President’s Cabinet

Yves Salomon-Fernandez, Ph.D.
Interim President

Lynn Hunter, Ed.D.
Vice President for Academic Affairs

Kathleen Kirleis, J.D.
Vice President for Finance and Administration

Robin Nelson-Bailey
Vice President for Human Resources, Employee Relations, & Compliance and Affirmative Action Officer

Mary Shia
Vice President for Institutional Advancement & Alumni Relations

Lisa Slavin
Assistant Vice President for Enrollment Management

Elizabeth Blumberg, Psy.D.
Dean of Students

Karen E. Britton
Executive Assistant to the President

Lee Koh
Director of Marketing and Institutional Communications

Colleen Coffey
Director of the Metrowest College Planning Center

Lynne Davis, Ed.D.
Dean of Health Sciences

Chitra Javdekar, Ph.D.
Dean of STEM

Christopher LaBarbera, Ph.D.
Dean of Humanities and Social Sciences

Susan Maggioni, Ph.D.
Dean of Business and Professional Studies
Dear MassBay Alumni and Friends,

MassBay Community College is what a place of higher learning should be. Every day on this campus – in our classrooms, in student clubs, in meeting spaces and athletic fields – innovation, hard work, and new discoveries abound. The work that each of us do here every day moves us forward as a community, and no better investment can be made than the one we make in our students as they pursue their college degrees.

The book you hold is more than a report. It’s a collection of our stories, our students’ accomplishments – and your gifts and our student’s dreams fulfilled.

Your financial gifts have helped provide scholarships and support to students in need and ensured more students could reap the rewards of a MassBay education. Our students come from diverse backgrounds and life experiences. Many work multiple jobs and juggle multiple commitments. All are at MassBay to build a better future. Without your support, our students and their stories would not be possible.

With appreciation for all of your support,

John O’Donnell, Ph.D.
President (2011-2015)
Yves Salomon-Fernandez, Ph.D. has been appointed Interim President of Massachusetts Bay Community College, stepping in for President John O’Donnell, who retired from his post in August.

Dr. Salomon-Fernandez, who joined the College in 2010 as a dean and most recently served as Vice President for Strategic Planning and Partnership Advancement, is credited with strengthening MassBay’s profile within the community and increasing the College’s engagement with industry leaders in the science and engineering fields and with regional colleges and universities.

A frequent contributor to the New England Journal of Higher Education and a blogger for Inside HigherEd, Dr. Salomon-Fernandez writes about funding accountability, the “middle skills gap” in the regional economy, as well as other top issues in higher education. She also serves on the faculty at Salem State University, where she teaches graduate-level courses in research methods, leadership, assessment, and evaluation, and has also taught at Cambridge College and Boston College. She provided guidance on MCAS assessment to public school districts as a member of the Assessment and Accountability team with the Massachusetts Department of Education. Internationally, she has served as a consultant to the Bermuda Ministry of Education on K-12 assessment and accountability and accompanied the United Nations to Mexico as an election observer. She currently sits on the Executive Board of Directors of the Massachusetts Network of the American Council on Education’s National Network of Women Leaders, the MetroWest Chamber of Commerce, the MetroWest/495 Corridor Partnership, and is the former co-chair of the Governor’s STEM Council, College & Career Readiness Committee.

Dr. Salomon-Fernandez earned her Ph.D. in educational research, measurement, and evaluation from Boston College, her master’s degree in economic history from the London School of Economics, and her bachelor’s degree in political science and international relations from the University of Massachusetts, Boston. She is fluent in four languages: English, French, Haitian Creole, and Spanish.

“I look forward to working with the exceptional faculty and staff at MassBay and our partners in this new capacity, to provide high quality education and co-curricular experiences for the students of MetroWest. I thank President O’Donnell for having been a great mentor to me and for having established a foundation at MassBay that I can build upon. I am humbled by the Board’s decision and honored to continue to serve the College.”

- Yves Salomon-Fernandez, Ph.D.
MassBay Ranked No. 1 in Massachusetts

Massachusetts Bay Community College is ranked No. 1 among two-year colleges in Massachusetts and No. 2 in New England in a new report by the Brookings Institution that measures colleges based on earnings outcomes and the salaries that graduates command in the marketplace.

Researchers looked at mid-career earnings, occupational earnings, and student loan repayment rates and compared the data to the baseline. MassBay Community College out-performed all two-year colleges in Massachusetts and came in second, behind New Hampshire Technical Institute-Concord Community College. Overall, MassBay ranked 16th among all two-year college nationwide.
John R. Brown, Cristel Callupe Chavez, and Suhaily Penix are the recipients of the Jack Kent Cooke Scholarship, the largest and most prestigious scholarship for community college students in the country. Brown, Chavez, and Penix will receive up to $40,000 each year for up to three years to cover tuition and school-related expenses to complete their bachelor’s degrees at four-year institutions.

Brown, a former student trustee on MassBay’s Board of Trustees, is attending Suffolk University. Penix, who received an Honorable Mention from the Barry M. Goldwater Foundation for her scientific research, is attending Wellesley College. Chavez, who participated on the MIT Solar Electric Vehicle Team as a student at MassBay, is attending Dartmouth College.

“This is an incredible honor for our students and for the College.”

-Bryan Wint, coordinator of transfer affairs and articulation at MassBay.

Photo, from left to right: John Brown, Suhaily Penix, Cristel Callupe Chavez
**Genzyme Grant & Mentor Program**

Genzyme Charitable Foundation awarded MassBay Community College with a $26,500 grant to support the College’s STEM Mentor Program, which encourages students from underrepresented communities to consider careers in science, technology, engineering, and math fields.

The grant from Genzyme, a Sanofi company, will help fund the joint Mentor program, through which scientists from Genzyme provide academic guidance, job shadowing, and opportunities for bonding at networking and social events to MassBay students. The mentor program particularly focuses on students of color, low income backgrounds, first in their families to attend college, and women – profiles not typically found in large numbers in the science and technology fields — to consider STEM careers by pairing them with current professionals who share their career interests or backgrounds.

“This mentoring program gives our students opportunities to build important social-professional relationships that go beyond traditional academic experiences such as academic advising and student clubs. Students can learn to navigate the academic and professional world from their mentors who offer valuable insights for personal and professional growth.”

-Chitra Javdekar, Dean of STEM division at MassBay
NSF Grant: Boston College & MassBay Grant

Boston College’s Lynch School of Education and Massachusetts Bay Community College are collaborating on a new career initiative to prepare area high school students for careers in the fields of science, technology, engineering and mathematics (STEM). The $891,000 Advanced Technological Education grant from the National Science Foundation will help create pathways to science and technology-based careers for approximately 300 to 500 students from Waltham, Framingham, and Boston Public Schools over the next three years.

Throughout the program, students will be introduced to coding, robotics, electronics and technology. The program will work with students of color and women beginning in their freshman year of high school, with the goal of helping them transition to study at MassBay to obtain certificates or an associate’s degree, then enter the business world.

“This collaborative endeavor with Boston College adds a new dimension to the programs, classes and support MassBay faculty and advisors provide to students who dream of working in the STEM fields. We’re excited about the opportunity to serve our students, local employers and the Greater Boston community through this innovative, engaging, and project-based program that will educate and empower young men and women to enter the tech economy with the skills and support they need to flourish.”

-Shamsi Moussavi, MassBay professor of computer science and the lead investigator on the project.

USACE-NE & MassBay

The U.S. Army Corps of Engineers, New England District, has partnered with Massachusetts Bay Community College to help build the future generation of skilled engineers and scientists. Through the partnership, MassBay and USACE will work to identify, develop, and collaborate on specific areas of research where MassBay students will be able to receive college credit while supporting the ongoing work of USACE.

The partnership also provides opportunities for USACE engineers and MassBay faculty to collaborate on the development of science, technology, engineering, and mathematics courses with real-world applications. USACE would also provide students with mentorship and professional development.

“Through this partnership with MassBay, the USACE will move closer to achieving one of its primary objectives which is to ‘shape the workforce of the future’ by attracting a highly competent and diverse STEM workforce.”

-Col. Christopher J. Barron, Commander and District Engineer of the New England District.
MassBay Athletes Compete in National College Golf Tournament

Chris Lynch and Mike Kurson were the first in college history to compete in the NJCAA National Golf Tournament at the Chautauqua Golf Club in Chataqua, N.Y. in early June. Congratulations to our student-athletes and to Coach Joe Freeman!

29 Who Shine

Suhaily Penix was selected this past spring as one of “29 Who Shine,” a group of exceptional students from Massachusetts’ public colleges and universities who have demonstrated excellence in academic achievement. At a ceremony with other honorees at the State House, Penix was honored by Governor Charlie Baker and the former Commissioner of Higher Education Richard M. Freeland this past spring.

Penix’s academic excellence is far-reaching. She was the only student nationwide to be recognized by the Barry M. Goldwater Scholarship Foundation, the awarding body for the highest and most prestigious undergraduate prize in science, engineering, and mathematics. She is also the recipient of a Jack Kent Cooke Scholarship, one of the largest and most prestigious scholarships for community college students nationwide.

A wife and mother of three, Penix currently attends Wellesley College through the Davis Scholars Program. As part of a continuing research, she plans to study gene regulation in response to membrane receptor-mediated extracellular signaling, while teaching and mentoring undergraduate students in the Boston area.

“I have a goal to earn my Ph.D. in molecular biology. I know I have the power and ability to achieve that because of the education and support I’ve received at MassBay.”

- Suhaily Penix
Faculty and staff, veteran students, and members of the MassBay Foundation gathered for the special reception in March to thank Jill Jacobs and Carl Whittaker of the Herb & Maxine Jacobs Foundation for their generous donation for the installation of the elevator in the Veterans Bunker. Their gift has made the Veterans Bunker, a dedicated resource area for MassBay students who have served in the U.S. Military, a fully accessible space for all students.
Divisional Awards go to the students who earned the highest grade point average in their respective academic disciplines. Students are awarded with a plaque and an honorarium of $250 from the MassBay Foundation.

**All-College Academic Excellence Award**
All-College Academic Excellence Award is the most prestigious academic award at Massachusetts Bay Community College. It is presented annually to the associate degree graduate(s) who earn the highest grade point average of the entire graduating class. Students are awarded honorarium of $500 provided by the MassBay Foundation. This year, MassBay was proud to honor Cinthya Monteiro and Marissa Wanders, who both graduated with perfect 4.0 grade point averages.

Institutional Advancement and Alumni Relations

The Office of Institutional Advancement has tried to capture, in earnest, the names of all individuals, groups, and organizations that have supported Massachusetts Bay Community College and the MassBay Foundation in the academic year 2014-2015. If we have omitted your name, please contact us to let us know and accept our sincerest apologies.

For more information about how to support the MassBay Foundation or the College, please contact:

Mary Shia
Vice President for Institutional Advancement & Alumni Relations
Executive Director of the MassBay Foundation

Email: mshia@massbay.edu

Gwen Mann
Special Programs and Stewardship Officer
Phone: 781.239.3126
Email: gmann@massbay.edu
Greetings from the MassBay Foundation

Dear Friends,

We’ve all heard it before: “It is better to give than to receive.”

When you give to the Massachusetts Bay Community College Foundation, you place yourself in the unique position of understanding and appreciating both sides of this magnificent quote. Through your gift, MassBay students receive something they never thought possible: a chance to realize their dreams. Everywhere you look, you’ll see the passion, hope, and optimism in the eyes of our students as they go to class, work individually or in teams, or in collaboration with our esteemed faculty and staff. One day, soon, in the not so distant future, each one of these students will make a difference in the world. I know that with each gift, with each scholarship we award, we are helping change lives. This is what motivates us as a Foundation Board.

Our students come from all walks of life. Some are recent high school graduates looking to transfer to a four-year institution. Others are looking to advance their careers with additional education and certification. Many are mothers or fathers, juggling multiple priorities and multiple jobs. Many have roadblocks in their way as they pursue their education, and sometimes, all they need is a little support to push those roadblocks aside. That’s where your gift is invaluable.

MassBay serves as a springboard for our students’ ambitions, and your gift helps them go farther. Thank you for joining us in supporting access, success, and innovation. We are so very grateful for all that you continue to do for the Foundation and MassBay Community College students.

Always the best,

Michelle Drolet

MassBay All Vehicle Show - 2015
MassBay Community College and The Art Connection are delighted to be partners in providing regional artists a way of giving back to their community, by donating their artwork for public exhibition at the College.

This College partnership with the Art Connection was expanded this year to include a video project. Students in the Broadcast Journalism course produced and filmed interviews with several of the artists discussing their artistic process, and the particular value of donating their work to the college community. The edited video will be posted to the MassBay.edu website and would serve as a record of the artists’ creative process and involvement in community outreach.

Grant Awards

AR TAIC-IT, National Science Foundation-SBIR
Grant to support a student and faculty team from the College’s Computer Science Department in conducting an assessment of a small business’s (Artaic Mosaic, Inc.) Information Technologies Network and develop solutions to create a more cohesive, stable, and efficient networking system that would improve company-wide workflow.
$30,000

AR TAIC-Mechanical Engineering, National Science Foundation-SBIR
Grant to support a student and faculty team from the College’s Engineering Department in devising an automated tubing solution for Artaic Mosaic’s tile assembly system in order to streamline the manufacturing process and free human workers for more highly skilled tasks.
$30,000

TRANSFORM—Transforming liberal arts careers to meet demand for advanced manufacturing workforce, National Science Foundation-ATE
Grant for MassBay and Northeastern University faculty to work collaboratively in developing a 12-month fast track advanced manufacturing for liberal arts graduates. The program would use Summer boot camps, hands-on and project-based learning, and internships to facilitate their career transitions.
$199,996

Health Care Workforce Transformation Training, subawardee of Partnerships for a Skilled Workforce’s Commonwealth Corporation
Grant to recruit nursing and medical assistants, provide instruction, develop nursing assistant curriculum for a Frontline Leaders training program in advanced geriatric education would improve the quality of care for elderly patients. This program has developed out of an earlier health care workforce planning grant.
$16,754

Performance Incentive Fund Grant from the Massachusetts Department of Higher Education
Grant for an Advancing Student Learning Outcomes project to increase the level of assessment-related activities at the college and provide professional development opportunities to faculty in this area. Activities such as faculty brown bag discussions, an annual assessment conference, and the development of course learning outcomes resulted from this grant.
$119,067

Young Men of Color, MassBay Foundation
Grant to increase the enrollment, recruitment, retention, and success rates of young men of color at MassBay. During the academic year, the program provided one-on-one advising, mentoring, leadership luncheons featuring prominent local leaders, and an array of opportunities and supports male students of color.
$11,000

MassBay Community College - Report on Giving, 2015
UMass Boston/Broadening Advanced Technological Education Connections’ (BATEC) Subawardee of National Science Foundation
Grant for enhancing computer science opportunities at the college. The grant supported the operations of TechBay, a student-run technology resource center; student internships; and STEM Summer Bridge programs for middle and high school students. In addition, there were cross-disciplinary curriculum development activities for faculty.

$63,737

Massachusetts Life Sciences Center Planning
Grant for conducting a comprehensive and collaborative planning study to develop an Applied Life Sciences and Technology Center (ALSTC) as a part of a proposed new downtown Framingham campus for the college. The analysis resulted in an extensive plan for use in MassBay’s future development.

$50,000

Chrysler Foundation
Grant to support MassBay’s Mopar College Automotive Program. The grant allows the college to conduct presentations in schools and college fairs, campus visits, parent information sessions, teacher workshops, industry advisory board meetings, and other activities that increase awareness of the college’s automotive programs.

$2,500

MathWorks Community
Grant for engaging and inspiring local youth in Natick, Framingham, and other MetroWest communities in STEM education. Through this support, high school students were able to attend STEM Expos and Summer Bridge programs at MassBay and college students visited local schools to give presentations about opportunities in science.

$2,500

Sudbury Foundation
Grant to conduct a Millennial Youth College Readiness Study of MetroWest teens and young adults. A research team that included college students conducted interviews and focus groups with young people throughout the region to ascertain what barriers they face in going to college and whether early college programs might help to overcome them.

$25,000

PARCC–Core to College Grant from the Massachusetts Department of Early and Secondary Education
Grant for providing education and activities to parents about the transition from high school to postsecondary education. Programs focused on increasing the engagement of low income families in planning for college.

$2,000

U.S. Department of Labor, Trade Adjustment Assistance Community College & Career Training Program Grant (TAACCCT 4)
For a Guided Pathways to Success in STEM (GPSTEM) project, as part of the Massachusetts Community Colleges Consortium. This 3-year grant supports advancing a comprehensive approach to training and education needs for Massachusetts’ workers and employers and developing articulated pathways to careers in high-growth science and technology sectors, including advanced manufacturing and healthcare.

$525,000

Grant Awards
Grant Awards

$119,067

U.S. Department of Labor, Trade Adjustment Assistance Community College & Career Training Program Grant (TAACCCT 4)
For a Guided Pathways to Success in STEM (GP-STEM) Navigator, as part of the Massachusetts Community Colleges Consortium. Utilizing the Complete College America’s Guided Pathways to Success Model, this 3-year grant supports advancing a comprehensive approach to training and education needs for Massachusetts’ workers and employers and developing articulated pathways to careers in high growth science and technology sectors, including advanced manufacturing and healthcare.

$202,522

Workforce Incentive Fund, Massachusetts Department of Higher Education
Provides support to increase workforce development opportunities for MassBay students.

$50,000

Bridges to College Grant from Massachusetts Department of Higher Education through Jewish Vocational Services
Provides support for identifying barriers and needed services for increasing College enrollment and completion by members of underrepresented groups.

$18,500

Commonwealth Dual Enrollment Grant, Massachusetts Department of Higher Education
Offers students in MetroWest area schools opportunities to take college classes in
Graduates of the nursing program were welcomed into the profession at the symbolic nursing pinning ceremony in June.
Grant Awards

Provides support for training of Massachusetts Association for the Blind staff for advancement in their fields and earning college credentials.

**$54,000**

**S-STEM Scholarship for Science, Technology, Engineering and Math Grant, National Science Foundation**

A multi-year grant to provide academic and need-based scholarships to MassBay STEM students. 20 awards are given out each year.

**$347,050**

**STEM Starter Academy Grant I, Massachusetts Department of Higher Education**

Provides support to build, enhance, and sustain MassBay’s capacity to graduate a greater number of students in associate degree and certificate STEM programs that lead to employment or transfer to four-year institutions.

**$347,178**

**STEM Starter Academy Grant II, Massachusetts Department of Higher Education**

Grant for an Advancing Student Learning Outcomes project to increase the level of assessment-related activities at the college and provide professional development opportunities to faculty in this area. Activities such as faculty brown bag discussions, an annual assessment conference, and the development of course learning outcomes resulted from this grant.

**$119,067**

**AMP it Up! MetroWest Tinker Shop Grant, Massachusetts Development Finance Agency’s Commonwealth Advanced Manufacturing Futures Program**

Supports STEM-focused activities that allow middle and high school students to learn about educational programs and career fields related to advanced manufacturing.

**$9,000**

**Perkins Grant, Massachusetts Department of Elementary and Secondary Education**

Provides support for career and technical education to prepare students for in-demand, sustainable wage jobs.

**$168,544**

**Rapid Response Incentive Grant, Massachusetts Department of Higher Education**

Supports STEM-focused activities that allow middle and high school students to learn about educational programs and career fields related to advanced manufacturing.

**$30,000**

**S-STEM Scholarship for Science, Technology, Engineering and Math Grant, National Science Foundation**

A multi-year grant to provide academic and need-based scholarships to MassBay STEM students. 20 awards are given out each year.

**$347,050**

**STEM Starter Academy Grant I, Massachusetts Department of Higher Education**

Provides support to build, enhance, and sustain MassBay’s capacity to graduate a greater number of students in associate degree and certificate STEM programs that lead to employment or transfer to four-year institutions.
