

MAMBU

5.28

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

[\[NEO-468\] - Concurrent loan accounts updates from API1.0 sets null loan key for investor funds](#)

1. Bug Fixes

[NEO-468] - Concurrent loan accounts updates from API1.0 sets null loan key for investor funds

When concurrent loan account updates were performed via API or UI, the key for investor funds (FUNDS_ENCODEDKEY_OWN) was set to NULL in the database, an exception was thrown (API) and the funding tab was not accessible.

In V5.28, Mambu fixed this issue and now the key for investor funds is not set to null, the funding tab can be accessed and is displayed properly.

Production release date: Tuesday, 08th of May 2018
