

Do You See Your Card Right In Front Of Your Eyes?

If not, follow the instructions below...

Instructions

First of all, stare very hard, hmm, still don't see it?
I'll bet you do see wavy lines though ...
Virtually everyone does but I'm going to prove that
Everything you see and read is not always what it seems.
Once you understand I am misdirecting you, you'll see!
Fold the paper, using the edge to see the lines are straight.
Cool huh! The lines are actually all straight.
Let's see if you see your card now? Not yet?
Until you do I can't let you go. Try this next step...
By folding the paper again and looking lower down
See that you have now learned how misdirection works.
