

Associate in Arts in Liberal Arts: Psychology/Sociology

PROGRAM OUTCOMES

1. Demonstrate knowledge of introductory concepts, theoretical perspectives, and historical trends in the fields of Psychology and Sociology.
2. Analyze and interpret various research studies to evaluate scientific methods, variables, and empirical data, and use this information as the primary basis for engaging in critical thinking.
3. Evaluate competing theories by explaining, describing, and analyzing human behavior and social issues given a particular context or situation.
4. Maintain professional behavior and communicate effectively with others while exhibiting sensitivity toward interpersonal and cultural/diversity issues and the effect these variables have on behavior, society, and development.
5. Initiate and generate reading comprehension and writing skills throughout the curriculum while applying information technology to the analysis and evaluation of psychology and sociology.
6. Use scientific knowledge and methodology to test, validate, and update knowledge about the natural world.
