## What's Important to Know

With MSC's "new look" [mainstreetchamber.org](http://mainstreetchamber.org) website, small business owners can reach each other by developing the necessary relationships without having to spend millions of dollars on advertisements corporations wholly control and without having to nag their friends for recommendations. Currently, [mainstreetchamber.org](http://mainstreetchamber.org) is working towards providing website ads exclusively to MSC member ads. The ad benefits are comprised of three main slices: 100K ad impressions, local geo-locating, and the graphic design.

An **ad impression** refers to the point in which an ad is viewed once by a visitor, or displayed once on a web page. The number of impressions of a particular advertisement is determined by the number of times the particular page is located and loaded. The ad is connected to keywords and is important to search engine marketing. These impression ads can be priceless as its membership base is constantly looking at ways to help their business any way they can. The difference between the ads seen all over the internet and MSC's ads are that members are able to build relationships with the person responsible for the ad one is viewing.

**Geotargeting** is the process of determining the location of the user who queries the web and delivering different content to the user according to their physical location. Geotargeting has the ability to manage traffic effectively and is essential for driving quality traffic thereby increasing revenue of the business. With the help of geotargeting small businesses can be able to compete with large businesses by effectively increasing click through rates and return on investment. Geotargeting has a wide spread use in the field of online trade because it has the ability to attract more customers than any other type of marketing. MainStreetChamber provides geotargeting localization through its chapter sites and hence chapter membership.

MainStreetChamber's **Graphic design** artists work with MSC members to create and combine words, symbols, and images to create a visual representation of ideas and messages – these same artists created MainStreetChamber's own logo. The graphic is what urges people to click on the ad sending the viewer to the appropriate site. A product package might include a logo or other artwork, organized text and pure design elements such as shapes and color which unify the piece. Composition is one of the most important features of graphic design, especially when using pre-existing materials or diverse elements.
