

# LAUNDRY ROOM TIPS DUE TO COVID-19

1. Practise Social Distancing. If the number of residents already inside the laundry room does not allow for 6 feet distance between each user, please allow one user to finish his/her laundry and leave the room, before you enter
2. Do not shake dirty laundry. Shaking can increase the likelihood of the virus dispensing through the air.
3. Wash laundry thoroughly
4. Wash and dry clothing using the warmest temperatures recommended on the fabric label.
5. Remove clothes and bedding immediately from machines once the washing and drying process is complete
6. Wipe the machines thoroughly for the next user
7. Leave the laundry room immediately for the next user to enter. For now, we recommend that you fold your laundry in your apartment

Thank you in doing your share in the fight against Covid-19.
