Summary

Full Stack Developer experienced in building scalable, end-to-end applications using Java and Python. Strong foundation in object-oriented design, algorithms, and data structures. Passionate about creating customer-focused, innovative solutions and delivering high-quality code in fast-paced, agile environments.

Education

7.11 / 10 **B.Tech in Computer Science and Engineering**, *SVN Institute of Engineering and Technology*, Lucknow, India

2021 – 2025

Skills

Languages	Java, Python, JavaScript, C++, SQL, HTML5, CSS3
Frameworks & Libraries	Spring Boot, Flask, React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
Databases	MySQL, MongoDB, DynamoDB, Redis
Tools & Platforms	Git, GitHub, Postman, Docker, Linux, Swagger, JWT
Cloud & DevOps	AWS (EC2, Lambda, S3), Firebase, NGINX, GitLab CI/CD
CS Fundamentals	DSA, OOPs, Distributed Systems, REST APIs, Microservices, TDD, Agile

Projects

E-Commerce Order Management System (Microservices)

[GitHub](#)

Spring Boot, Kafka, MongoDB, Redis, gRPC, GraphQL

- Engineered a distributed microservices system to handle order placement, tracking, inventory, and notifications.
- Used Kafka for asynchronous communication, Redis for caching, and MongoDB for storage.
- Integrated REST, gRPC, and GraphQL APIs and orchestrated services using NGINX.

FinanceFlow – Loan Management System

[GitHub](#)

Java 17, Spring Boot, MySQL, Redis, JWT

- Designed APIs for loan processing, user roles, and secure access with Spring Boot and JWT.
- Used Redis for caching and MySQL for persistent storage; documented APIs via Swagger.
- Validated endpoints using Postman for secure and test-driven development.

BookStoreApp – Distributed Web Application

[GitHub](#)

Spring Boot, React.js, MySQL, Eureka, Zuul

- Built microservices for books, users, and orders with RESTful Spring Boot backends.
- Implemented service discovery using Eureka and routing with Zuul API Gateway.
- Created a React.js frontend and managed data using MySQL and REST APIs.

Shoppers – E-Commerce Platform (MVC)

[GitHub](#)

Node.js, Express.js, MongoDB, EJS

- Developed a full-stack MVC web app with authentication, product browsing, and admin tools.
- Used MongoDB for data storage and applied CI/CD via GitHub workflows.
- Implemented secure routes and user sessions using Express middleware.

AI Resume Scanner

[GitHub](#)

Python, NLP, BERT, spaCy, Streamlit

- Created an AI-powered resume parser with skill extraction and relevance scoring via BERT + spaCy.
- Built a real-time UI with Streamlit to analyze resumes against job descriptions.
- Implemented cosine similarity on embedding vectors to match JD–Resume fit.

Certifications

ICT Academy (under Infosys Foundation)

Offline

Java Software Developer Training

Feb 2025 – Mar 2025

- Completed 6-week training focused on Java programming, JDBC, Servlets, and Spring Boot.
- Built hands-on mini-projects involving REST APIs and MVC design patterns.

Achievements

Rank 1 in LeetCode Weekly Contest 459 out of 28,000+ participants

Online

[LeetCode Contest Ranking](#)

Jul 2025

- Achieved a peak rating of **3369**, earning the **Guardian Level** badge.
- Global rank **20 / 725,492+** — among the top **0.003%** of competitive programmers on LeetCode.
- Solved over **3,600+** problems across all difficulty levels.
- Consistently active in weekly contests with **58+** total contest participations.
