# MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) provides an explanation of the financial position, operating results, performance and outlook of Mainstreet Equity Corp. ("Mainstreet" or "Corporation") as at and for the years ended September 30, 2011 and 2010. The results from the fiscal year 2011 are directly comparable with those from the fiscal year 2010. This discussion should not be considered all-inclusive, as it excludes changes that may occur in general economic and political conditions. Additionally, other events may occur that could affect the Corporation in the future. This MD&A should be read in conjunction with the Corporation's audited financial statements and accompanying notes for the years ended September 30, 2011 and 2010, and the MD&A for the year ended September 30, 2011. The financial statements have been prepared in accordance with Canadian Generally Accepted Accounting Principles. This MD&A has been reviewed and approved by the Audit Committee and Board of Directors of the Corporation and is effective as of December 8, 2011. All amounts are expressed in Canadian dollars. Additional information regarding the Corporation is available under the Corporation's profile at SEDAR (www.sedar.com).

## **Forward-looking information**

Certain statements contained herein constitute "forward-looking statements" as such term is used in applicable Canadian securities laws. These statements relate to analysis and other information based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. In particular, statements concerning estimates related to future acquisitions, reduction of vacancy rate, future profitability, timing of refinancing of debt, increased cash flow, the Corporation's liquidity and financial capacity, the Corporation's funding sources to meet various obligations, and other factors and events described in this document should be viewed as forward-looking statements to the extent that they involve estimates thereof. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions of future events or performance (often, but not always, using such words or phrases as "expects" or "does not expect," "is expected," "anticipates" or "does not anticipate," "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and should be viewed as forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Corporation to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks and other factors include, among others, costs and timing of the development of existing properties, availability of capital to fund stabilization programs, other issues associated with the real estate industry including, but without limitation, fluctuations in vacancy rates, unoccupied units during renovations, fluctuations in utility and energy costs, credit risks of tenants, fluctuations in interest rates and availability of capital, and other such business risks as discussed herein. Although the Corporation has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, other factors may cause actions, events or results to be different than anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could vary or differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements contained herein.

Forward-looking statements are based on management's beliefs, estimates and opinions on the date the statements are made, and the Corporation undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions should change except as required by applicable securities laws.

Management closely monitors factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements and will update those forward-looking statements where appropriate in its quarterly financial reports.

### **BUSINESS OVERVIEW**

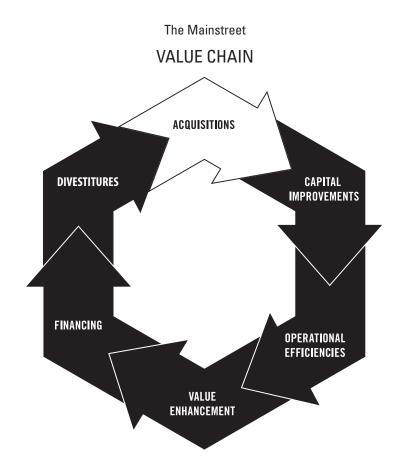

Based in Calgary, Alberta, Mainstreet is a Canadian real estate corporation focused on the acquisition, redevelopment, repositioning and management of mid-market rental apartment buildings in five major Canadian markets: Vancouver/Lower Mainland, Calgary, Edmonton, Saskatoon and the Greater Toronto Area.

Mainstreet is listed on the Toronto Stock Exchange (TSX) under the symbol "MEQ".

### **BUSINESS STRATEGY**

Mainstreet's goal is to become Canada's leading provider of affordable mid-sized, mid-market rental accommodations – typically properties with fewer than 100 units. In pursuit of this goal, the Corporation adheres to its six-step "Value Chain" business model:

- Acquisitions: Identify and purchase underperforming rental units at prices well below replacement costs.
- Capital improvements: Increase the asset value of Mainstreet's portfolio by renovating acquired properties.
- Operational efficiencies: Minimize operating costs through professional management, efficient technology and energy-saving equipment.
- Value enhancement: Reposition renovated properties in the market as Mainstreet branded products for higher rents, and build and sustain customer loyalty through high levels of service.
- Financing: Maintain a sound capital structure with access to low-cost, long-term Canada Mortgage and Housing Corporation ("CMHC") insured mortgage loans.
- Divestitures: Occasionally sell mature real estate properties to redirect capital into newer, higher potential properties.

## **ACQUISITION AND GROWTH**

Following a strict set of criteria, Mainstreet identifies and acquires underperforming rental properties that offer the potential to enhance the Corporation's asset value and its long-term revenues through increased rental rates. In 2011, Mainstreet purchased 943 apartment units in Abbotsford Calgary, Edmonton, Saskatoon and Surrey for \$76.7 million – an average purchase price of \$81,000 per unit. It also purchased one office building (Mainstreet Head Office) in Calgary for \$3.8 million. Since Mainstreet's previous financial year-end (September 30, 2010), the Corporation has grown its portfolio of properties by 15%. Mainstreet's portfolio now includes 7,362 residential units, which include townhouses, gardenstyle apartments and concrete mid-rise and high-rise apartments. One of these properties (22 units in Calgary) is being held for resale.

As of September 30, 2011, 89% of these residential units were rented, while 7% were being renovated and the remainder left vacant because of current market conditions.

Since 1997, the Corporation's portfolio has increased from 10 to 151 buildings (including one office building), while the appraised market value of the properties within this portfolio has grown from approximately \$17 million to \$911 million as of September 30, 2011.

The following table sets forth the growth of the Corporation by region since the end of the previous financial year, September 30, 2010.

## APPRAISAL REPORT

The market value of Mainstreet's properties as of September 30, 2011, was determined by the following qualified appraisers:

Location	Name of Appraisers	Qualification	Firm
Vancouver/Lower Mainland (Abbotsford & Surrey)	James Glen	AACI	Colliers International
Calgary & Edmonton	Tyler Fedun, Rayan Miller and Andrew Macleod	AACI	Colliers International
Saskatoon	Tom Hewitt	AACI	Colliers International
Greater Toronto Area	Carey Poon	AACI	Altus Group Ltd.

Mainstreet's total portfolio is valued at \$911 million. The table below is the breakdown of market value by city:

	Number of units	N	larket value (\$ million)	rage value per unit (\$)	Average value capitalization rate

Office building (Calgary – Head Office )		\$	5		

<sup>1.</sup> Market value of units on September 30, 2011, was determined by independent qualified real estate appraisers. The direct capitalization method was used to convert an estimate of a single year's income expectancy into an indication of value in one direct step by dividing the income estimate by an appropriate capitalization rate. The actual selling value of these properties may be substantially different and depends on market conditions at the time of sale.

# **CAPITAL IMPROVEMENTS**

Mainstreet's "Value Chain" business philosophy focuses on creating value in its capital assets by renovating newly acquired properties and enhancing operating efficiencies. Every property and rental unit is upgraded to meet Mainstreet's branded standard, which creates an attractive product while reducing operating costs and enhancing long-term asset value. Capital investment also includes expenses incurred on turnover units.

In 2011, the Corporation spent \$11.4 on property improvements – specifically for exterior upgrades such as new roofs, new siding and insulation and for interior upgrades such as new flooring and paint, new appliances and energy-efficiency measures. To address the balance of non-renovated units in the current portfolio, Mainstreet plans to spend an estimated \$12.0 million on renovations for 2012, of which approximately \$8.0 million is budgeted for stabilization of unstabilized properties. These improvements are expected to be financed through existing cash balances, funds from operations and ongoing refinancing of existing properties. Mainstreet expects to complete most of these renovations within the next six to 24 months. Revenue and income are expected to increase over time as more units are renovated and reintroduced to the market at higher rental rates.

Uncertainties affecting future revenue and income include the rate of turnover of existing tenants, availability of renovation workers, and increases in labour and material costs, all of which will have material impacts on the timing and cost of completing renovations.

# **Financing**

Debt financing after property stabilization and maturity of initial loans is a cornerstone of Mainstreet's business strategy. It unlocks the value added through stabilization and liberates capital for future growth. It also mitigates the risk of anticipated interest rate hikes and minimizes the costs of borrowing. Mainstreet continually refinances as much floating and maturing debt as possible into long-term, primarily CMHC-insured mortgages at lower interest rates.

In 2011, Mainstreet refinanced \$47.3 million matured mortgages and financed 4 stabilized properties for \$97.8 million mostly in long-term (10-year), CMHC-insured mortgages at an average interest rate of 4.14%.

Subsequent to fiscal year 2011, Mainstreet has refinanced \$5.9 million of matured debt into long-term (5-10 year) mortgages for \$16.2 million at an interest rate of 2.85%. This refinancing raised an additional fund of \$10.3 million.

# **Vacancy rates**

Mainstreet reduced its overall average vacancy rate to 11.3% in 2011 from 14.1% in 2010. As of December 1, 2011, the average vacancy rate dropped to 8.1%. Excluding 136 un-rentable units currently undergoing complete re-development, the average vacancy rate in 2011 was 6.5%.

- 1. Funds from operations ("FFO") are calculated as net earnings before depreciation of real estate properties and future income taxes. FFO is a widely accepted supplemental measure of a Canadian real estate company's performance but is not a recognized measure under Canadian Generally Accepted Accounting Principles ("GAAP"). The GAAP measurement most directly comparable to FFO is net income (for which reconciliation is provided below). FFO should not be construed as an alternative to net income or cash flow from operating activities, determined in accordance with GAAP, as an indicator of Mainstreet's performance. Readers are cautioned that FFO may differ from similar calculations used by other comparable entities.
- 2. Net operating income ("NOI") is rental revenue minus property operating expenses. It does not include financing costs, general and administrative expenses, or depreciation and amortization expenses. While Mainstreet uses NOI to measure its operational performance, it is not a recognized measure under GAAP. The GAAP measure most directly comparable to NOI is net income. NOI should not be construed as an alternative to net income determined in accordance with GAAP. Readers are cautioned that NOI may differ from similar calculations used by other comparable entities. A reconciliation of net income to net operating income for the period is as follows:

3. EBITDA is earnings before interest, financing cost, taxes, depreciation and amortization and is used by Mainstreet to measure financial performance. EBITDA is not, however, a recognized measure under GAAP. Management believes EBITDA is a useful supplemental measure to net earnings, providing investors with an indicator of cash available for distribution, future growth and capital expenditure prior to debt service, depreciation and income taxes. The GAAP measure most directly comparable to EBITDA is net income. EBITDA should not be construed as an alternative to net income determined in accordance with GAAP. Readers are cautioned that EBITDA may differ from similar calculations used by other comparable entities. A reconciliation of net income to EBITDA for the period is as follows:

### **FUNDS FROM OPERATIONS**

Management believes that FFO, as defined in the preceding footnote, is a key measure of a real estate company's performance. Mainstreet generates FFO from three sources: rental revenue from revenue-producing properties, sale of properties acquired for resale purposes and the periodic sale of revenue-producing properties. Mainstreet generally reinvests the proceeds from the latter into properties with greater potential for long-term returns.

In 2011, Mainstreet's FFO increased to \$10.9 million – up 41 % from \$7.7 million in 2010 – as a result of increased rental revenues and a decline in the average vacancy rate.

FFO excluding financing cost increased by 47% to \$13.6 million in 2011 as compared to \$9.3 million in 2010. The increase reflects an increase in net rental revenue as a result of growth in Mainstreet's portfolio (to 7,362 units in 2011 from 6,419 units in 2010 – a 15% increase) and an improvement in vacancy rate (to 11.3% in 2011 from 14.1% in 2010).

The expected effects of the Corporation's rapid growth and the costs associated with stabilizing recently acquired properties continue to adversely affect Mainstreet's financial performance. Stabilization involves renovating and improving the operating efficiencies of acquired properties and repositioning them in the marketplace for higher rents and improved asset value. Most properties that Mainstreet acquires need substantial exterior and interior renovations, and as of September 30, 2011 23% of Mainstreet's total portfolio remained unstabilized.

During the stabilization process, the Corporation's financial performance is adversely affected by higher vacancy rates and lower rental revenue, as well as by higher operational costs such as bad debts, utility expenses for vacant suites and marketing expenses. The Corporation expects financial performance to improve when these higher than average operating expenses are offset by additional rental revenues as more units become stabilized.

Other factors that adversely affect Mainstreet's financial performance include:

- Higher interest rates on the short-term conventional financing required for properties undergoing stabilization. The current average interest rate for 10-year, CMHC-insured mortgages is about 3.4%. The longer it takes to stabilize a property, the longer Mainstreet pays higher interest rates for interim financing.
- Higher salary expenses due to our efforts to strengthen the Corporation's human resources, particularly at the senior management level. These expenses are an investment in the Corporation's future, allowing it to achieve greater operational efficiencies and equipping it for long-term growth.
- The costs of refinancing floating conventional debt to lower interest, long-term mortgage loans.

Mainstreet reported a net loss of \$3.0 million (\$0.29 per basic share) in 2011, compared with a net loss of \$3.9 million (\$0.37 per share) in 2010. The losses in 2011 and 2010 included financing costs of \$2.7 million and \$1.5 million respectively.

## **REVENUES**

Rental revenue increased by 21% (to \$64.2 million in 2011 from \$53.1 million in 2010) due mainly to growth in the Corporation's portfolio and a decrease in the average vacancy rate.

Gain on insurance represents the excess of insurance paid out for flood damages over the net book value of the related assets.

Rental revenues from "same assets" properties (properties owned during the twelve month periods ending September 30, 2011 and 2010) increased by 9% to \$55.6 million in 2011 from \$51.1 million in 2010 – a result of an increase in rental rate and a decrease in vacancy rate to 11.3% in 2011 from 14.1% in 2010.

In 2011, rental revenues from newly acquired properties were \$8.6 million – a substantial increase of 333% over 2010. This increase is a product of Mainstreet's acquisition of 1,423 units since October 1, 2009.

## RENTAL RATES INFORMATION

The following table set forth a comparison of the current in place rental rates with the market rental rates of Mainstreet's portfolio as of September 30, 2011.

Overall, operating costs increased 18% to \$23.4 million in 2011 compared to \$19.9 million in 2010, due mainly to growth in the Corporation's portfolio of properties. Operating costs for "same assets" increased by 4% as compared with last fiscal year mainly due to increased utility and maintenance expenses.

# RENTAL OPERATIONS BY PROVINCE

Mainstreet manages and tracks the performance of rental properties in each of its geographic markets.

## **British Columbia**

Mainstreet continues to expand its British Columbia operations. The average number of rental units has grown 18% to 1,952 units in 2011 compared to 1,649 units in 2010. As a result, rental revenue increased by 25% to \$16.6 million in 2011 compared to \$13.2 million in 2010. Rental revenue per unit increased to \$708 per month in 2011 from \$672 per month in 2010, while the vacancy rate decreased to 9.6% in 2011 from 10.8% in the same period last year.

The operating cost per unit increased by 3% from \$243 in 2010 to \$250 in 2011. As a net result, the operating margin in 2011 increased to 65% from 64% in 2010.

# **Alberta**

Rental revenue increased by 24% to \$33.2 million in 2011 from \$26.8 million in 2010, due mainly to a substantial increase in the Corporation's Alberta portfolio to an average of 3,647 units in 2011 from 3,144 units in 2010. Furthermore, the vacancy rate dropped to 12.5% in 2011 from 15.9% in 2010. Operating costs per unit per month increased only slightly by 2% to \$265 in 2011 from \$259 in 2010. As a net result, the operating margin increased to 675% in 2011 as compared to 64% in 2010.

## Saskatchewan

The Corporation's Saskatchewan portfolio grew slightly in 2011. The average number of units in 2011 was 821 – a 3% increase over 797 units in 2010. Rental revenue increased 8% to \$7.1 million in 2011 from \$6.6 million in 2010. Operating expenses increased 14% to \$2.1 million in 2011 from \$1.8 million in 2010 – primarily the result of increased maintenance expenses during the fiscal year. The vacancy rate increased slightly to 14.7% in 2010 from 13.2% in 2010, due mainly to the fact that several newly acquired properties which were completely vacant in anticipation of their redevelopment. As a result, the overall operating margin decreased slightly to 70% in 2011 compared to 72% in 2010.

## **Ontario**

Mainstreet's Ontario operations continue to improve. Rental revenue increased by 13% to \$7.3 million in 2011 from \$6.5 million in 2010, largely because the vacancy rate during the same periods decreased to 5.1% from 14.6% in last year. Operating costs per unit per month increased to \$487 from \$442 in 2010 due mainly to increased utility and maintenance expenses. The overall operating margin increased to 47% in 2011 from 45% in 2010.

Financing charges	\$ 2,704	\$ 1,530	77%

<sup>1.</sup> Mortgage interest for properties acquired after the financial year ended September 30, 2009

Mainstreet's "same assets" mortgage interest increased by 6% to \$18.0 million in 2011 as compared to \$17.0 million in 2010, mainly as a result of refinancing matured debts and floating debts following the stabilization of properties.

During fiscal year ended September 30, 2011, Mainstreet refinanced \$47.3 million matured mortgages and financed four stabilized properties for \$97.8 million mostly in long-term (10-year), CMHC-insured mortgages at an average interest rate of 4.14%. The total cost of financing was \$2.47 million in 2011 compared to \$1.5 million in 2010. Although this had an adverse impact on income and funds from operations in 2011, the long-term benefits to the Corporation's growth and profitability are expected to be significant.

- During Q4 2011, Mainstreet acquired one new residential apartment building (32 units) at an average cost of \$112,000 per unit.
- In Q4 2011, rental income increased to \$16.9 million from \$16.4 million in Q3 2011 and \$14.3 million in Q4 2010, due mainly to the acquisition of more rental units and decrease in vacancy rate.
- In Q4 2011, the average vacancy rate for the quarter was 10.7% compared to 11.3% in Q4 2010 and 11.3% in Q3 2011.
- In Q4 2011, the Corporation incurred total financing costs of \$402,000 in Q4 2011 as compared to \$563,000 in Q3 2011 and \$325,000 in Q4 2010.

## SAME ASSETS PROPERTIES

"Same assets" properties are properties owned by the Corporation for the twelve- month periods ended September 30, 2011 and 2010. As of September 30, 2011, 127 properties (5,939 units) out of Mainstreet's 151 properties (7,362 units) constituted same assets properties.

### (000s of dollars)

	2011	2010	% change
Same assets – rental revenues	\$ 55,640	\$ 51,131	9%
Same assets – operating costs	\$ 19,962	\$ 19,104	4%
Same assets – net operating income	\$ 35,678	\$ 32,027	11 %
Operating margin	64%	63%	

Rental revenues from same assets properties increased by 9% to \$55.6 million in 2011 from \$51.1 million in 2010 – a result of a substantial reduction in vacancy rate to 9.4% versus 15.7% in the same quarter last year.

Operating costs for same assets properties increased by 4% mainly due to increased utility and maintenance expenses. As a net result, the operating margin in 2011 increased to 64% from 63% in 2010.

## STABILIZED PROPERTIES

Properties acquired over three years ago in Ontario and British Columbia and over two years ago in Alberta and Saskatchewan are classified as stabilized properties, except for those properties acquired for resale and complete redevelopment purposes. As of September 30, 2011, 123 properties (5,700 units) out of 151 properties (7,362 units) were stabilized. As previously noted, Mainstreet's performance during the stabilization process is adversely affected by lower rental revenue, higher vacancy rates and higher operating expenses. Management believes that a more appropriate measure of performance for the Corporation is FFO of stabilized properties.

# FUNDS FROM OPERATIONS OF STABILIZED PROPERTIES

For 2011, FFO of Mainstreet's stabilized property portfolio before and after financing cost amounted to \$11.6 million (\$1.11 per basic share and \$1.05 per fully diluted share) and \$10.8 million (\$1.04 per basic share and \$0.98 per fully diluted share) respectively.

## LIQUIDITY & CAPITAL RESOURCES

## **Working capital requirement**

Mainstreet requires sufficient working capital to cover day-to-day operating and mortgage expenses as well as income tax payments. In the fiscal year ended September 30, 2011, after payments of all required expenses, the Corporation generated funds from operations of \$11 million. The Corporation has an operating line of credit of \$15 million from which \$4 million has been drawn. The Corporation expects that funds generated from operations and the existing operating line of credit will be sufficient to meet its working capital requirements in 2011.

Management expects that funds generated from operations will continue to grow when more units are renovated and re-introduced to the market at higher rental rates and that these funds should be sufficient to meet the Corporation's working capital requirements on a year-to-year basis going forward.

# Other capital requirements

Mainstreet also needs sufficient capital to finance continued growth and capital improvement. As of September 30, 2011, the Corporation had an acquisition line of credit in an amount of \$15 million, from which \$1.5 million has been drawn. In addition to approximately \$13.5 million still available on this acquisition line of credit, Mainstreet expects to raise approximately \$34 million in the fiscal year 2012 by refinancing existing mortgages on maturity to long-term, mostly CMHC-insured mortgages. The Corporation's policy for capital risk management is to maintain a debt-to-market-value ratio of 70%. The current ratio is approximately 52%, which leaves considerable room for raising additional funds from refinancing.

As of September 30, 2011, the Corporation owned the following 20 clear title properties with appraised value of approximately \$73 million:

If required, Mainstreet believes it could easily raise additional capital funds through mortgage financing at competitive rates under which these clear title properties would be pledged as collateral. Management believes these resources will be sufficient to meet other ongoing capital requirements in the near and medium terms.

### **CONTRACTUAL OBLIGATIONS**

As of September 30, 2011, the Corporation had the following contractual obligations, which are anticipated to be met using the existing line of credit, funds from operations and proceeds from the refinancing of maturing and floating mortgage loans.

### PAYMENTS DUE BY PERIOD

(000s of dollars)

	Total	2012	2013	2014	2015	2016	Subsequent
Mortgages payable	477,530	40,350	60,063	82,630	49,341	52,430	192,716

### LONG-TERM DEBT

(000s of dollars)

	Amount	% of debt	Average interest rate (%)
Fixed rate debt			
- CMHC-insured	387,377	81%	4.53%
- non-CMHC-insured	69,903	15%	4.65%
Total fixed rate debt	457,280	96%	4.55%
Floating rate debt			
- non-CMHC-insured	20,250	4%	4.57%
	477,530	100%	4.55%

Mainstreet's long-term debt consists primarily of low-rate, fixed-term mortgage financing. All individual mortgages are secured with their respective real estate assets. Based largely on the market value of properties, management believes this financing reflects the strength of its property portfolio. The maturity dates for this debt are staggered to mitigate overall interest rate risk.

As of September 30, 2011, mortgages payable were \$478 million compared to \$401 million on September 30, 2010 – an increase of 19% due to additional mortgages assumed and raised for acquisitions and refinancing during the twelvementh period ended September 30, 2011.

At September 30, 2011, management believed the Corporation's financial position to be stable, with overall mortgage levels reported at 103% of depreciated book value and 57% of the estimated market value of properties. About 81% of the Corporation's mortgage portfolio was CMHC-insured, providing Mainstreet with interest rates lower than those available through conventional financing.

To maintain cost-effectiveness and flexibility of capital, Mainstreet continually monitors short-term and long-term interest rates. When doing so is expected to provide a benefit, the Corporation intends to convert short-term floating-rate debt to long-term, CMHC-insured fixed-rate debt.

## MORTGAGE MATURITY SCHEDULE

(000s of dollars)

Maturing during the 12 month period ending December 31	Balance maturing	% of debt maturing	Weighted average rate on expiry (%)
2012	\$ 32,028	7%	4.70%
2013	\$ 51,965	11 %	4.38%
2014	\$ 79,419	17%	3.98%
2015	\$ 46,058	10%	4.60%
2016	\$ 52,927	11 %	4.71%
Subsequent	\$ 215,133	45%	4.73%
	\$ 477,530	100%	4.55%

Approximately 7% of Mainstreet's mortgage loans will mature within the next 12 months due mainly to the acquisition of undervalued properties, all of which require renovation. Upon acquisition, these properties are financed through short-term, floating-rate loans. When the properties are stabilized, Mainstreet seeks to refinance these short-term loans under long-term, CMHC-insured mortgages.

### INTERNAL CONTROL

The Corporation's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") have designed an internal control framework to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The control framework used to design the Corporation's Internal Control over Financial Reporting (ICFR) is Risk Management and Governance – Guidance on Control, published by the Canadian Institute of Chartered Accountants. The CEO and CFO have concluded that the design and operation of the Corporation's disclosure controls and procedures were not effective as of September 30, 2011 due to the deficiencies noted in the following paragraph.

The Corporation identified internal control deficiencies that are not atypical for a Corporation of this size including lack of segregation of duties due to a limited number of employees dealing with accounting and financial matters. However, management believes that at this time, the potential benefits of adding employees to clearly segregate duties do not justify the costs associated with such increase. The risk of material misstatement is mitigated by the direct involvement of senior management in the day-to-day operations of the Corporation and review of the financial statements and disclosures by senior management, the members of Audit Committee and the Board of Directors. These mitigating procedures are not considered sufficient to reduce the likelihood that a material misstatement would not be prevented or detected. There were no changes during the fiscal year of 2011 to material weaknesses in internal controls over financial reporting.

## FINANCIAL INSTRUMENTS & RISK MANAGEMENT

## Fair Value of Financial Assets & Liabilities

The Corporation's financial assets and liabilities comprise restricted cash, cash and cash equivalents, accounts receivable, other receivables and deposits, mortgages, accounts payable, and refundable security deposits. Fair values of financial assets and liabilities, summarized information related to risk management positions, and discussion of risks associated with financial assets and liabilities are presented as follows.

The fair values of restricted cash, cash and cash equivalents, accounts receivable, other receivables and deposits, accounts payable, and refundable security deposits approximate their carrying amounts due to the short-term maturity of those instruments.

The fair values of mortgages are determined using the current market interest rates as discount rates, the net present value of principal balances and future cash flows over the terms of the mortgages.

- Level 1: Values based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.
- Level 2: Values based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability.
- Level 3: Values based on valuation techniques for which any significant input is not based on observable market data.

The fair values of financial assets and liabilities were as follows:

		Septem	ber 3	0, 2011	September 3			30, 2010	
	Fair Value Hierarchy Level	Carrying amount		Fair value		Carrying amount		Fair value

## RISK ASSOCIATED WITH FINANCIAL ASSETS & LIABILITIES

The Corporation is exposed to risks arising from its financial assets and liabilities. These include market risk related to interest rates, credit risk and liquidity risk. For detailed explanations of these risks, refer to the section entitled "Risk Assessment and Management" on page 19.

The Corporation obtained approval from the TSX to continue the repurchase of its common shares under a Normal Course Issuer Bid that commenced in October 2010. As of September 30, 2011, a total of 1,334 common shares had been repurchased at an average price of \$11.33 per common share.

A summary of the Corporation's stock option plan as of September 30, 2011, and September 30, 2010, and changes during the years ended on those dates are presented below:

	Septen	nber 30, 2011	September 30, 2010

Outstanding and exercisable, end of period	1,168,700	8.11	1,193,700	\$	8.05		

During financial year 2009, the Corporation granted options to its directors and officers to purchase 925,000 (2008 – Nil) common shares at the market price of \$5.51 per common share at the date of the grant. The stock options expire on March 10, 2019 and are fully vested at the time of issue. The fair value of the options was determined at the date of the grant using the Black-Scholes Model. The assumptions used in determining the fair value of the stock options included risk-free interest rate of 2.29%; expected life of the stock options of 10 years; expected volatility rate of 51%; and expected dividend rate of 0%. The fair value amounting to \$3,370,000 is recognized as stock compensation expense in income with a corresponding increase to contributed surplus. As of September 30, 2011, 75,000 of the stock options were exercised.

## CRITICAL ACCOUNTING ESTIMATES

Significant areas that require the use of management estimates include the determination of amortization periods for income properties, the assessment of impairment on real estate properties and the allocation of purchase costs on the acquisition of real estate properties. Actual results may differ from those estimates.

## TRANSACTIONS WITH RELATED PARTIES

- a) The President and Chief Executive Officer receives commissions at commercial rates in his capacity as a licensed broker for the property transactions conducted by the Corporation in its normal course of business. Commissions are determined on an exchange value basis. These commissions are not incurred or paid by the Corporation but rather by the other selling party or parties to the transaction. The commissions received during the year amounted to \$346,000 (2010 \$27,000).
- b) The Corporation paid legal and professional fees and reimbursements amounting to \$307,000 (2010 \$196,000) to a law firm of which a director and officer of the Corporation is a partner. Professional fees and reimbursements are determined on an exchange value basis. As of September 30, 2011 and September 30, 2010, the amounts payable to the law firm were \$5,000 and \$13,600 respectively.
- c) The Corporation has established a plan to assist its directors, officers and employees in purchasing common shares of the Corporation. Total loans \$245,632 as at September 30, 2011 (September 30, 2010 \$567,650) were advanced on October 31, 2005. The loans are determined on an exchange value basis and are interest-free and secured against 100,000 (September 30, 2010 \$192,200) common shares of the Corporation purchased by the participants. The market value of the common shares at September 30, 2011 was \$17.15 per share. The original payment term of the loan was on October 31, 2009. The payment terms have been revised to 20 quarterly payments effective January 1, 2010. As such, the loan amounts have been treated as a reduction of share capital in the financial statements.

## OFF BALANCE SHEET ARRANGEMENTS

No off balance sheet arrangements were made by the Corporation for the three- and nine-month periods ended September 30, 2011.

### **RISK ASSESSMENT & MANAGEMENT**

Management defines risk as the evaluation of the probability that an event that could negatively affect the financial condition or result of the Corporation may happen in the future. The following section describes specific and general risks that could affect the Corporation. As it is difficult to predict whether any risk will occur or what its related consequences might be, the actual effect of any risk on the business of the Corporation could be materially different than anticipated. The following discussion of risk does not include all possible risks as there may be other risks of which management is currently unaware.

### Vacancy risk

The Corporation is subject to tenant vacancy risk when, in some markets and under certain economic conditions, housing/condominiums are affordable, financing is readily available and interest rates are low, making it easier for renters to become homebuyers. This increases vacancy rates and decreases rental revenue cash flow.

Vacancy rates can also be affected negatively by increased supply of condominium units in major market areas.

The Corporation manages this risk by enhancing customer satisfaction, diversifying its portfolio in different geographic markets in Canada, maintaining its focus on affordable mid-market, multi-family accommodation and advertising and offering competitive market pricing to attract new tenants.

### **Financial risk**

The Corporation is subject to the financial risk of having unoccupied units during extended periods of renovations. During renovations, these properties are unavailable for occupancy and do not generate income. Mainstreet addresses this risk by acquiring financing to fund renovations and by carrying out a detailed capital expenditures budget to monitor its cash position on a monthly basis.

## Interest risk

Mainstreet is exposed to interest rate risk to the extent of any upward revision in prime lending rates. Mortgages totalling approximately \$41 million are subject to renewal in the next 12 months. Increases in the interest rate have the potential to adversely affect the profitability of the Corporation. However, the Corporation attempts to mitigate this risk by staggering the maturity dates of its mortgages. The majority of Mainstreet's mortgages are insured by Canada Mortgage and Housing Corporation (CMHC) under the National Housing Association (NHA) mortgage program. This added level of insurance offered to lenders allows the Corporation to receive the best possible financing and interest rates, significantly reducing the possibility of a lender calling a loan prematurely.

### **Utilities risk**

Mainstreet's business is also exposed to fluctuating utility and energy costs such as electricity and natural gas (heating) prices. Currently, utility and energy costs are fairly stable and management is monitoring the market very closely.

#### Credit risk

Credit risk is the risk that the counterparty to a financial asset will default, resulting in a financial loss for the Corporation. The Corporation is exposed to credit risk as some tenants may experience financial difficulty and may default in payment of rent. However, the Corporation attempts to minimize possible risks by conducting in-depth credit assessments of all tenants. The Corporation's tenants are numerous, which also reduces the concentration of credit risk. As tenants' rent is due at the beginning of the month, all amounts in accounts receivable are considered overdue by the Corporation. As of September 30, 2011, the possibility of not receiving payment of rent due from current tenants was covered by security deposits and provisions for bad debts.

In relation to cash, cash equivalents and restricted cash, the Corporation believes that its exposure to credit risk is low. The Corporation places its cash, cash equivalents and restricted cash only with reputable Canadian financial institutions.

## **Liquidity risk**

Liquidity risk is the risk that the Corporation will encounter difficulties in meeting its financial liability obligations. The Corporation manages its liquidity risk through cash and debt management.

The timing of cash outflows relating to financial liabilities are outlined in the table below:

(000s of dollars)

					Beyond	
	1 year	2 years	3 years	4 years	4 years	Total
Mortgages payable	\$ 40,350	\$ 60,063	\$ 82,630	\$ 49,341	\$ 245,146	\$ 477,530
Bank indebtedness	\$ 4,011	\$ _	\$ _	\$ _	\$ _	\$ 4,011
Accounts payable	\$ 4,646	\$ _	\$ _	\$ _	\$ _	\$ 4,646
Refundable security deposits	\$ 2,604	\$ _	\$ _	\$ _	\$ _	\$ 2,604

# Financing risk

Mainstreet anticipates that it will make substantial capital expenditures for the acquisition of properties in the future. There can be no assurance that debt or equity financing or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to Mainstreet. Moreover, future activities may require Mainstreet to alter its capitalization significantly. The inability of Mainstreet to access sufficient capital for its operations could have a material adverse effect on Mainstreet's financial condition, the result of its operations or its overall prospects.

## Reliance on key employees

Mainstreet's success depends in large measure on certain key executive personnel. The loss of the services of such key personnel could have a material adverse effect on the Corporation. Mainstreet does not have key person insurance in effect for management. The contributions of these individuals to the immediate operations are likely to be of central importance. In addition, competition for qualified personnel in the industry is intense, and there can be no assurance that the Corporation will be able to continue to attract and retain all personnel necessary for the development and operation of its business. Investors must rely upon the ability, expertise, judgment, discretion, integrity and good faith of the management of Mainstreet.

#### Income tax risk

Mainstreet intends to file all required income tax returns and believes that it will be in full compliance with the provisions of the Income Tax Act (Canada) and all applicable provincial tax legislation. However, such returns are subject to reassessment by the applicable taxation authority. In the event of a successful reassessment of Mainstreet, whether by re-characterization and development expenditures or otherwise, such reassessment may have an impact on current and future taxes payable.

# **Economic uncertainty**

The continuing worldwide economic slowdown, stock market uncertainty and international credit crisis could adversely impact the business and the future profitability of the Corporation. During the current period of economic uncertainty tenants may experience financial difficulty and may default in payment of rent or possibly look for less expensive accommodations. In addition, Mainstreet's ability to obtain financing or renegotiate line of credit financing may be negatively affected by the international credit crisis. The Corporation can predict neither the impact current economic conditions will have on future financial results nor when the general economy will show meaningful improvement.

## International financial reporting standards

In February 2008, the CICA Accounting Standards Board ("AcSB") confirmed the changeover to International Financial Reporting Standards ("IFRS") from Canadian GAAP will be required for publicly accountable enterprises' interim and annual financial statements effective for fiscal years beginning on or after January 1, 2011. The AcSB issued the "omnibus" exposure draft of IFRS with comments due by July 31, 2008, wherein early adoption by Canadian entities is also permitted. The Canadian Securities Administrators ("CSA") has also used Concept Paper 52-402, which requested feedback on the early adoption of IFRS as well as the continued use of US GAAP by domestic issuers. The eventual changeover to IFRS represents a change due to new accounting standards. The transition from current Canadian GAAP to IFRS is a significant undertaking that may materially affect the Corporation's reported financial position and results of operations. The Corporation will adopt "IFRS" in the financial year ending September 30, 2012.

#### **CHALLENGES**

Mainstreet's growth-oriented model creates certain operational stresses. While the Corporation has come a long way toward developing its unique operating system, in the mid-market add value space, to manage its business in an effective and efficient way, there is still more work to be done. Mainstreet's overall vacancy rates are skewed upward because of the Corporation's acquisition of underperforming assets and the time they need to be stabilized; this creates vacancy during the period of stabilization. As Mainstreet continues to bring down the cycle time it takes to stabilize a property, management is confident that it will further reduce vacancy rates across the portfolio.

Rental market conditions remained very competitive in 2011, and Mainstreet continued to offer substantial rental concessions to attract and retain high-quality tenants during 2011. Concessions have come down from the recessionary high and management believes that they will continue to decline further in 2012, given that CMHC data points toward more favorable market conditions in the near-term.

The churn rate – the turnover of tenants in Mainstreet's properties – also remains higher than it would like it to be. The challenging macro-economic conditions have played a part in this, but it is also an inherent part of the Mainstreet model – as Mainstreet adds new properties and bring them up to standard, there is some natural turnover in the tenants that live in them. This transition from old to new tenants also increases Mainstreet's exposure to bad debts.

The good news is that in a fixed-cost business like Maintreet's, as it meets these operational challenges, the results will flow directly to the bottom line.

### **OUTLOOK**

2011 was the most active year in Mainstreet's history in terms of acquisitions, but already it has some insight that 2012 could be even more active. Subsequent to year-end, Mainstreet acquired 435 units for \$42 million, and refinanced \$5.9 million long-term CMHC-insured mortgages at an average rate of 2.85 per cent. As mentioned previously, the vacancy rate continued to drop subsequent to year-end as well.

Mainstreet is well situated in its core markets, all of which are showing relatively strong growth with the potential for further growth based on the latest independent economic forecasts. Economic forecasts indicate that Western Canada, where 92 per cent of Mainstreet's portfolio is located (with 54 per cent in Alberta) as of today, will continue to be the country's economic "sweet spot". Commodity prices continue to show strength – oil prices are projected to average \$95.75 per barrel in 2013/14 – while billions of dollars in private sector investment continue to flow into Alberta's energy sector. In fact, Alberta leads all Canadian provinces in GDP growth over the last 20 years, with an average GDP growth rate of over 3 per cent.

Demographic trends in Mainstreet's core markets are equally favorable. The Government of Alberta forecasts that in-migration to Alberta will continue to remain positive, and may achieve levels as high as 40,000 persons per year by 2014 if there is another prolonged boom in the energy sector. Net inter-provincial migration meanwhile, could triple from 2010 levels over the next few years. The only other provinces with net positive inter-provincial migration over the past five years have been British Columbia and Saskatchewan, two of Mainstreet's other core markets. Alberta and Saskatchewan also have the most landlord-friendly Tenancy acts in the country, which enables Mainstreet to raise rents as market conditions allow.

Management believes the conditions are in place for continued organic growth. Interest rates remain at 60-year lows, a rare opportunity for a corporation for which interest on its debt is its largest expense. Mainstreet has access to over \$90 million in liquidity in the form of clear title assets worth approximately \$73 million in appraised value as well as cash on hand and a line of credit that can be used to make strategic acquisitions without equity dilution. The macroeconomic environment in our key markets continues to improve, and the long-term trends that have been in place at Mainstreet – rising revenues, FFO, NOI and same-asset NOI – appear set to continue.

Mainstreet has learned the lessons from the last boom and is ready to apply them in the months and years ahead. Like most companies in Alberta the previous labour crunch in 2006-7 hit the Corporation hard, and so Mainstreet has been very proactive in pursuing initiatives that will provide the Corporation with a steady and secure source of foreign workers to supplement our team. Mainstreet is also wary of the possibility of cost inflation, and so Mainstreet is working on securing a supply pipeline from China that will deliver high-quality materials such as cabinets, flooring and other renovation-related expenditures at a lower cost. The absence of any third-party intermediaries in this internalized supply chain will help keep those material costs as low as possible.

Mainstreet is exploring its options for expanding its business to the United States, where there are abundant opportunities to acquire distressed mid-market properties. In-depth research is being conducted in order to ascertain whether Mainstreet can apply its proven value-added business model in the U.S.

Mainstreet is preparing for the adoption of International Financial Reporting Standards (IFRS) for the 2012 fiscal year. The market value of the Corporation's assets will be reported on its balance sheet under IFRS, and as such will more accurately reflect the shareholder value that the Corporation has created and serve as a testament to its business model. As of December 8, 2011, the new appraisal indicates a property value of over \$950 million, which, net of the total mortgage debt of approximately \$505 million, translates into \$42.80 net asset value per share versus a current market price of just over \$20 per share. Consequently, management believes that Mainstreet shares are substantially undervalued.
