1. Bug Fixes

[CORE-105] - "LAST_MODIFIED_DATE" field value is not updated in database after the schedule is edited and updated for a loan account

When editing the schedule of an account, the "LAST_MODIFIED_DATE" field from the database remained the same with the disbursement transaction date. In V5.11 Mambu fix this issue and now the "LAST_MODIFIED_DATE" is correctly updated when editing the schedule.

[CORE-569] - Late payments are incorrectly allocated on due penalties balance for dynamic loan account with late installments

When 2 late repayments were entered to pay the due amounts, the penalties weren't correctly paid, because we only capture the penalty due at account level. To fix this issue, when we pay penalties, we calculate how many penalties are due for each installment and pay them according to the repayment allocation order.
