

## Keep your concentration with KIMTECH® WETTASK® System Wipers

You may be putting enough disinfectant in each bucket, but is your disinfectant maintaining its recommended concentration level? It may not be if you are cleaning with cotton rags or microfiber.

That's because cotton rags or microfiber wipers can soak up and "bind" the disinfectant, so the solution stays in the rag or wiper. KIMTECH® WETTASK® Wipers are specially designed to maintain disinfectant concentration and the original, closed-bucket system helps reduce the risk of cross contamination.

## Tough cleaning jobs just got easier

There are times when you need to do more than just clean and disinfect. You need a wipe with scrubbing power to help remove dried-on substances while you disinfect. That's why we designed new KIMTECH® WETTASK® Dual Performance Wipers.

These innovative wipes feature a purple, textured side to make cleaning hard to remove substances easier. Use the white side for regular cleaning and the purple side for tougher jobs when you need the extra scrubbing power. You'll see that the KIMTECH® WETTASK® Dual Performance Wiper leaves surfaces looking and feeling cleaner.

Just look for the WETTASK® System bucket with the purple lid.

### KIMTECH® WETTASK System Wipers – Recommended for Disinfecting/Sanitizing
