Release Notes

# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com) or your account manager.

## 1. Bug Fixes

### **[CORE-1173] - Incorrect Journal Entries are logged when reversing a transaction with a different user - branch information is missing**

With a new feature implemented in V7 (Multiple GL Accounts per Branch - see User Guide [page](#)), when a user unassigned to a branch posted a transaction for a client assigned to branch, the journal entries were logged through Intra Branch Transfer GL account defined in Accounting setting, because the default rule defined for All Branches included the unassigned branches as well.

In V7.8 version, when a user unassigned to a branch posts a transaction (original transaction or reversal transaction) for a client assigned to a branch, the journal entries are logged in the client's branch, are not logged anymore through Inter Branch Transfer GL account.

Sandbox release date: Thursday, 6th of Sept 2018

Production release date: Friday, 7th of Sept, 2018
