Release Notes

# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com) or your account manager.

## Contents

### 1. Features

[\[DEP-455\] - Capture TOD Interest Amount for transactions](#)

### 1. Bug Fixes

[\[CUS-1042\] - On create/edit for a simple custom field from API, sending a date stamp affects CF persistence](#)

[\[ADM-819\] - Delete sandbox fails when organization NAME is different than tenantID](#)

## 1. Features

### **[DEP-455] - Capture TOD Interest Amount for transactions**

With this feature Mambu is capturing the Technical Overdraft Amount for Interest Applied and Deposit transactions. As such these values will be returned on API call responses and available for retrieval over the UI, under transaction details.

## 1. Bug Fixes

### **[CUS-1042] - On create/edit for a simple custom field from API, sending a date stamp affects CF persistence**

As we currently do not support timestamps into custom fields, sending a timestamp with a date either via UI or API affected custom fields persistence. With this fix, in the case that a timestamp is sent together with a date, we trim the timestamp and handle date formats so that the rest of the data is saved correctly.

### **[ADM-819] - Delete sandbox fails when organization NAME is different than tenantID**

In the process of deleting sandbox, when the organization name was different from the tenantID, the process was failing. With this fix, we made sure we correctly delete the sandbox even when the organization name is different from the tenantID.

Sandbox release date: Wednesday, 5th of Sept 2018

Production release date: Thursday, 6th of Sept, 2018
