There are many obstacles available such as tall buildings and low buildings. And you need to pass through all the obstacles, otherwise you will repeat from the starting or starting line. This game has a size of 91 mb, and the size of a potato phone can also play. In addition, this game does not have obb files like other big games. And the advantage of the absence of obb files is that the game is light and memory will not be overused. Even if the size of the game grows as you play. If you ask the characters in this vector art mod apk game, then the characters available by the name of this game are a vector where the characters are only black but still human. Do not get me wrong, although the characters are quite simple, but the movements and backgrounds of this game are very complex. So that this game is as vivid as it is alive. Uniquely, this game is not available in play stores or other app stores. We don't know exactly why. You can definitely download this game through our site. And the game available is the mod version is not the original version. Of course, the two versions are different because the mod version has many modification processes. As we told you, this game has a movement that is similar to extreme sports, and that is parkour sports. Character movements also seem smooth or smooth, so the movements that are made are very interesting and this contributes to the fun of playing the game. Vector Game Features What are the features available in this vectormod mod apk game app? You need to know what the features are in this game. So you can play the game more easily. Features are also no less important than the gameplay, as both can run in harmony. Perhaps the features in this vector game are not as sophisticated as other games, because this game is an offline game. So this game does not have a reporting system and online features of course. Check out the game's feature discussion below. It has arcade mode hits game vectormod apk android plus 1 has arcade games mode that hits facebook. Of course, this is not a mode that is taken online, but a game that is hist on Facebook has a mode in this game. Read also: Asphalt 9 ModDan you can definitely try offline without having to use an internet connection to access facebook of course. Are you interested in this mode? If you are interested and want to try hit arcade mode on Facebook you can download and install this vector game on your phone. Just visit the link above, which we inserted in the download button, which is below the table of information about the game. Visit our site to download and get the game easily. Smooth animation If you have downloaded this unlimited cash apk vectormod, you will never regret it. Since this game has smooth animated moves, so the game feels more real with the moves available. Of course, this feature is very important in the game, because the smoother the animation, the better the quality of the game. And this vector game managed to give you this feature perfectly. Although the available characters are less interesting, such as only human shadows. But it was smooth animated movement and movements that were made as real. 20 Challenges In this vector happy mod game game in addition to being arcade mode, which is a hit on Facebook, this game also has other challenges. This challenge has as many levels up to 20 levels that you have to pass. Each level will be more difficult from the terrain you want to take, and of course you need to be more agile in controlling the movements of the characters you play. So that the figure can get through all the existing mtangan well. You can train in the first stage, so you can get through the next stage easily. And no less important you need to understand the movement and control that must be done in the game to pass different types of obstacles. Easy to operate This game has easy operation, with one hand control you can play. Maybe for some people too simple, but if you remember the moves and rintanga in this game then you will understand. In addition to using one hand or even one finger, you can also race against the time and movement of the figure. Because your character will automatically run, and just pass through obstacles. Adroid Pro phone specifications needed to play this vector game you only need a device with the following specifications: Make sure your phone has 1gb of RAM, because otherwise gam ean feels heavy and the chances of crashes will be greater. You can use a bigger ram, better. Secondly, you can set the quad-core class of the processor or above to produce good graphics. And the processor can be easier to control everything. Thirdly, you will need android os 4.0 or jelly bean version is enough. Finally, you can set 150 MB of free memory on your phone to store data.
