

# MAMBU

## 4.6.7

Release Notes

# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com) or your account manager.

## Contents

### 1. Improvements

[\[KMBU-145\] - Preview Documents Client-Side with GroupDocs as Fallback](#)

### 2. Bug Fixes

[\[MBU-18790\] - 'Permission denied' message received when filtering 'Repayments Collection' by group if they don't have permission to see other credit officer clients](#)

## 1. Improvements

### **[KMBU-145] - Preview Documents Client-Side with GroupDocs as Fallback**

With 4.6.7 Mambu has added an improvement to document preview, since the integration with GroupDocs to provide this functionality, was causing some performance issues.

Mambu is now streaming images from the server with no additional processing, being thus rendered natively. PDF files are also streamed from the server and rendered by pdf.js for example.

GroupDocs is still used as a fallback mechanism for converting on server side the unsupported documents types to pdf, such as Office suite documents, nonetheless the user experience will be consistent between the two.

## 2. Bug Fixes

### **[MBU-18790] - 'Permission denied' message received when filtering 'Repayments Collection' by group if they don't have permission to see other credit officer clients**

A permission denied error was shown and the list of repayments was not displayed for Repayments Collections custom view when filtering by group, if the user did not have permission to see other Credit Officer's clients.

We have corrected this behaviour and the repayments belonging to clients assigned to the group are now displayed.

Sandbox release date: Wednesday, 27th of September, 2017
