Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

1. New Features

[APP-499] - Penalty Accrual - Overdue Balance Method

Mambu is making several improvements to the penalties accrual and re-application functionality. At present, there are some differences between the penalties calculation methods which Mambu wanted to make more consistent, also based on the feedback we have received from you so far. We have also sent an email notification regarding this on 15th Nov 2018.

Our aim with this feature is to standardise the behaviour of all penalties, such as penalty accrual which is done currently only for “Outstanding Balance” penalty calculation method. For more details, please review our user guide article, [here](#).

Important Note, Potential Action Required:

The new behaviour will be enabled into production or sandbox only per request for the time being. However, Mambu plans to make this the default behaviour in the near term. As such, this improvement will be enabled for all production environments by end of Feb 2019. Please reach out to support@mambu.com in order to request enabling this functionality on your sandbox or production.

Production release date: 30 November 2018
