

MAMBU

4.6.23

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

1. Bug fixes

[ADM-156] - Non-admin user with necessary Branch/User related permission can't modify another non-admin user Branch assignment

This fix provides non-admin users that have access to all branches of the organizations, the ability to modify Branch assignment for other non-admin users.

[NEO-378] - SQS doesn't work in new ap-south-1 AWS region

With this fix Mambu added support for SQS queues created in region ap-south-1.

Production release date: Friday, 22nd of December, 2017
