Release Notes

# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com) or your account manager.

## Contents

### 1. Bug Fixes

[\[CORE-1406\] - Interest Accrued amount is incorrectly calculated for DBEI loan accounts created with the new rounding version](#)

## 1. Bug Fixes

### **[CORE-1406] - Interest Accrued amount is incorrectly calculated for DBEI loan accounts created with the new rounding version**

The interest accrued amount for a Loan Account with Declining Balance Equal Installments created with new rounding version was calculated with the next formula:

- $(\text{Principal Balance without the remaining Principal Due from the first installment}) * \text{Interest Rate per Day} * 1 \text{ day}$

In V8.4, Mambu fixed this issue and now the interest accrued is calculated with the next formula:

- $\text{Principal Balance} * \text{Interest Rate per Date} * 1 \text{ Day}$

Production release date: 05 November 2018
