## 6.4

Release Notes

# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com) or your account manager.

## Contents

### 1. Bug Fixes

[\[DEP-354\] - Cannot post Withdrawal on a deposit account that is Dormant and has 0 overdraft limit](#)

[\[NEO-414\] - Revolving Credit Loan disbursements are not validated against the Credit Arrangement valid period](#)

[\[NEO-666\] - Cannot post repayment transactions for P2P accounts with Fixed Interest Commission set to 0](#)

### 2. New Features

[\[CORE-594\] - Custom repayments allocation for dynamic loans - phase 1](#)

## 1. Bug Fixes

### **[DEP-354] - Cannot post Withdrawal on a deposit account that is Dormant and has 0 overdraft limit**

When an overdraft account in Dormant state, no withdrawal can be made either from UI or API. In V6.4, Mambu fixed this issue and now Withdraw button is display in UI and Withdrawal transaction can be made via API, even if the account is in Dormant state.

### **[NEO-414] - Revolving Credit Loan disbursements are not validated against the Credit Arrangement valid period**

A revolving credit loan account can be added to a Credit Arrangement, but also activated under a CA, even after the "Valid Until" date or the Credit Arrangement. In V6.4, Mambu added a validation against "Valid Until" date for a revolving credit that belongs to a Credit Arrangement.

### **[NEO-666] - Cannot post repayment transactions for P2P accounts with Fixed Interest Commission set to 0**

For a P2P loan account with fixed interest commision set to 0, a repayment cannot be posted. In V6.4, Mambu fixed this issue and now, the repayment is successfully posted for such accounts.

## 2. New Features

### **[CORE-594] - Custom repayments allocation for dynamic loans - phase 1**

In V6.4 Mambu added the first phase of a new feature: the possibility of entering custom repayments for dynamic loans. In this first phase, this functionality is available only from API 2.0, where the principal, interest, fees (fee type), and penalties amount can be specified in the API call. For more details, please access our User Guide [page](#).
