# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com) or your account manager.

## 1. Bug Fixes

### [DEP-316] - Random file upload and report generation failures on EU environments

Users in Europe environments were randomly experiencing document upload and report execution failures.

This problem seem to be caused by our infrastructure provider and the root cause was not fully identified at the moment. However, a fix is now in place in Mambu, that ensures document uploads and reports executions are working accordingly.

Production release date: We're starting to rollout this release on April 28th and continue propagating these changes in the following days on all the environments.
