

INTERCEPT MICRO® FILTERS

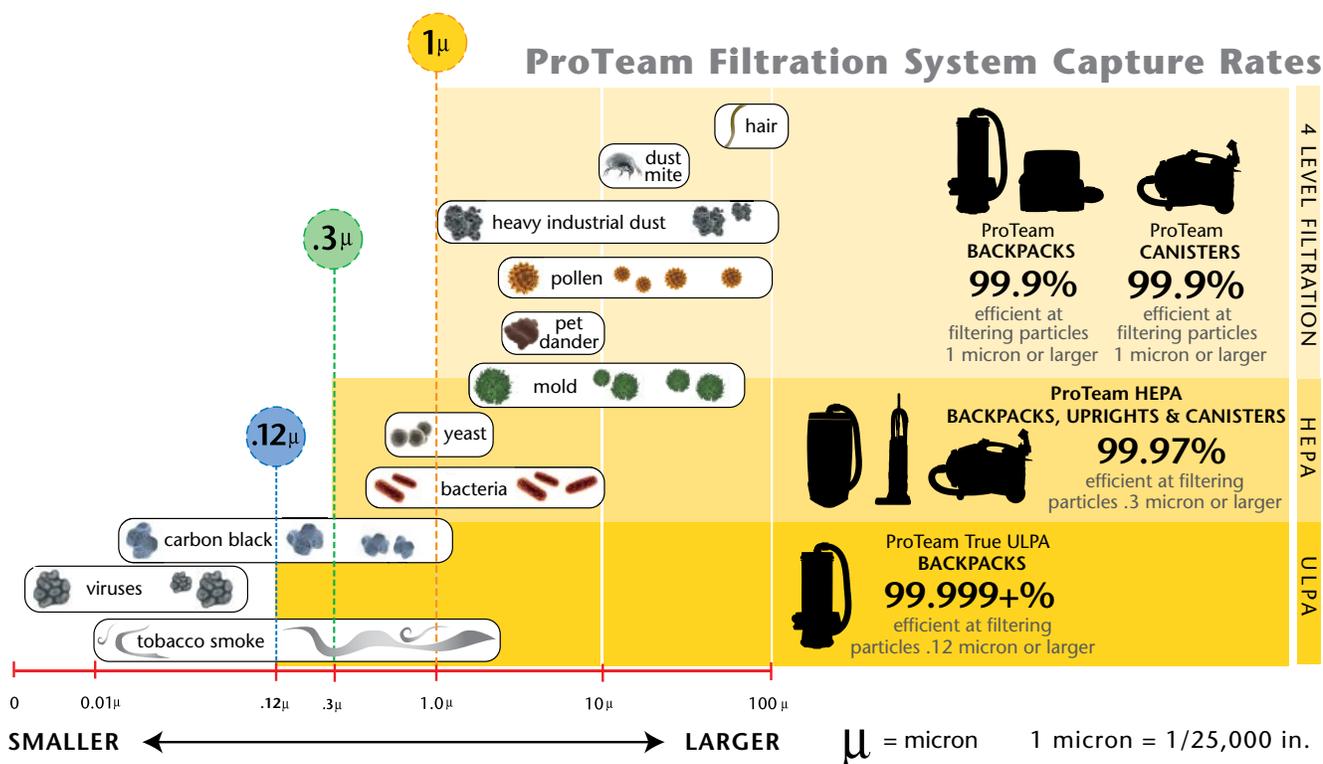

Intercept Micro Filters are the first line of defense in our Four Level® Filtration Systems which reduce and control indoor air pollutants. Always make sure to use genuine ProTeam filters for maximum effectiveness.

INTERCEPT MICRO® FILTERS

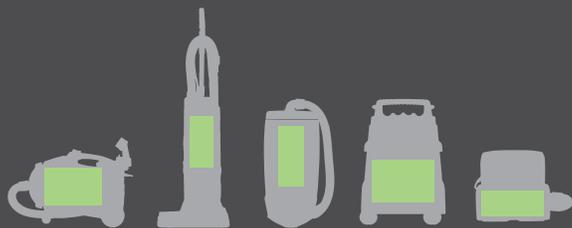

Why our Intercept Micro Filters are better:

- **CAPTURE & CONTAIN**
Intercept microbial treatment contains odors and prevents growth of mold and bacteria.
- **LONGER FILTER LIFE**
Fully laminated inner liner eliminates shredding.
- **LARGE CAPACITY**
21% more filtration area than non-pleated filters.
- **IMPROVED INDOOR AIR QUALITY**
Dual layered construction contains fine particles, improving indoor air quality.

The Air We Breathe — is full of particles that trigger asthma and allergic reactions. Dust, mold, pollen and bacteria, invisible to the human eye, come from many different sources and quickly travel from one environment to the next. ProTeam's exclusive Four Level Filtration system successfully contains microscopic debris and provides extremely high levels of protection against the reintroduction of these pollutants back into an environment.
