

## **Division of Business and Professional Studies**

### **Associate in Science in Business Administration**

This program provides a general overview of accounting, economics, management, marketing, computer technology, and a strong foundation in the liberal arts preparing the students for entry-level careers in several aspects of business. This comprehensive degree program is designed to prepare students to transfer to a bachelor's degree program in Business Administration, Accounting or other business specific programs and/or compete for entry level professional positions in business. Students graduating from the Associate in Science in Business Administration will achieve proficiency in the college-wide learning outcomes.

Successful graduates of the program will be able to:

1. Apply foundational principles of accounting, economics, management, marketing, and computer technology within the business environment;
2. Identify and provide solutions for ethical issues that are found within business environments through case analyses;
3. Display professional behavior, ethical behavior, and communication skills that are tailored to the multicultural business environment;
4. Analyze and synthesize business knowledge through critical analysis, decision making, team building and problem-solving skills;
5. Identify possible business careers through self-assessments and through understanding careers that are available within businesses;
6. Explain, persuade, advocate and argue effectively when engaged with a variety of audiences;
7. Use scientific knowledge and methodology to test, validate, and update their knowledge about the natural world.
