

# MOVE YOUR PEOPLE AND YOUR BUSINESS FORWARD.

Meet Degreed: the platform for progress. Degreed helps groundbreakers (like you?) use data-driven insights to build and measure the skills their teams need next — so they can keep their businesses moving forward every day.

## CONNECT YOUR LEARNING TO YOUR BUSINESS STRATEGY

Connect your people to the resources they use to learn and grow — millions of courses, videos, articles, books and podcasts, from thousands of sources, including your LMS, your content, and your people — all tied to your organization's skills and jobs.

## BUILD THE SKILLS THAT MATTER, EVERY DAY

Personalize development for everyone with data science and machine learning, and build the skills that really matter—both to your workforce and to your business leaders. Then amplify your organization's experts, and power a culture of continuous improvement and innovation.

## IMPROVE, ADAPT, AND ADVANCE YOUR BUSINESS

Get actionable insights on everything your workforce is learning, and visualize progress within their skill sets. So you can make better, smarter investments in your people, and keep your company's most valuable assets ready for the next big thing.

## SMARTER

Active users are 50% more likely than non-users to say they're more productive, more effective in their jobs, and growing their careers.

## FASTER

9 in 10 Degreed clients agree they're building more productive cultures, adapting to shifting needs faster, and learning more efficiently.

## BETTER

"I've implemented a lot of HR systems in my day, and very few product companies treat the customer the way that Degreed does. It's incredibly refreshing."

CAMERON LEWIS, DIRECTOR OF GLOBAL TALENT DEVELOPMENT, XILINX
