MASSBAY COMMUNITY COLLEGE
ANNUAL REPORT ON GIVING

JULY 1, 2015 - JUNE 30, 2016
A LETTER FROM THE PRESIDENT

Dear MassBay Friends and Supporters,

During my first few months, I learned quickly that MassBay Community College is a place of active discovery, where students not only further their academic passions and gain skills for a new career, but uncover the potential and promise in themselves.

Different paths have led students to MassBay: recent high school graduates hoping to save money before they transfer to a four-year college or university; mothers returning to the classroom to show their children the importance of earning a college degree; and veterans reaping the benefits of the GI Bill after serving in the armed forces. Some are eager for a second chance to be the scholars they always imagined themselves to be.

Every day, I am deeply moved by the stories of how our students have benefited from a MassBay education, changing not only the trajectory of their lives, but of their entire family. I am also deeply inspired by how far our alumni go and who they become after they leave MassBay.

Their education at MassBay, as well as their path to a higher degree, would not be possible without friends and supporters like you. Your gift, no matter the size, has a tremendous impact. You help our students pay for tuition, textbooks, and necessary learning supplies. By giving, you remove obstacles and set them on a path to successfully complete their college degree.

On behalf of the entire MassBay community, thank you for your generosity of spirit, for your financial gifts, and for your commitment to investing in the future our students.

Our students deserve no less.

With gratitude,

David Podell, Ph.D.
President
MassBay Community College
Hasna Kazi
Life Sciences Major
Student Government Association President
Dear MassBay Friends and Supporters,

We all know that an education can open doors, but how do we open the doors to an education?

With your gift to the MassBay Community College Foundation, you have helped us do just that. This past year, we have witnessed many doors open for so many of our students for whom a MassBay education would not be possible without your financial support. Time and time again, we hear our students’ stories about the heart-breaking challenges they face. Yet, against all odds, our students survive and thrive, through the encouragement and support from the MassBay community and gifts from donors just like you.

A MassBay education serves as a springboard for our students’ ambitions and goals. Your gifts, both large and small, help them go further in their journey. By giving both time and money, you not only create access to a college education but you also help provide the support they need at critical junctures to cover tuition, fees, books, and materials necessary to complete their college degrees.

On behalf of the MassBay Community College Foundation, thank you for your generosity. For members of our community who feel they only have a small amount to give, know that even the smallest gift can help doors remain open for our students and make their dreams come true.

With gratitude,

Kevin Kane
Chair
MassBay Community College Foundation Board
MassBay 5K
MassBay Community College held its fourth annual MassBay 5K to benefit the Krystle Campbell Scholarship on Saturday, Oct. 2, 2016. Despite rain, more than 150 runners, volunteers, and sponsors helped participate to help raise more than $12,700. Special thanks to our Gold Sponsors, Middlesex Bank and Blue Cross Blue Shield of Massachusetts; our Silver Sponsors, Bose Corporation and Towerwall; our Bronze Sponsor, the Law Office of David J. Himmelberger; and to our many Power Sponsors who helped support the event.

New members were inducted into the national Psi Beta Honor Society at the Evening of Excellence ceremony in May. The Psi Beta society honors community college students studying and excelling in Psychology.
The MassBay Foundation awarded more than $157,000 in scholarships to 215 MassBay students in 2016 at its bi-annual Donor Appreciation and Scholarship Awards events in May and October. At the May event, 100 students received more than $74,000 in scholarships, and this October, students received nearly $83,000 in scholarships to help pay for tuition, fees, books, and other learning materials.

Among the students who received these scholarships were single mothers, veterans, first-generation college students, students with 4.0 grade point averages, athletes, and many more for whom the scholarship has made a MassBay education possible.

SANOFI GENZYME GRANT

Sanofi Genzyme, a leading global biotechnology and research firm, awarded MassBay Community College $37,000 to support the Science, Technology, Engineering and Math (STEM) Mentor Program at MassBay.

Now in its third year, the STEM Mentor Program works closely with scientists and professionals from Sanofi Genzyme, MathWorks, Boston Scientific, U.S. Army Corps of Engineers, and other industry leaders to provide students with one-on-one professional mentoring and networking opportunities.

The program aims to increase student awareness for the various STEM career paths, while providing encouragement, guidance, and support from professionals in the field to persist in their studies. Program activities include individual meetings, social events and career workshops, job shadowing, and internship opportunities.

The program actively recruits students of color and women, as well as mentors who themselves are from underrepresented groups in the STEM fields.

The STEM Mentor Program is also funded through the Massachusetts Department of Higher Education STEM Starter Academy grant.

Mentors and students celebrate at the end-of-year STEM Mentor ceremony at Sanofi Genzyme offices in Framingham.
MassBay Community College celebrated the inauguration of its sixth president David Podell, Ph.D. on its Wellesley Hills campus on October 6, 2016, in a ceremony marked by recognition of faculty and student achievement.

“On behalf of the Board of Trustees, it is my honor to officially install you, David Podell, as the Sixth President of Massachusetts Bay Community College,” said Board of Trustee Chair Thomas E. Pesich. “With hope and great confidence, we entrust you with the leadership of this institution.”

In his speech, President Podell highlighted many academic achievements of MassBay and its students and urged members of the community, which included college presidents, state legislators, and community leaders, to hold MassBay and community college education in high regard.

“The challenges faced by a community college are more difficult and complex. But the potential impact we make on our students’ lives is vastly greater. MassBay, like many other public community colleges, is launching its students to futures that are almost certainly otherwise unattainable,” President Podell said.

President Podell applauded single mothers, veterans, children of undocumented immigrants, first generation college students, and many others whom MassBay has helped find their path into Ivy League institutions, become active scientists and researchers, and discover hidden potential for academic success.

“To our guests, I ask you to be advocates for this transformative college,” President Podell said. “To the faculty, staff, and students, I urge you to feel as proud of MassBay as I do, and to work with me to make this already great college even greater; our students deserve no less.”

The College’s Board of Trustees made a unanimous recommendation last March to the Commonwealth’s Board of Higher Education to appoint Dr. Podell as MassBay’s sixth president. Following an extensive nationwide search, he was selected from a rich pool of talented and diverse candidates. Dr. Podell assumed his post in July.

Prior to MassBay, Dr. Podell served as the Vice President of Academic Affairs at Marymount Manhattan College. He previously served as the Senior Vice President for Academic Affairs and Provost of the College of Staten Island, City University of New York in Staten Island, N.Y. He earned his Bachelor of Arts degree in History from the University of Pennsylvania, his Master of Education degree in Child Development from the Harvard Graduate School of Education, and a Doctor of Philosophy in Educational Psychology from New York University.
Stacy Okada '16 is the only community college student this year to receive the prestigious Barry M. Goldwater Scholarship, the highest national undergraduate prize for Science, Engineering, and Mathematics. Okada was among a select group of students nationwide to receive this award, which included students at research universities such as Harvard, MIT, and Stanford University.

Okada received her A.S. in Biotechnology with a focus on forensic science from MassBay in May. She is currently attending UMass Boston studying Biochemistry, with plans to pursue a doctorate in Molecular Biology or Biochemistry.

While at MassBay, Okada worked on active cases with fellow biotechnology students, assisting district attorneys with forensic DNA analysis in open cases, including the “Lady of the Dunes,” the oldest open murder case in New England. As a student, she was also chosen for the Research Experience for Undergraduates, a 10-week summer program at Boston University funded by the National Science Foundation.

A married mother of two young girls, Okada made it a focus while at MassBay to mentor non-traditional women in STEM. She hopes to continue this work as she pursues her bachelor’s degree.

Okada is also the only MassBay student this year to receive the Jack Kent Cooke Scholarship, one of the most prestigious scholarship for community college students in the country, which awards up to $40,000 a year for up to three years for tuition and school-related expenses. Okada has also been awarded the Foster Furcolo Scholarship, awarded to a graduate at each of the 15 community colleges in Massachusetts to attend UMass Boston.
Stacy Okada '16, with her husband and daughter, celebrated the recognition of the Goldwater and Foster Furcolo Scholarships and making Dean’s List at the Evening of Excellence ceremony in May.
Abraham Guerrero ’16 was named one of the Commonwealth’s 2016 “29 Who Shine” by the Department of Higher Education for his academic and civic achievements.

The “29 Who Shine” Award recognizes 29 outstanding students from each of the Commonwealth’s community college, state university, and UMass campuses. Guerrero and other recipients were honored at a ceremony in May at the State House with Governor Charlie Baker, Commissioner of Higher Education Carlos Santiago, and Secretary of Education James Peyser.

Guerrero, who majored in General Studies and was an Honors student at MassBay, is currently pursuing his bachelor’s degree in economics at Tufts University.

“I congratulate Abraham and all 29 of the 2016 award recipients and thank them for their substantial contributions to their campuses and local communities,” said Governor Charlie Baker. “Each of the ‘29 Who Shine’ honorees represent our future citizenry and workforce and has already made a positive impact on the Commonwealth.”

While at MassBay, Guerrero was a member of the Phi Theta Kappa National Honor Society and worked at an afterschool program at a middle school in Natick. He serves as both a deacon and assistant director for teens and young adults at his local church and assists in the programming for his congregation’s bible school. He and his wife are also foster parents to a baby boy.
PRESIDENT’S SCHOLAR SCHOLARSHIPS

Estefany Perez and Debora Spairani are this year’s freshman recipients of MassBay President’s Scholar Scholarship, which recognizes academically superior graduating high school students entering MassBay.

The scholarship in the amount of $2,500 is given out annually to two students for four consecutive semesters starting in the fall semester. Students who are awarded the scholarship must be enrolled full-time and maintain a minimum GPA of 3.0. The scholarship may be used for tuition, mandatory fees, books and other learning materials.

Perez, who studied cosmetology at Joseph P. Keefe Technical School in Framingham, is majoring in Business Administration at MassBay.

“This scholarship and the opportunities it will provide, will help me achieve my dream of owning my own salon someday,” said Perez. “I will use this opportunity to give back to younger students who need guidance and mentorship to provide a support system like the donors have done for me.”

Spairani graduated in 2013 from American High School Academy in Miami, and is pursuing a dual degree in Business Administration and Psychology at MassBay.

“The financial support has given me so much hope and peace of mind as I pursue my degree,” said Spairani. “My vision is to complete my Master’s along with my Board Certified Behavior Analyst degree, for the purpose of opening my own therapeutical center, making a difference in the lives of the disabled and their families. The scholarship has given me an extra stepping stone and I am forever thankful.”

ONE FAMILY SCHOLARSHIPS

Five students at MassBay have been selected for the One Family Scholars program, all of whom are single parents.

The scholars are: Daisy Escobar, studying Accounting; Crystal Farrell, studying Hospitality Management; Melisar Nambatya, studying Human Services; Danielle Ramos, majoring in General Science Studies and enrolled in the Surgical Technology program; and Patricia Bonanno ’16, who earned her A.S. General Science Studies at MassBay and is now pursuing her bachelor’s degree in nursing at Worcester State University.

The impact of the program, which works to fight poverty by providing single parents with opportunities for a college education, has been dramatic. Last spring, MassBay Liberal Arts student Linda Arena was selected for the One Family Scholar program and is now pursuing her bachelor’s degree at Wellesley College.

“MassBay students who have been accepted into the One Family Scholars program have excelled. Many have graduated and gone on to a four-year college for their bachelor’s degree,” said Mary Shia, MassBay Vice President for Institutional Advancement and Alumni Relations and Executive Director of the MassBay Foundation. “One Family scholarships have and continue to empower our scholars. We could not do all we do without them as a partner.”
MassBay Honors Students at 54th Commencement Ceremony

MassBay Community College honored its top students at its 54th Commencement ceremony on May 19 at the Wellesley Hills campus. Nearly 300 students participated in the ceremony, representing students from 38 countries from around the world. The College recognized students who earned the highest GPA in their respective academic divisions, as well as the students who earned the highest overall GPA at the College. This year, MassBay produced five students total who graduated with a perfect 4.0 GPA. Divisional Award winners received $250, and All-College Academic Award winners received $500 from the MassBay Foundation.

DIVISIONAL AWARDS

Division of Business and Professional Studies

Ana Hincu was awarded the Divisional Award for her 4.0 GPA in the Division of Business and Professional Studies, earning her Associate of Science Degree in Accounting. Seven years ago, Ana moved to the United States from Moldova and has worked hard to put herself through school. “If you really want something,” she said, “work hard and you can achieve your goals.” Hincu is currently employed at a telecommunications firm, but plans to pursue her bachelor’s degree in Accounting.

Anne O’Brien was awarded the Divisional Award for her 4.0 GPA in the Division of Business and Professional Studies, earning her Associate of Arts Degree in Early Childhood Education. She credits her academic success to her family and her strong support system, especially her mother and her boyfriend George, as well as the MassBay Faculty Professor Linda Romero for empowering her to think through solutions for juggling multiple priorities in her life. O’Brien plans to pursue her bachelor’s degree in the near future.

Joanna Siegal was awarded the Divisional Award for her 4.0 GPA in the Division of Business and Professional Studies, earning her Associate of Science Degree in Early Childhood Education. She is the mother of three children, ages 12, 16 and 18, and she began attending MassBay with the hopes of completing her degree before her oldest daughter started college. Siegal currently works as a director of a local childcare center and hopes to pursue a bachelor’s and master’s degree in the near future.

Division of Health Sciences

Amy Roberts was awarded the Divisional Award for her 3.735 GPA in the division of Health Science, earning her Associate of Science Degree in Nursing. She credits her academic success to her family and her strong support system, especially her partner, Dave, who went to great lengths to make sure that she could earn her degree. With his support, she stayed focused on her goal and she said, “literally gave it my all.” Roberts will take her registered nursing exam in the coming months and hopes to be employed full-time as a nurse.

Division of Humanities and Social Sciences

Micaela Malo was awarded the Divisional Award for her 4.0 GPA in the Division of Humanities and Social Sciences, earning her Associate of Arts Degree in Liberal Arts. She has overcome great odds to graduate. For the past 11 years, she has been in recovery from substance abuse. Malo credits her incredible success to her professors, her recovery group and her family who bolstered her throughout
the years with unending support. Malo will attend UMass Boston to earn her bachelor’s degree in psychology and sociology.

Eva Thibeault was awarded the Divisional Award for her 4.0 GPA for the Division of Humanities and Social Sciences, earning her Associate of Arts Degree in Liberal Arts. She is a graduate of Newton North High School, and took several years off before attending MassBay, which she says were crucial to helping better understand herself contributing to her success. Thibeault will attend Mount Holyoke College to pursue her bachelor’s degree in history and religious studies.

Division of Science, Technology, Engineering, and Mathematics

Lauren Toubeau was awarded the Divisional Award for her 3.976 GPA in the Division of Science, Technology, Engineering and Mathematics, earning an Associate of Science Degree in General Studies and a Certificate in Phlebotomy. She credits the ability to take classes on a part-time basis while working as a key factor to her success at MassBay.

ALL-COLLEGE ACADEMIC AWARDS

MassBay had five students earn a perfect 4.0 grade point average, earning an All-College Academic Award. The awards went to:

Ana Hincu, A.S. in Accounting, Division of Business and Professional Studies
Anne O’Brien, A.S. in Early Childhood Education, Division of Business and Professional Studies
Joanna Siegel, A.S. in Early Childhood Education, Division of Business and Professional Studies
Micaela Malo, A.A. in Liberal Arts, Division of Humanities and Social Sciences
Eva Thibeault, A.A. in Liberal Arts, Division of Humanities and Social Sciences
MassBay Community College received the third and final installment of original art donated through The Art Connection. Since 2013, The Art Connection has donated 78 pieces of original art, gifted by local artists and collectors, for display at MassBay Community College.

The Art Connection aims to increase access to art for under-served communities that may not have the opportunity to experience original works of art. The first donation was given in honor of Krystle Campbell, a MassBay alumna who was killed in the Boston Marathon bombing in 2013. At each installment, a diverse committee of MassBay faculty, staff and students select artwork that they believe will inspire reflection, spark discussion, and reflect the College’s educational mission.

Works of art, in various mediums, are currently showcased throughout the College’s Wellesley Hills Campus – throughout the halls, the Library Atrium, conference rooms, and seating areas.

During the 2015-2016 academic year, the following artists donated 25 pieces of art, currently on display on the Wellesley Hills campus:

100 Males to College
MassBay Community College, Framingham State University, the commonwealth’s Department of Higher Education, and local community organizations have partnered to help 100 male students of color from Framingham High School and Joseph P. Keefe Technical School in Framingham find a firm path to college. The new initiative “100 Males to College” is aimed at helping close the achievement and opportunity gaps for low-income, male students to increase college access and ultimately help expand the state’s workforce. Significantly more low-income females in the State pursue a college degree, compared to their male counterparts. Faculty, staff, and students from MassBay, as well as from partnering institutions, will serve as mentors for 70 students from Framingham High and 30 students from Keefe Tech.

Commonwealth Commitment
MassBay has joined Massachusetts community colleges, state universities, and UMass in the Commonwealth Commitment, a new program that provides entering college students with the opportunity to save an additional $5,000 in tuition. Through the program, students commit to first earning an associate’s degree from any of the 15 community colleges in Massachusetts and then transferring to a state university or a UMass campus for the bachelor’s degree. Student commit to enrolling full-time while maintaining a GPA of 3.0, and completing their degrees within four and a half years. In return, the Commonwealth commits to providing students with a 10 percent rebate on tuition and fees after every successful semester and a freeze on tuition and fees from the student’s point of entry into a community college. MassBay will begin enrolling students for the Commonwealth Commitment starting with the Spring 2017 semester.
Estrella Program: Improving College Success for Foster Youth

MassBay Community College and Framingham State University have partnered with Wayside Youth & Family Support Network’s Estrella Program to assist in improving college success rates for foster youth who are aging out of the Department of Children and Families (DCF). Wayside’s College Support Program, Estrella, is named after the Spanish word for star and was created to address the social, academic, and community support that is needed for foster care youth who are pursuing a college education. Research has shown that youth who are aging out of the child welfare system are “truly on their own” with few financial resources after they graduate from high school. Although many foster youth have a desire to continue their education, only a small percentage who start college actually graduate. This new initiative helps guide the youth through the college process and works as a support system to ensure students have the resources they need to be successful. The Estrella program also collaborates with The MetroWest College Planning Center, another joint collaboration of Framingham State and MassBay, and the Tempo Young Adult Resource Center.

FSU@MassBay: Bachelor Degree Programs on MassBay’s Campus

MassBay Community College and Framingham State University have partnered to offer affordable, flexible opportunities for students to earn both an associate’s and a bachelor’s degree in two popular program areas - Liberal Arts or Business - right on MassBay’s campus. Students start by enrolling at MassBay and committing to the FSU@MassBay pathway in Liberal Arts or Business Administration. Eligible students will be accepted for immediate transfer to Framingham State University for the completion of their Bachelor’s Degree in Liberal Studies or Management. The program offers seamless transfer with waived application fees and a tuition discount from Framingham. All bachelor’s degree program courses on the MassBay campus will be taught by Framingham State faculty and will be offered in the evenings through the University's Division of Continuing Education. While the program places no time constraints on students to finish their degrees, students who attend full-time and complete their degrees in four years could end up spending less than $30,000 total for the cost of their associate’s and bachelor’s degrees.

Dual Enrollment: Helping High School Students Earn Early College Credits

Students at Framingham High School, Natick High School and Joseph P. Keefe Technical School in Framingham are getting an early start to college thanks to MassBay’s Dual Enrollment programs. These partnerships, called Partner High School Dual Enrollment, are funded by the Commonwealth Dual Enrollment Program (CDEP) and are free for those students who qualify and participate from these partner high schools. Natick High School students can take college-level English I, English II, and Math classes at the high school. Keefe Tech students are taking college-level Introduction to Sociology, and Framingham High School students are taking Introduction to Communications courses at the MassBay Framingham campus. MassBay also offers the Traditional Dual Enrollment for qualifying high school and home-schooled students to enroll in college courses. Participating students may receive college and high school credits for their course work and may register for full-time or part-time schedules. Traditional Dual Enrollment students attend classes on the Framingham or Wellesley Hills campus.
On May 15, 2016, MassBay Community College hosted its annual All Vehicle Show at the College’s Ashland Automotive Technology Center, drawing hundreds of local residents and car show participants, and raising record dollars in sponsorships. A heartfelt thank you to all of our sponsors.
