as frivolous lawsuits raised against manufacturers of his research instruments until they went bankrupt from legal fees. And doctors who sought to support Royal Rife's work were threatened with loss of license.

**100% of terminal cancer patients cured!**

Why? We may never know exactly, but perhaps because a universal cure for disease would result in the loss of tremendous income for the already large and growing pharmaceutical industry of the day.

**DENIED**

Some things never change, either. Today, the device Dr. Clark built decades ago still cannot be marketed as a medical device in the United States. In fact, established facts about the device that constitute medical claims cannot be made when selling the device. The FDA has mandated it must first undergo testing which would cost literally millions of dollars.

In the meanwhile, the exact same device is already classified in Europe, where “alternative” medicine so far continues to be more tolerated than in the United States, as a Class IIA medical device.

So if you’re looking for an FDA-approved device to end chronic pain and stop disease-causing organisms in their tracks, don’t hold your breath. On the other hand, the FDA still allows the device to be used “for research purposes only, not to treat illness.” I’m sure you can read between the lines.

But there’s one more thing you need to know.

## Stop Fighting the Same Old Battle Against Pain

*Dr. Clark's book helps you stay healthy and pain free*

Since the parasites, bacteria, fungi, and viruses you can “zap” with Dr. Clark’s device contribute to the painful conditions you may be experiencing right now, you might be tempted to think that’s all you have to do. “Zap” them and be done with it.

And you’d be right... if you want to continue fighting the same battle over and over again.

Because while you can always “zap” away the pathogens, as long as you continue the behavior that invites infection and providing the acidic, solvent-filled and heavy metal-contaminated environment attractive to those pathogens, you’ll likely continue to see re-infection.

And instead of lasting relief you’ll be back to square one.

Or, you can make some simple changes to clean up your insides and enjoy a healthier, pain-free life.

We could write an entire book on how to do that, but we don’t have to. Dr. Clark already did when she wrote *The Cure for All Diseases*.

Inside her book, Dr. Clark details exactly how her device works. She also goes into much

more detail about the environmental toxins that make us susceptible to disease and pain-causing pathogens we are trying to “zap” away.

And, very importantly, she details how to flush out pathogens that are tightly tucked away in areas less vulnerable to the “zapping” frequencies so you can eliminate all of them.

We highly encourage you to get her book, read it, then put it into practice.

The ElectroCleanse™, together with the life-changing information in The Cure for All Diseases, will allow you to immediately start “zapping” and permanently eliminate the parasites, bacteria, viruses and other toxins taking up residence in your body today.

It’s an exciting new world where common sense beats toxic drugs, and where the promise of literally curing all diseases is finally within reach. Welcome.
