

System MacroView Case and Matter

Release 7.10

Date November 2015

MacroView Case and Matter combines a number of MacroView products with additional Case and Matter specific right-click functions to provide an attractive-to-use, full-function document and email management for any organization or business unit where activity is arranged as Cases or Matters - e.g. Corporate Legal Departments

The following products are included standard with MacroView Case and Matter:

- **MacroView DMF®**
- **MacroView Unique Document Numbering**
- **MacroView Enhanced Document Level Security**
- **Right-click functions for Creating and Archiving Matters**
- **Right-click function to Create New Documents**

MacroView Case and Matter also includes the following optional products (licensed separately):

- **MacroView ClauseBank®**
- **MacroView Predictive Email Filing**
- **MacroView Workshare Compare Integration**
- **MacroView Email Enabled Library Handler**

Important information about this release

MacroView Case and Matter DMF 7.10 requires Microsoft Framework v4.5.2 and .NET Programmability for Microsoft Office. Before installing the MacroView case and Matter 7.10 client you should ensure that these prerequisites are available on the workstation.
