

Index TM

This is an index to the first 28 volumes of the *Thesaurus Masdevalliarum/A Treasure of Masdevallia*, with a cross reference to the current names. It incorporates Dr. Luer's corrigenda from the series, as well as corrections and changes from *Icones Pleurothallidinarum* volumes 19,21,22,23, and 25. The current genera are from *Icones Pleurothallidinarum* volume 28. In the pages that follow, this index is sorted in three different ways: by TM name, by TM volume, and by current name.

This is not a complete cross reference for what used to be the genus *Masdevallia*; it only contains those species included in the TM series. It is not a source for a complete synonymy; it only offers the name as originally published by Dr. Luer in TM, updated according to IP volumes 19,21,22,23,25 and 28. If a plant was relabeled by Dr. Luer as a correction in TM, or was misspelled, the original label is provided in a footnote, and the corrected name is present in the table. If the name change is from one of the volumes of IP mentioned above, the change is reflected in the current genus and species columns.

Thanks to Chad Sarles for his careful proofreading of this index. Any errors that remain are mine. Please forward any corrections to Lisa Thorerle at lthorerle@alumni.uchicago.edu. Above all, please don't send errors to Dr. Luer. This is an UNofficial, UNSupported work provided by an amateur frustrated by her inability to find the information in TM easily. May it be as useful to you as it is to me.

Index TM: by TM Name
