

Paralegal Studies

Associate in Science

DIVISION OF BUSNIESS & PROFESSIONAL STUDIES

For students interested in the law, the paralegal profession is a great start to an exciting, challenging, and lucrative field. This program teaches students to prepare and draft legal documents, investigate and research legal issues, interview clients and witnesses, and render practical procedural assistance in law-related matters. This program combines a college curriculum of business, liberal arts, and legal courses, as well as hands-on experience in a law firm.

Students also receive training in a variety of on-line research methods used in many law offices that provide the legal researcher with immediate access to cases, statutes, administrative regulations, and numerous other authorities.

Upon successful completion, the Associate in Science Degree in Paralegal Studies is awarded.

Unauthorized Practice of Law Statement

A paralegal may work only under the supervision of an attorney and is not authorized to engage in the practice of law. The American Bar Association defines paralegal as "a person, qualified by education, training, or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible."
