

Company description

Let's build the new backbone of asset management!

Together with one of the largest insurance groups in Germany and one of the world's leading consulting firms, we are building an AI-based SaaS solution that supports credit analysts with credit risk assessments. We truly believe that we can build a new standard in asset management and change the entire industry for the better. Our company is still in stealth mode and we are currently looking for a Frontend developer to support our motivated team of Data Scientists, Software Engineers and Business Building Experts in Berlin. Join the ride!

Senior Frontend Developer – Development of an AI based FinTech Product

Role description

- Development of innovative approaches to design tailor-made analytics solutions for economic issues in the area of analytics & big data
- Conception and implementation of interactive web applications as well as prototypes in direct cooperation with our designers, data scientists and domain experts
- Implementation of the product from the design phase (incl. prototyping) through development to productive use
- Support of the product ideation together with UX and domain experts to deliver a user centric and smart application that people love to use
- Collaborate and integrate with the platform team of experienced engineers and build on modern cloud infrastructure
- Work in a multi-functional flat-hierarchy team with Product Owners, Engineers and leadership
- Application of agile working methods and definition of technical standards
- Mentoring junior frontend development colleagues

Key requirements

- Successfully completed Bachelor's or Master's degree in business informatics, computer science, mathematics, physics or related fields
- 3+ years of experience in frontend development
- Record of accomplishment in implementing complex logic (data processing, dynamic visualizations, responsive frontends etc.)
- Excellent skills in one of state-of-the-art web development frameworks (Angular/React/Vue.js, ideally Angular 2 or up)
- Solid knowledge of core web technologies (JavaScript, HTML5, CSS)
- Solid understanding of commonly used patterns such as Redux or Observables
- Understanding of the functional programming paradigm
- Experience with common unit and e2e test tools (Jasmine, Karma, Protractor, Selenium, Cucumber)
- Experience with agile processes is a plus
- Experience with Node.js or Python-based backends is a plus
- Small team leadership experience is a plus
- Analytical and innovative way of thinking, joy in experimentation and multitasking ability
- Fluent in English, German is a plus

Your benefits

- Opportunity to shape the AI-based credit risk analysis of tomorrow
- Development of a FinTech Start-Up, financed by key industry players
- Join an existing tech team of >10 people and become part of the new core team
- Diverse activities and autonomous implementation of own ideas in a dynamic environment
- Sparring and support from top-class industry and technology experts from the investor and partner network
- First-class technical equipment and software of your choice
- Attractive salary and shareholder model
- Fully-equipped office in a renovated art-deco building with rooftop terrace and ideal connection to the heart of Berlin Mitte
- Feel-good vibes with fruit, snacks and drinks
- Annual team off-site and regular team events

How to apply

We look forward to receiving your application with cover letter and curriculum vitae as well as details of your salary expectations and earliest possible starting date:
