

Liberal Arts/Associates of Arts

Students graduating from the Associate in Arts: Liberal Arts Concentration will achieve skills represented through the college-wide learning outcomes. Students graduating from the A.A. Liberal Arts program will also be prepared for successful transfer to a baccalaureate institution.

Successful graduates of the program will be able to:

1. Think critically by evaluating arguments, drawing inferences and analyzing problems from multiple perspectives;
2. Locate, evaluate, document and synthesize information using appropriate technologies to conduct discipline-specific research;
3. Explain, persuade, advocate and argue effectively through written, oral and multimedia communication;
4. Engage in quantitative reasoning through mathematical problem-solving and applications;
5. Analyze major political, economic, social and cultural developments to form a better understanding of our contemporary world;
6. Demonstrate through analysis and creative expression how literature, philosophy and the arts reflect and explain human experience;
7. Engage in scientific reasoning, methodology and experimentation to foster an understanding of the natural world.
