

MAMBU

4.6.18

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

1. Bug Fixes

[CUS-327] - "Account in Arrears" notification is not correctly triggered for loan accounts

The logic that sends out notifications for accounts falling in arrears, has now been updated so that it will be consistent with the values shown in the UI. Previous to this fix, the formula which retrieved the matching accounts for such case was counting full days before sending the alert. Since in the UI we were already displaying accounts which have just become in arrears as 1 day, we have applied the same formula for the notification mechanism to eliminate any further confusion.

Production release date: Tuesday, 28th of November, 2017
