

MAMBU

5.20

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

1. Bug Fixes

[ADM-492 - Upload fails on production and dev environments](#)

1. Bug Fixes

[ADM-492] - Upload fails on production and dev environments

Due to an antivirus update when trying to upload any file in any component (e.g. import a file, make an attachment for a client and so on) the “Error occurred while scanning file” error message was displayed.

In V5.20, Mambu fixed the issue and now the upload of images and documents in any component is possible.

Production release date: Tuesday, 17th of April 2018
