Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

2. Improvements

[\[CORE-819\] - Rename the label for Loan Configuration, related to Tolerance Period on Non-Working Days method](#)

1. Bug Fixes

[CUS-610] - Number of Installments placeholder is missing from Manual Notification Templates having Loan Accounts as target

Number of Installments placeholder was missing for Loan Accounts target and this was corrected with this ticket. Furthermore, we have also added this placeholder for following automatic template events: ACCOUNT_IN_ARREARS, LOAN_ANTICIPATED_DISBURSEMENT, REPAYMENT_REMINDER.

[CORE-578] - Repayments collection list is not refreshed when a repayment failed from being processed

During bulk payment via Repayments Collections, when a repayment failed from being processed, for example when a repayment had principal set to 0, an error message was displayed but the repayment list was not refreshed. Only after a second filtering option the repayments list would display the failing repayment/s. This has been addressed, and now beside the error message the repayments list is also refreshed so that only the failed repayments are displayed.

2. Improvements

[CORE-819] - Rename the label for Loan Configuration, related to Tolerance Period on Non-Working Days method

Mambu has renamed a product configuration option which allowed choosing whether to include or exclude non-working days for the arrears tolerance period: "Tolerance Period Non Working Days Method". Since this method also affects the Penalty interest calculation, the label of the option was changed to "Non-Working Days in Arrears and Penalty Calculation Method" to reflect clearly the impact on both arrears and penalties.

Sandbox release date: Tuesday, 26th of June, 2018

Production release date: Wednesday, 27th of June, 2018
