

Diameter: measure from the furthest points on the drum (i.e. the chain)

Height: measure from the bottom of the bowl to the highest point of the timpani, including pulley / chain mechanism.

Drum #1

Diameter:

Height:

Drum #2

Diameter:

Height:

*If a bag for the legs is needed please provide measurements below:

Legs (folded up): we recommend one tripod per bag

Length:

Girth:

Girth is the measurement around complete drum i.e. from center of head, around the bowl, back up to center of head.

If you'd like soft bags, measure diameter as indicated above, and girth.
