No-Contact Infrared Forehead Thermometer

Keep your customers and employees safe.

Description:

- **Non-contact design:** This forehead thermometer is specially designed to take the human body temperature with a 1.2 in-2 in (3 cm-5 cm) distance from forehead.
- **Accurate and Reliable Measurement:** Thanks to the advantage infrared detection system, use infrared technology to scan and measure the temperature of the temporal artery on the forehead. The digital thermometer can quickly take an accurate and reliable measurement.
- **Complete Features:** Practical, easy to use, aim to the body forehead and press the scan button. The tested temperature units are dual setting and can be displayed in either °C or °F.
- **Memory Recall and Fever Alarm:** The body thermometer can memorize the last 32 temperature measurements. And the backlit will display RED color and audible alarm if body temperature is more than 100.4°F (38°C).
- **100% Safe and Hygienic:** Safe for all ages/groups and completely hygienic, the thermometer helps you have safe control for body, surface, and room temperature. Additionally, it is equipped with automatic power-off (30 seconds) to conserve energy.
- **FDA Registered No.:** 3008395508
