

MAMBU

4.6.5

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

Contents

1. Improvements

[\[KMBU-4\] - Secured SSL connections should not be enforced to TLSv1](#)

2. Bugs

[\[MBU-18793\] - Unexpected error when posting a repayment on a locked account](#)

1. Improvements

[KMBU-4] - Secured SSL connections should not be enforced to TLSv1

Connection was failing for enforced SSL connections to TLSv1, due the third party refusal on TLSv1. Now Mambu supports TLS v1.0, TLS v1.1 and TLS v1.2 when negotiating the protocol during SSL handshake for webhook calls.

2. Bugs

[MBU-18793] - Unexpected error when posting a repayment on a locked account

An unexpected error was thrown when trying to post a repayment for a locked account, however Mambu has corrected this behaviour and when posting a repayment to locked accounts, the repayment should be allocated accordingly.

Sandbox release date: September 7th, 2017
