V6 - Release Candidates

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What are Release Candidates?

An "RC" is actually a Release Candidate for the new major version that was just released on Sandbox, that has the scope of stabilizing the new product version. It represents a "beta" version, with potential to be a final version if not other problems are found in it.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continuously improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com.

Contents

V6-RC02

1. Bug fixes

[NEO-532] - Edit Schedule option is missing after Sell Loan Fraction action on loans with Fixed Interest Commission

Edit Schedule was unavailable after a loan fraction was sold for loans with Fixed Interest Commission, however this was fixed with this issue, and the edit schedule option is now available for this configuration.

[NEO-452] - Journal entries are not logged in accounting for a Repayment on principal balance, for Offset Loans

For an Offset loan account type, journal entries were not logged at write off, however with this fix they are properly logged as per existing accounting rules.

[CORE-570] - Exception is thrown when applying accrued interest on a Tranched loan account, in a non-disbursed tranche date

An exception was being thrown in the scenario described in the title, however it is now possible to manually apply the accrued interest without any exception being thrown.

[CUS-587] - Live Migration for CustomFieldLinks is not finishing when there are multiple batches

Mambu has fixed the Live Migration for CustomFieldLinks so that it takes into consideration the already migrated entities.

Sandbox release date: Friday, 13th of April, 2018

V6-RC03

1. New feature

[CORE-543] Total Due Repayment amount for revolving credit loans

Mambu added a new option for repayment schedule based on a % of the total balance. See the detailed description on our User Guide, [here](#).

Sandbox release date: Thursday, 19th of April, 2018

V6-RC04

1. Bug Fixes

[CUS-754] Product linking not possible between loan product and current account or fixed deposit with Accrual methodology

Mambu has addressed this issue and now Fixed deposit or Current account deposit product types with accrual methodology are available in the dropdown list when linking.

[API-1451] Inconsistent error returned when updating account custom fields with POST request via API 1.0

An error was received when updating a Custom Field via POST on API 1.0, however this has been fixed and the custom fields can now be updated successfully.

2. Improvements

[ADM-21] Performance improvements for retrieving documents from file storage

Mambu has added an index to DOCUMENT table's LOCATION column in an effort to improve performance. In the case that a document is searched for by location, in the file storage, Mambu will use a recently added index to filter the results and make the response time smaller.

Sandbox release date: Thursday, 26th of April, 2018

V6-RC05

1. Bug Fixes

[DEP-316] - Random file upload and report generation failures on EU environments

Users in Europe environments were randomly experiencing document upload and report execution failures.

This problem seem to be caused by our infrastructure provider and the root cause was not fully identified at the moment. However, a fix is now in place in Mambu, that ensures document uploads and reports executions are working accordingly.

Sandbox release date: Monday, 30th of April, 2018

V6-RC06

1. Bug fixes

[NEO-601] - Cannot close (fully pay) funded loans created before V6

After V6 release on Sandbox environment, a funded loan couldn't be fully paid because in Loan Funded transaction the interest amount was set to null.
In this V6-RC06 version, Mambu fixed this issue and now a funded loan can be fully paid.

[NEO-305] - Cannot reschedule P2P accounts and an unexpected error is displayed on UI

When we've entered a repayment transaction with a very small amount for a funded loan with at least one investor with a small percentage, the account wasn't able to be rescheduled anymore.
In V6-RC06 version, Mambu fixed this issue and now the reschedule can be done without any error.

[CUS-693] - Credit Officer without "Manage Clients Assigned to Other Credit Officers" permission cannot access some Custom Views

Credit Officers without "Manage Clients Assigned to Other Credit Officers" cannot access the custom views for the entities filtered by a branch.
In V6-RC06 version, Mambu fixed this issue and now the custom views can be accessed.

Sandbox release date: Thursday, 10th of May, 2018

V6-RC07

1. Bug fixes

[NEO-602] - Error 500 returned when getting funder schedule via API for an account with disbursement date equal to the first repayment date

For funded loans that have the same disbursement and repayment date the funder schedule could not be retrieved via the API due to an error. This was fixed and now the funder schedule can be successfully retrieved.

2. Feature roll-back

[CUS-864] - Revert Changes done in CUS-200

In V6 sandbox release, [CUS-200] - [Update the layout of the filter element in all Custom Views] was introduced as a feature change, with the intention of improving the usability of Custom Views. After receiving feedback, the change was rolled back and will be reintroduced in a later major release, together with better usability changes.

Sandbox release date: Thursday, 17th of May, 2018
