Certification Icon Definitions

CALIFORNIA STATE FIRE MARSHAL - The State of California fire codes are believed to be the most stringent of all the United States. Once a product has obtained UL and/or FM approval, they are submitted to California for acceptance. (osfm.fire.ca.gov)

DERMA-TEK® - This proprietary, smooth surface, nonporous design is tough, durable and seamless - making it easy to clean and keep clean, which provides a professional appearance. Plus, Derma-Tek will not absorb chemicals, liquids or odors and will not rust, dent, chip or corrode.

FACTORY MUTUAL - FM is an independent testing agency that approves covered containers based on their ability to withstand an internal fire by the elimination/reduction of oxygen intake, to remain upright if tilted and to maintain shape and contain its contents throughout a specific temperature range. (fmglobal.com)

FDA - This regulatory agency of the U.S. government is responsible for determining how materials may be used in contact with food. Their regulations also provide specifications regarding composition, additives, and properties. A material which meets these standards can then be stated as FDA COMPLIANT. (fda.gov)

HACCP

HACCP - Hazard Analysis Critical Control Points is a systematic approach to food safety. This approach utilizes seven principles and practices for analyzing a food process and determines the hazards within that process. (nal.usda.gov/fnic/foodborne/haccp/index.shtml)

NSF - National Sanitation Foundation is an independent testing laboratory that lists products which meet their criteria for cleanability and sanitation in the areas of food contact and splash zone. Continental® manufactures products that meet the following NSF Standards: "Standard 2: Food Equipment" and "Standard 21:Thermoplastic Refuse Containers". (nsf.org)

OSHA - The Occupational Safety and Health Administration works with employers and employees to create better, safer and healthier working environments in the United States. OSHA Sanitation Regulations (Standards - 29 CFR) state that any receptacle used for putrescible solid or liquid waste or refuse shall be so constructed that it does not leak and may be thoroughly cleaned and maintained in a sanitary condition. Such a receptacle shall be equipped with a solid, tight-fitting cover, unless it can be maintained in a sanitary condition without a cover. (osha.gov)

UNDERWRITERS LABORATORY - A government approved company which tests for safety specifications. Standard UL 242 references non-metallic containers for waste paper, with regard to their ability to contain burning paper without contributing fuel to the fire. (ul.com)

USDA - The United States Department of Agriculture is a Food and Safety Inspection Service that regulates manufacturing, packaging, and handling practices in the agricultural food industry. USDA requirements for material approval are satisfied by a certification of FDA Compliance. (usda.gov)

ColorGuard® - Look for the ColorGuard logo beside products throughout this catalog. These items are designated for use in a color-coding system. Color-coding is a quick and intuitive way to insure that HACCP guidelines are being met. Simply designate each color to a different room, and eliminate the risk of cross-contamination.

Since 1938, Wilen has continued to be a nationally recognized, US-based mop manufacturer. In the late 90's, Continental Commercial Products acquired Wilen, and has since moved its operations to Missouri. We continue to focus on maintaining the brand's high-quality standards.

In the early 1970's, CCP was the first to introduce plastic mopping equipment to the market. Today's highly-durable mopping combos have a seamless design, and feature our smooth, nonporous Derma-Tek® surface.

MOP BUCKETS, WRINGERS & COMBOS

Our line of American made mop buckets and wringers set the standard for durable construction and quality. An innovative wringer design maximizes mechanical advantage, reducing worker strain and increasing productivity. Our molded-in mop handle rest keeps the mop handle in place during transportation and storage.

what are the facts?

Continental's desire for both ergonomics and efficiency determined the unique design of the Splash Guard™ buckets . . .

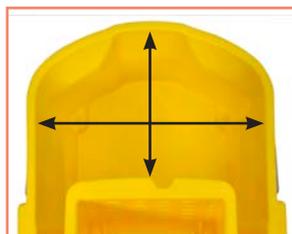

Taller Design

Added height at the wringer side provides greater leverage with less back & muscle strain. From the floor to the top of the wringer, the 35 qt. Combo is 27.5" and the 26 qt Combo is 23.5".

Sloped Walls

Funnel-type reservoir easily directs mop to the target area, while preventing water from being splashed out.

Mop Target Area

With the wringer in place, our buckets offer a larger target area than the other leading brands.

Hand Grip

Molded-in grip area aids in lifting and emptying the bucket.

TOUCHLESS MICROFIBER MOPPING SYSTEM

ErgoWorx® is the industry's most innovative, truly touchless mopping system and is ideally suited for microfiber mopping. Its patented design eliminates the need to handle soiled mops and breaks the chain of cross contamination. It reduces water and chemical consumption, and is a perfect solution to the challenges associated with Green Cleaning. And, its ergonomic benefits improve worker safety by reducing physical stress.

Built-in hooks to hold mops.

Ultrasonically welded Velcro® brand hook & loop fastener strips accept 20" Microfiber flat mops.

Mop Frame is made from super-tough, chemical resistance, glass-filled nylon.

Patented MF-5BK
Universal swivel joint creates a secure and positive lock. Fits both telescopic and fixed length aluminum mop handles.

Fitted Laundry Net Bag enables easy removal of soiled/contaminated microfiber mops.

A80805

Solution Bucket (CB-5YW) & Discharge Bucket (SB-5YW)
'lock' together to create a single unit for increased stability and ease of use.

Solution Bucket

- Includes durable, snap-on screen to remove excess chemical solution from the microfiber mop.
- Screen has sturdy center support to prevent screen deflection.
- Molded-in graduations in both US gallons and metric liters for ease of use; total capacity is 5 gal (20L).

Discharge Bucket

- Accommodates up to 18 of the 20" microfiber flat mops.

Six Step System

1

Place clean refill on perforated screen.

2

Attach bottom of Auto Discharge Microfiber frame to refill.

3

Place refill in Microfiber Solution Bucket. Let the refill absorb enough liquid to allow for a ten minute dwell time on the floor.

4

Place refill on perforated screen to allow excess liquid to be removed from refill.

5

Start from farthest corner of the room, away from the door or entrance. Begin flat mopping in an "S" pattern, keeping the dirt behind the refill, moving backwards towards the door or entrance.

6

Place Auto Discharge frame clips on discharge rod and press down. Refill will discard into discharge bucket.

MICROFIBER FLAT MOPS

Our 100% microfiber mops offer many advantages to today's cleaning challenges. We use the highest quality, ultrafine synthetic fiber that is very durable, and provides superior bacteria removal.

WHAT IS MICROFIBER?

Unlike conventional mop yarns, each strand of microfiber is wedge-shaped with sharp edges which makes it very effective for removing, absorbing and accumulating virtually any type of dirt, dust, grease or contaminant. When paired with ErgoWorx Touchless Cleaning System (See page 00), our system is an important component for a comprehensive Green Cleaning Program as per the US Green Building Council's (USGBC) LEED for Existing Buildings Rating System (LEED-ED:OM), Practice Greenhealth's Green Guide for Health Care and the Healthy Schools Campaign's Quick & Easy Guide to Green Cleaning in Schools.

BENEFITS

More Cost Effective
Cleans faster and lasts up to 6x longer than traditional mops.

Healthier
Superior bacteria removal; improves Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHP) scores and reduces hospital acquired infections. Reduces bacteria on 95% of all hard surfaces.

Greener
Significantly reduce consumption of water and chemicals; Re-usable and can be washed hundreds of times when cared for properly.

Safer
Light weight mops reduce work strain

laundry instructions

Machine wash separately, using a neutral detergent (pH ~ 7.0), avoid alkali (if alkali product is used, product must be neutralized before drying). Avoid pH levels above 9.0. Exposure to pH levels above 9.4 will damage the product. Use moderate bleach, if necessary. Wash with hot water, up to 195°F (90°C) and tumble dry, up to 195°F (90°C). Do not use fabric softeners. NOTE: Red products should be washed before initial use, to avoid bleeding on the surface to be cleaned.

LAUNDERABLE REFILLS

FLOOR FINISH APPLICATOR

Even the best floor finish will provide poor results when applied with an inadequate tool. That is why we offer these professional finishing products. Whether applying finish, disinfectant, sealer or any other liquid, you will not only get much better results, but also unmatched labor savings.

WAX-O-MATIC®

Quickly, easily and smoothly apply both water and solvent based fluids, including finishes, sealers, urethanes, restorers and disinfectants, with the Wax-O-Matic. The straight line method, with built-in edge feathering, covers many times the area of conventional methods, without the spills, drips and baseboard splashes! Lever actuated dispensing and replaceable pads provide complete control of finish thickness. The three gallon tank covers about 30,000 square feet per hour. One set (two pads) of Ultra Refills are included. Assembly is required - manual is included.

THE FIVE BASICS OF WET MOPS...

CONSTRUCTION

looped-end

Designed for superior performance and extended life. There are no ends to fray or unravel as the mop sweeps over the floor surface in a wide, even path. Although the initial investment is higher, its increased performance, reduced labor cost and less frequent replacement quickly compensate.

Our line of **laundryable, pre-shrunk, looped-end mops** is designed to meet the needs of the health care industry and others who launder mops. These mops may be laundered repeatedly, while maintaining their clean appearance, low lint factor, absorbency and strength, without shrinking. They also save money by outlasting cut-end mops up to 8x, and reducing labor costs by up to one half!

cut-end

The cut-end is the standard, **most popular and economical (initially) mop style**. Cut-end mops fray and unravel, increasing the lint factor and leaving loose strands behind. In addition, without tailbands, cut-end mops cover less area per pass. Since cut-end mops cannot be laundered, they are often considered "disposable" and thrown away when their useful life is over.

YARN

Choosing the Best Value in Wet Mops

YARN	ADVANTAGES	DISADVANTAGES	USES
Cotton	Good absorption and retention. Low initial cost. Gentle on surfaces.	Requires break-in. Lints and dries slow, promotes mildew and deterioration.	General use, picking up liquids, scrubbing.
Rayon	Quick absorption and release. Dries fast, mildew resistant. Cleaner yarn, lints less.	Shrinks when laundered. Less liquid retention.	Applying liquids (finishes, disinfectants).
Synthetic	Long staple fiber for superior tensile strength, no lint. Quick release.	Higher cost. Poor absorption.	Professionals who require better and longer lasting mops.
Blends	Ideal balance for price, performance and durability. Synthetic fibers add durability and color.	May shrink (unless pre-shrunk).	Professionals who require better and longer lasting mops.

yarn

Certain yarns do a specific task better than other yarns.

That's why there is such a variety of mops. To get maximum efficiency and value from a wet mop, it is important to select the right yarn for the job.

yarn ply

Yarn ply indicates the number of strands twisted together to make a single yarn strand. More plies give added strength, though higher ply numbers do not necessarily mean higher quality yarn. More strands may add durability but they also decrease absorbency. It is generally recommended to choose a higher quality yarn than a high ply, low quality yarn.

antimicrobial

Locked into the yarn are **fibers containing an antimicrobial additive**. The additive protects the mop head from deterioration by inhibiting the growth of stain and odor causing bacteria, mold, mildew, and yeast in and on the mop head.

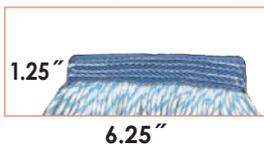

twist

A yarn's "twist" is a result of **how tightly the fiber strands are wound together**. While a tightly twisted yarn might be stronger and last longer, its absorbency may be decreased. Like yarn ply, the best value isn't determined by the yarn's twist, but by the type and quality of the yarn and the mop's construction. A mop with looped-end construction enables the yarn to have a loose twist while eliminating fraying.

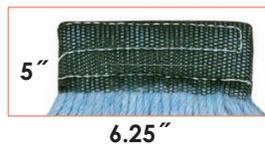

HEADBANDS

1¼" **headbands are compatible with stirrup-type handles** and are useful on finishing-type mops such as our FastTrack™ looped-end mop. 5" **width headbands are compatible with clamp and jaw-type handles**. The synthetic mesh material provides non-abrasive scrubbing to help dislodge dirt and to allow quick drying of yarns. Abrasive scrubbing pads can also be included.

Narrow Headband

Wide Headband

TAILBANDS

A tailband on a wet mop is designed to improve coverage and to enable the mop to cover a wider path saving time and increasing productivity. Tailbands also prevent tangling so that a mop can be laundered repeatedly. Tailbands are included on all CCP looped-end wet mops and on our line of Cut-End Fan Tail wet mops.

SIZES

A mop's size should be in relation to the job to be performed, the mop wringer being used and the user's size. Cut-end mops are sized by their approximate weight in ounces. Looped-end mops are sized by industry standards since they absorb and retain much more while also covering a greater surface area than a cut-end mop of comparable weight.

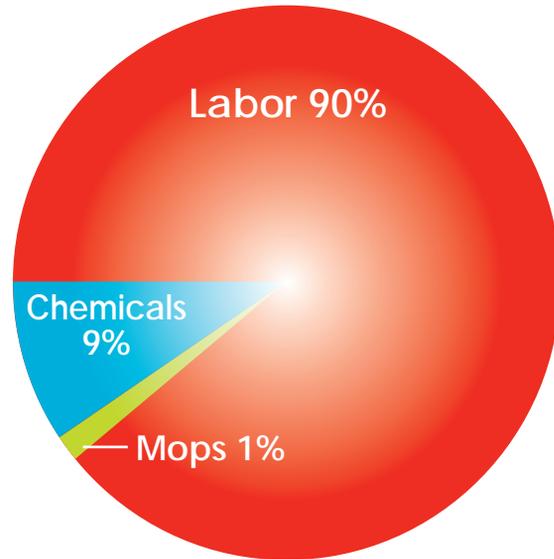

Size	Ounce Size	Band
Small	8-10	Red
Medium	16-20	Green
Large	24-32	Blue
X-Large	32-40	Yellow

what are the facts?

Choose a tool that gets the job done faster and better . . .

Why use an inefficient, "disposable" cut-end mop when you can get the job done **twice as fast** with better results, using a looped-end mop? Looped-end mops cost more, but the price of a tool is **less than 1% of the cost** of mopping a floor.

One looped-end mop will **outlast eight cut-end mops**. A looped-end mop can actually be less expensive - by **up to 3x!** That means less mops to order, to stock and to change and dispose of.

labor savings

Based on mopping 5,000 sq. ft., at \$12 per hour.

	Cut-End	Looped-End
Daily Total	\$24	\$ 12
<i>Savings</i>		<i>\$ 12</i>
Monthly Total	\$720	\$ 360
<i>Savings</i>		<i>\$ 360</i>
Annual Total	\$8,640	\$4,320
<i>Savings</i>		<i>\$4,320</i>

The **real savings are labor costs**, an expense that eats up over 90% of your floor care budget. Several factors contribute to a looped-end mop's cost advantage. A looped-end mop covers a wider surface area (without gaps and loose strands, common with cut-end mops), absorbs up to six times as much liquid and covers twice as much floor with fewer trips to the bucket and wringer ~ in the same amount of time! Your annual savings in labor can easily be in the thousands of dollars!

mop cost savings

Based on buying eight cut-end mops per month.

	Cut-End (\$5 each)	Looped-End (\$9 each)
Monthly Total	\$40	\$ 9
<i>Savings</i>		<i>\$ 31</i>
Annual Total	\$480	\$108
<i>Savings</i>		<i>\$372</i>

In addition, **looped-end mops provide better results**, whether just damp mopping or finishing. That's because looped-end mops lint much less, providing a smoother application of chemicals, and have tailbands that help prevent tangles. You're cleaning and finishing floors better, for less cost, a fact that both accountants and users will appreciate!

WET MOPS

CCP's comprehensive product line features a mop for any job and any budget. We offer a wide variety of yarns as well as new products to help users do their job more efficiently. From premium looped-end mops to economic cut-end mops, we have a mop for any application.

Let's talk value!

Selling the Right Mop for the Right Job

As every successful distributor knows, providing your customers with high value products results in customer satisfaction. And satisfied customers are repeat customers.

But how can an often overlooked commodity product like a mop affect your bottom line? Even though a mop represents an insignificant part of a job's cost, it has a great impact on the results. Upgrading your customer's floor care tools to looped-end mops provides them with better performance, longer mop life and reduced labor costs.

Since labor costs account for over 90% of a floor care program, it makes sense to help your customer reduce this cost.

Looped-end mops, with their wider surface coverage, superior absorption and cleaner results can reduce labor costs by up to one-fourth, providing you with a satisfied customer.

And, since looped-end mops outlast cut-end mops up to 8x, your customer saves even more!

sustainability

All Continental Commercial Products® wet mops have green attributes that promote and enhance a comprehensive sustainability program. You can be sure that **CCP wet mops are environmentally friendly** and are constructed with a level of quality that ensures durability.

FLOOR FINISH WET MOPS

LIQUID APPLICATION MOPS

When it's time to apply finishes and sealers, use a tool designed for the job. Our conventional style finish mops provide a smooth, clean finish while outlasting conventional cut-end mops over 8x. For larger finish jobs, the Floor Finish Flat Mop provides performance and economy. You'll get a better finish with less effort.

A] SMOOTHIE™ FINISH MOP

100% recycled fibers

Worker fatigue can be reduced by 20 to 25% due to the incredibly smooth application of the Smoothie. This 100% nylon, 2-ply yarn holds finish with surface tension, not by absorption. As the mop is moved along the floor surface, finish is released more evenly and completely.

FLOOR CARE | DRY

Before any wet floor care maintenance can happen, dust and dirt particles have to be removed. Be it on hardwood, linoleum, carpet, or even concrete, we have a wide range of tools to get the job done the first time. All of our items are quality tested and annually reviewed to make sure the professionals who use our floor care tools have exactly what they need.

DUST MOP DEFINITIONS

yarn

Cotton is the most economical and popular yarn, despite its disadvantages when compared to other fibers. Cotton is often blended with synthetic fibers to add strength and absorbency. Some of these yarns are designed to withstand laundering, while others, like disposables, are constructed with bulky, loosely twisted yarn for better dust removal. Our PermaTwist™ cotton yarn combines exceptional durability via a unique fiber bonding process. Nylon, like that used in our Durastat™, has electrostatic properties that attract dust particles without the use of treatment.

cut-end

The cut-end dust mop, though more economical at first, tends to fray, unravel and lint. This can decrease its performance and lead to replacement of the mop. Laundering can decrease durability. Our PermaTwist™ solves this problem by bonding the yarn fibers.

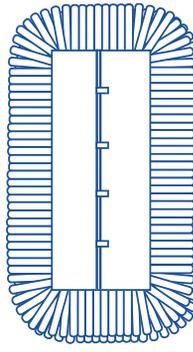

looped-end

By trapping more dust, producing less yarn debris and resisting tangles, the looped-end dust mop delivers maximum performance. Because looped-end yarns withstand heavy use and frequent laundering without fraying and unraveling, linting is virtually eliminated. Looped-end yarn is available in long strands for greater coverage or short loops for hi-tech and health care applications.

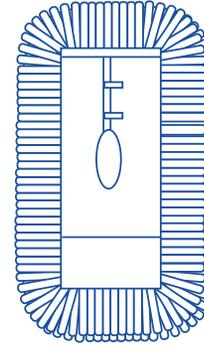

backing

Synthetic backing material has replaced cotton as the industry standard because it dries much faster and absorbs less treatment than cotton. We also offer a variety of backing styles including Open Back and Key Hole (illustrated at right). Both backing styles are available for construction in our Professional Dust Mop category. Ties are also available upon request. Our Swivel Snap category is available with a Key Hole style backing. Our Value Line category is available with an Open Back style. Our Disposable Dust Mops are available with backings as shown. Backing colors include: red, blue, green and white.

Key Hole

durability

High quality construction standards lead to the best value in a dust mop. Wilen® mops are made with the highest level of professional quality with pre-shrunk backings and top grade yarn to withstand heavy use and repeated launderings. Reinforced stitching at stress points are signs of better mop construction. Innovative yarns, like our Durastat™ and PermaTwist™, can provide longer lasting service as well as increased performance.

frames & handles

To provide free swiveling or rigid handle positions, use a handle with a swivel-snap device attached to the frame. Frames are available from 18" to 60".

Lead times for dust mops vary. Typically, all non-stock items can be shipped within four weeks.

MICROFIBER DUST MOPS

The performance and durability of microfiber take dry mopping to a new level! Whether using traditional dust mopping equipment or hook and loop frames, microfiber dust mops offer superior dust collecting properties, attracting and holding dust electrostatically.

These mops are more efficient and last longer than typical cotton/blended dust mops. Available in both conventional keyhole style backing that accepts industry standard frames, as well as hook and loop backing for hook and loop frames.

B] MICROLOOPED MICROFIBER CANVAS BACKED DUST MOPS

Microfiber dust mops pick up dirt and dust electrostatically. They are more efficient and longer lasting than typical cotton/blended dust mops. Conventional keyhole style backing accepts industry standard dust mop frames.

SWEEPS - FLOOR & GROUND

Stiffness, durability and cost are just a few characteristics to consider when selecting the right sweep. We offer a sweep for every application. All blocks come with two threaded handle holes. 36" wood sweeps include handle arm braces for added strength. Sweep handles are sold separately.

Choosing the Best Value in Sweeps

The CCP Advantage

High-quality construction throughout the breadth of this line assures you of finding the right tool for the job.

Polypropylene

A synthetic fiber that is available crimped or straight in a variety of colors. It has a very long life and high resistance to acid and most solvents.

Black Tampico

Comes from the leaf of the cactus-like Lechuguilla plant of Mexico. With a soft to medium texture and good durability, Tampico may be used alone or blended with other materials. Naturally off-white in color, the fibers are dyed black.

Palmyra

Comes from the base of the leaf stalks of the Palmyra palm of India and Africa. Texture is medium stiff to stiff. Low cost, durability and liquid resistance make it ideal for a wide variety of uses. Comes brown in color.

What does "flagged" mean?

Many brushes have "flagged" (also known as "feathered") bristles. Flagged bristles contain split ends which decrease stiffness and add liquid and dust retention properties. This soft, synthetic fiber is ideal for dusting, fine sweeping of smooth surfaces and washing vehicles without scratching.

Blocks

Fibers are set into either structural foam or wood blocks, both have advantages. More and more people are choosing structural foam due to its obvious advantages—durability, water resistance and its non-warping, non-splintering characteristics. Nevertheless, traditional wood is still widely used.

Push It

There are several different types of floor brushes (or push brooms) available: Floor Sweeps for indoor surfaces; Garage Sweeps for concrete and outdoor use; and Street Brooms for sweeping heavy debris on rough surfaces. In addition, each of these categories contain a variety of styles and sizes.

FLOOR SWEEPS

FINE TO MEDIUM FLOOR SWEEPS

Unparalleled quality makes Wilen's floor sweeps the best value. With a variety of sizes, fibers and a choice of lacquered hardwood and structural foam, a sweep is available for every application. All blocks come with two threaded handle holes. 36" wood sweep also includes handle arm braces for added strength. Sweep handles are sold separately.

These brooms accept threaded handles only. Found on page 60-61.

GARAGE SWEEPS

HEAVY-DUTY, INDOOR/OUTDOOR FLOOR SWEEPS

These medium to heavy sweeps feature coarser fibers than regular floor sweeps. This allows them to sweep heavier debris and perform better on rough surfaces like driveways. Available with lacquered hardwood and structural foam blocks, these long-wearing sweeps are ideal for outside sweeping, basements, warehouses and other rough surface areas. 30" and 36" wood sweeps include handle braces. Sweep handles are sold separately.

These brooms accept threaded handles only. Found on page 60-61.

GENERAL CLEANING

At CCP, we like things clean. Not just clean, but really clean. Our Product Managers have worked hard to make sure if you like really clean things, this section will have you covered.

GENERAL CLEANING

CARTS

Our carts are the workhorses of the industry, and easily accommodate a variety of tools and supplies, increasing organization and worker efficiencies.

JANITOR CARTS

Our exclusive Derma-Tek® Smooth Surface makes our carts the easiest in the industry to clean and keep clean! All-plastic construction will not rust, peel or fade. The color is molded throughout, keeping scratches and dings from showing. The four-legged design is more stable under heavy loads and actually helps to contain the load when over-stuffing the center collection area. Non-marking, grey, 8" rear wheels and 3" front swivel casters provide maximum maneuverability with minimum effort and prevent floor scuffing. Large oversized wheels and casters provide an effortless ride with minimal noise; ideal for any type of cleaning environment.

JANITORS' CART

WASTE COLLECTION

A blurred office interior with a row of chairs and a recycling bin. The background shows a window with blinds and a ceiling with a light fixture. The overall image has a light blue tint.

In 1976, we were the first to establish what a commercial trash receptacle should be, and proudly named it Huskee™. Always made in the USA with durable, high-quality resin, this full-feature receptacle provides years of use. For nearly a half century, we've carried that same Huskee quality into our full line of receptacles, lids, and accessories. Engineered for greatness, this line-up is prepared for your dirty jobs.

FAQ's...

Which Huskee receptacles are NSF: Standard 21 rated?
All bases and lids, BackSaver & SuperKan.

Which Huskee receptacles are NSF: Standard 2 rated?
Grey and white bases & lids, except BackSaver & SuperKan.

Which Huskee receptacles are FDA and USDA approved?
All our Huskee receptacles, from 10 to 55 gallon (except SuperKan), are made of FDA compliant material. USDA requirements for material approval are satisfied by a certification of FDA compliance.

What temperature range can a Huskee withstand?
0 -190° F for NSF rated items, 0 - 205° F for all other Huskee receptacles.

What material are Huskee receptacles made of? LLDPE

Can you store wine in a Huskee? We recommend against using a Huskee, or other plastic waste receptacles, for wine storage. During the fermenting process, the taste of plastic can pass into the wine.

RECEPTACLES, LIDS & ACCESSORIES

A] HUSKEE™ BACKSAVER

This receptacle is everything the standard Huskee Round is, and more! Internal vent ribs, which break the vacuum caused when removing a poly liner, were incorporated into the design, making it the easiest receptacle to use. Compatible with the Huskee Round Dolly, Caddy Bag, Maid Caddy, 32 or 44 gallon Huskee Round Lids and the Huskee Dome and Funnel Tops.

32 Gallon Rim Dimension: 21.75" Diameter

44 Gallon Rim Dimension: 24" Diameter

Item #	Size	Dimensions	Color	Case Pack
3210GY	32 gal.	24 ³ / ₄ " x 27 ¹ / ₂ " H	Grey	4
4410GY	44 gal.	27" x 31" H	Grey	3

Built-in Huskee Bag Cinch eliminates the need to tie knots in the poly liner to keep it secured around the receptacle rim!

BackSaver IS SAFER BECAUSE OF VENTS!

The National Safety Council puts the total cost of work injuries at \$121 billion annually, and the cost per disabling injury at \$26,000, and growing. Back injuries are 20% of all claims. The Huskee BackSaver uses internal, ergonomic lift vents to break the vacuum created when removing a poly liner, resulting in reduced effort and reduced risk of back injury.

B] HUSKEE™ SUPERKAN®

"The Can on Steroids!" Independently tested, our SuperKan out-performed the competition by more than 3.5 times on compression resistance, 1.5 times on handle strength and overall strength by holding up to 700 lbs., without disfiguring the can. Features internal vent ribs which break the vacuum caused when removing a poly liner.

44 Gallon Rim Dimension: 24.125" Diameter

Item #	Size	Dimensions	Color	Case Pack
4442BK	44 gal.	27 ¹ / ₄ " x 31 ¹ / ₄ " H	Black	4

Derma-Tek® smooth surface enables easy clean-up. Dual vinyl-coated cable lid stays hold the lid in a vertical position for safe, easy emptying, and help eliminate tipping of the base. Heavy-duty poly liner retainer straps allow the user to secure a poly liner within the container for a clean, professional appearance.

A] COLOSSUS®

Designed for high volume applications! The contoured lid's top surface prevents accumulation of debris and water while providing a unique and visually appealing style.

Because the spring-loaded doors fit tight to the lid, and the lid fits tight to the base, this receptacle is Factory Mutual Approved. The heavy-duty door springs keep doors closed tight to keep odors in and pests out.

WASTE COLLECTION

RECEPTACLES, LIDS & ACCESSORIES

This product aids in conforming to the OSHA regulation 1910.1030 known as "Occupational Exposure to Bloodborne Pathogens." The line is Factory Mutual (FM) and California State Fire Marshal (CSFM) approved for fire safety. Lid attachment is covered on top so dirt does not collect in the hinge. 23 gallon version has covered wheels for mobility and cleanliness. The Spine is designed to be flexible, keeping it from breaking if the lid is held down when the pedal is stepped on. Unique "key-way" notch holds standard size poly liners.

A] STEP ON

Step pedal provides convenient, hands-free and hygienic disposal of waste. Lids close securely to base, keeping odors contained. Can be used with standard poly liners. The 23 gallon version has wheels and wire frame for ease of mobility. Two models, #8 and #12, are heat resistant to 122°F.

A photograph of a warehouse interior, heavily filtered with a warm, orange-brown color. In the foreground on the left, the handle and fork of a pallet jack are visible. The background is filled with numerous stacks of pallets, each wrapped in clear plastic. The lighting is soft and diffused, creating a sense of depth and scale. The overall composition is clean and industrial.

These are the bad boys of our industry. Designed to last, while **hauling heavy loads of the most random items you can find**, these trucks and carts won't rust or distort. With a wide range of sizes and capacities, we've made sure that one person handling, easy clean up, and storage all come standard.

MATERIAL HANDLING

TILT TRUCKS

All sizes and capacities come standard with heavy gauge, enamel-coated steel frames. These units are designed to last, with plated caster housings and hardware. Metal frames are tucked into the profile of the units to support heavy loads and to prevent bulging and tub distortion.

5/8 CUBIC YARD TILT TRUCKS & COVER

All models feature one-piece extra strong seamless industrial plastic construction. Inset wheel placement prevents wall/door damage and allows for nesting in shipment and in storage. Fits through standard office doorways. Optional domed, center-hinged lid helps to contain odors and keep pests out. Stainless steel piano hinge will not rust.

PLATFORM TRUCKS

Continental® offers three grades of platform trucks in three popular sizes. Folding and removable handles enable them to be used in a variety of hauling situations.

A] COMPACT PLATFORM TRUCK

This sturdy cart easily transports bulky loads with ease, while three-position handle folds flat for compact storage. Non-skid platform surface and deck channel retain small items. Two molded tie-down slots enable loads to be secured. Handle is 39" high. Non-marking 5" casters - back casters swivel, front are stationary. Weight capacity is 250 lbs.

Item #	Capacity	Deck Size	Caster Size	Color	Case Pack
5855	250 lbs.	31" x 24"	5"	Black	1

B] PLATFORM TRUCKS

Structural plastic construction and rounded corners protect against accidental wall and door damage. No bumpers required. Unlike conventional metal or wood, plastic construction will not rust, dent, crack, chip, peel or splinter. All platform trucks come in charcoal grey and feature a heavy-duty, reinforced steel handle. Casters: two fixed (stationary) and two swivel.

Item #	Description	Capacity	Deck Size	Caster Size	Color	Case Pack
5860	Utility	700 lbs.	24" x 48"	5"	Grey	1
5865	Standard	1,200 lbs.	24" x 48"	6"	Grey	1
5870	Heavy-Duty	2,200 lbs.	24" x 48"	8"	Grey	1
5875	Utility	700 lbs.	30" x 60"	5"	Grey	1
5880	Standard	1,200 lbs.	30" x 60"	6"	Grey	1
5885	Heavy-Duty	2,200 lbs.	30" x 60"	8"	Grey	1

Square steel sub-frame provides an evenly distributed, load-bearing understructure that ensures safety and reliability.

CARTS

Our carts are durable, easy-to-clean and highly maneuverable. Pneumatic casters, on some models, provide quiet operation on rough surfaces.

DID YOU KNOW...

Will not absorb chemicals, liquids or odors, will not rust or corrode, resists dents & chips.

A] PNEUMATIC UTILITY CART

The heavy-duty plastic construction is lightweight and durable, designed to handle applications from health care to industrial. The 8" fully pneumatic casters and all plastic design provide a cushioned, quiet ride that is ideal for transporting fragile items over rough surfaces. Derma-Tek smooth skin, non-porous finish is easy to clean and provides a professional appearance that will not peel, chip, crack or fade like conventional metal units. Supports 200 lbs. per shelf, 400 lbs. maximum capacity.

DUNNAGE RACKS

Food storage solutions that meet NSF, FDA and USDA requirements.

A] DUNNAGE RACKS

These racks are the best solution for your storage needs. Made of durable polyethylene construction, they won't rust or corrode like metal units. The light textured surface is easy to wipe-off or steam clean. The Dunnage-Key connector storage slot provides storage when not in use and is sloped to allow drainage when cleaning. Ventilation slots allow air to circulate under stored goods, promoting longer shelf life. Racks can be joined together in end-to-end, back-to-back or in a L or U shape, to accommodate all storage needs. 12" height meets NSF, FDA and USDA requirements and meets food codes and H.A.C.C.P.'s food storage requirements. Two keys are furnished with each rack; additional keys are available.

ICE BINS

Safely transport ice to serving bars, ice dispensers, portable bars, etc. NSF Listed for direct food contact (Standard 2).

B] CONSERV ICE BIN

Metal-free bin and lid are designed to eliminate unsightly rust and corrosion. The patented, multi-position, self-storing lid provides greater access to bin contents, while preventing lid contamination. Built-in, front-assist handle enables easy vehicle loading and unloading. The easy to access and leak-proof drain faucet is nested within the profile of the body to prevent accidental damage. These units provide efficient storage and functionality with a reduced and common footprint design. Both the 125 and 200 lb. Ice Bin share interchangeable lids and faucet. The ergonomic handles and large, dolly-style rear wheels allow units to be easily rolled and maneuvered over grass, file or up curbs or steps.

INFANT CARE

Our baby changing stations are safe, versatile and compliant with applicable regulations. They feature easy-to-clean surfaces, non-absorbent safety straps, bag hooks, dual liner dispensers and pneumatic shocks that allow one hand opening and closing.

Products are A.D.A. compliant when properly installed. Changing Stations are available in Horizontal and Vertical styles to meet size and space requirements. Child Safety Seat that can be wall or partition-mounted.

DIAPER CHANGING STATION

The concave shelf design provides a deep area for the child to lay, preventing them from rolling around. Heavy-duty safety straps provide an additional level of security. Safety belt with cam-buckle is adjustable with one hand for safety and convenience, belt is non-absorbent. *Designed to hold a static load of 250 lbs., with little or no deflection.

High-density polyethylene naturally inhibits bacterial growth (tested to ASTM G21 Anti-Bacterial and ASTM G22 Anti-Fungal), which provides a safe, convenient and hygienic platform. Easy to read ANSI compliant labels (ANSI Z535.3 and ANSI Z535.4). Plastic lined bed liners create a barrier between your child and the changer. Liners unfold to 13" x 18". Molded-in, dual liner dispensers will each accommodate approximately 50 bed liners.

Designed for easy mounting, the molded-in hang holes allow the unit to be attached to standard 16" on-center studs, or hung on a hollow wall - all required hardware is included. Concealed rear pneumatic strut provides smooth opening/closing power while concealed hardware maintains appearance and prevents tampering.

Each Station comes with a self-adhesive placard for the restroom door.
